

ANNALS OF THE NEW YORK ACADEMY OF SCIENCES

Volume 391

EDITORIAL STAFF

Executive Editor

BILL M. BOLAND

Managing Editor

JOYCE M. HITCHCOCK

Associate Editors

JUSTINE CULLINAN

NOEMI E. VARAS

*The New York Academy of Sciences
2 East 63rd Street
New York, New York 10021*

THE NEW YORK ACADEMY OF SCIENCES

(Founded in 1817)

BOARD OF GOVERNORS, 1982

MORRIS H. SHAMOS, *President*
WALTER N. SCOTT, *President-Elect*

Honorary Life Governors

SERGE A. KORFF
I.B. LASKOWITZ

H. CHRISTINE REILLY
IRVING J. SELIKOFF

VITTORIO M. CANUTO
ARTHUR D. FLANAGAN

Secretary
PHILIP FEIGELSON

Vice Presidents
NORBERT J. ROBERTS

KURT SALZINGER
VIRGINIA S. SEXTON

Treasurer
ALAN J. PATRICO

Elected Governors-At-Large
1980-82

MICHAEL V.L. BENNETT
WILLIAM S. CAIN

PETER M. LEVY
JACQUELINE MESSITE

CRAIG D. BURRELL
FRANK R. LANDSBERGER

1981-83

MURIEL FEIGELSON
PHILIP SIEKEVITZ

WILLIAM T. GOLDEN
HARRY LUSTIG

1982-84

HERBERT SHEPPARD
DONALD B. STRAUS

HEINZ R. PAGELS
PARITHYCHERY R. SRINIVASAN

Past Presidents (Governors)

JOEL L. LEBOWITZ
HERBERT J. KAYDEN

ANNALS INDEX (1980-1981)

ANNALS OF THE NEW YORK ACADEMY OF SCIENCES

Volume 391

ANNALS INDEX (1980-1981)

Edited by Bill M. Boland, Justine Cullinan, and Noemi E. Varas

VOLUME 391

June 25, 1982

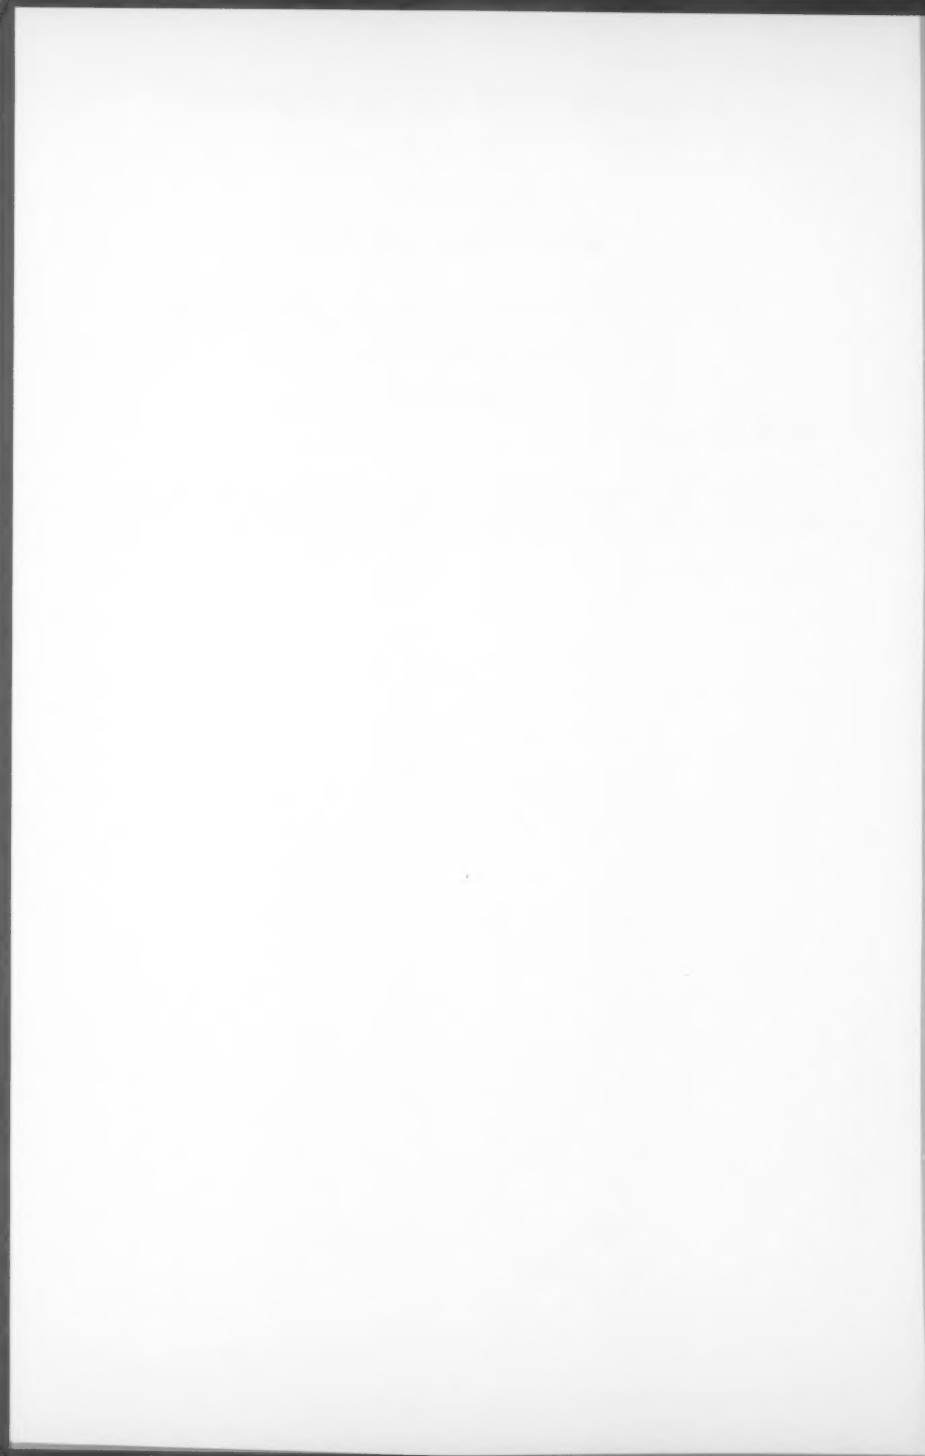

ANNALS INDEX (1980-1981)

Editors

BILL M. BOLAND, JUSTINE CULLINAN, AND NOEMI E. VARAS

CONTENTS

Annals by Volume	1
Annals by Title	3
Papers by Author	5
Subject Index	79

ANNALS BY VOLUME

- 333 (1980). Transition Metal Mediated Organic Synthesis. D. W. SLOCUM AND O. R. HUGHES, *Editors and Conference Chairmen*.
- 334 (1979). Science and Technology Policy: Perspectives for the 1980s. H. I. FUSFELD, *Editor and Conference Chairman*. C. S. HAKLISCH, *Editor*.
- 335 (1980). Thermal Characteristics of Tumors: Applications in Detection and Treatment. R. K. JAIN AND P. M. GULLINO, *Editors and Conference Chairmen*.
- 336 (1980). Ninth Texas Symposium on Relativistic Astrophysics. J. EHLERS, J. J. PERRY, AND M. WALKER, *Editors*.
- 337 (1980). Third International Conference on Collective Phenomena. J. L. LEBOWITZ, J. S. LANGER, AND W. I. GLABERSON, *Editors*.
- 338 (1980). Aerosols: Anthropogenic and Natural, Sources and Transport. T. J. KNEIF AND P. J. LIOY, *Editors and Conference Chairmen*.
- 339 (1980). Growth Regulation by Ion Fluxes. H. L. LEFFERT, *Editor and Conference Chairman*. F. WESTALL, *Conference Chairman*.
- 340 (1980). Psychology: The Leading Edge. F. L. DENMARK, *Editor*.
- 341 (1980). Anion and Proton Transport. W. A. BRODSKY, *Editor and Conference Chairman*.
- 342 (1980). Ultrafast X-Ray Microscopy: Its Application to Biological and Physical Sciences. D. F. PARSONS, *Editor and Chairman*.
- 343 (1980). Precursor Processing in the Biosynthesis of Proteins. M. ZIMMERMAN AND D. F. STEINER, *Editors and Conference Chairmen*. R. A. MUMFORD, *Editor and Organizing Director*.
- 344 (1980). Fourth Cooley's Anemia Symposium. W. F. ANDERSON, A. BANK, AND E. C. ZAINO, *Editors and Conference Chairmen*.
- 345 (1980). Studies in Child Language and Multilingualism. V. TELLER AND S. J. WHITE, *Editors*.
- 346 (1980). Applications of Photochemistry in Probing Biological Targets. A. M. TOMETSKO AND F. M. RICHARDS, *Editors and Conference Chairmen*.
- 347 (1980). Forensic Psychology and Psychiatry. F. WRIGHT, *Editor and Conference Chairman*. F. WRIGHT, C. BAHN, AND R. W. RIEBER, *Editors and Conference Organizers*.
- 348 (1980). Lipoprotein Structure. A. M. SCANU AND F. R. LANDSBERGER, *Editors and Conference Chairmen*.
- 349 (1980). Differentiation and Carcinogenesis in Liver Cell Cultures. C. BOREK AND G. M. WILLIAMS, *Editors and Conference Chairpersons*.
- 350 (1980). Regulatory Functions of Interferons. J. VILČEK, I. GRESSER, AND T. C. MERIGAN, *Editors and Conference Chairmen*.
- 351 (1980). Annals Index (1978-1979). B. M. BOLAND, *Editor*.
- 352 (1980). Long-Span Bridges: O. H. Ammann Centennial Conference. E. COHEN AND B. BIRDSALL, *Editors and Conference Chairmen*.
- 353 (1980). Airborne Contagion. R. B. KUNDSIN, *Editor and Conference Chairman*.
- 354 (1980). Genetic Variation of Viruses. P. PALESE AND B. ROIZMAN, *Editors and Conference Chairmen*.
- 355 (1980). Micronutrient Interactions: Vitamins, Minerals, and Hazardous Elements. O. A. LEVANDER AND L. CHENG, *Editors and Conference Chairmen*.
- 356 (1980). Calmodulin and Cell Functions. D. M. WATTERSON AND F. F. VINCENZI, *Editors and Conference Chairmen*.
- 357 (1980). Nonlinear Dynamics. R. H. G. HELLEMAN, *Editor and Conference Chairman*.
- 358 (1980). Second International Conference on Carriers and Channels in Biological Systems—Transport Proteins. A. E. SHAMOO, *Editor and Conference Chairman*.

- 359 (1981). Modulation of Cellular Interactions by Vitamin A and Derivatives (Retinoids). L. M. DE LUCA AND S. S. SHAPIRO, *Editors and Conference Chairmen*.
- 360 (1981). Victorian Science and Victorian Values: Literary Perspectives. J. PARADIS AND T. POSTLEWAIT, *Editors*.
- 361 (1981). Origins and Evolution of Eukaryotic Intracellular Organelles. J. F. FREDRICK, *Editor and Conference Chairman*.
- 362 (1981). Research Developments in Drug and Alcohol Use. R. B. MILLMAN, *Editor and Conference Chairman*. P. CUSHMAN, JR. AND J. H. LOWINSON, *Editors*.
- 363 (1981). Management of Assessed Risk for Carcinogens. W. J. NICHOLSON, *Editor and Workshop Chairman*.
- 364 (1981). The Clever Hans Phenomenon: Communication with Horses, Whales, Apes, and People. T. A. SEBEOK AND R. ROSENTHAL, *Editors and Conference Chairmen*.
- 365 (1981). The Three Mile Island Nuclear Accident: Lessons and Implications. T. H. MOSS AND D. L. SILLS, *Editors and Conference Organizers*.
- 366 (1981). Luminescence from Biological and Synthetic Macromolecules: Eighth Katzir Conference. H. MORAWETZ AND I. Z. STEINBERG, *Editors and Conference Chairmen*.
- 367 (1981). Quantum Chemistry in Biomedical Sciences. H. WEINSTEIN AND J. P. GREEN, *Editors and Conference Chairmen*.
- 368 (1981). Papers in Science and Public Policy I. B. L. ROSENBERG, *Editor*.
- 369 (1981). Biochemical Engineering II. A. CONSTANTINIDES, W. R. VIETH, AND K. VENKATASUBRAMANIAN, *Editors*.
- 370 (1981). Contributions to Hemostasis. D. A. WALZ AND L. E. MCCOY, *Editors and Conference Chairmen*.
- 371 (1981). Structure and Mobility in Molecular and Atomic Glasses. J. M. O'REILLY AND M. GOLDSTEIN, *Editors and Conference Chairmen*.
- 372 (1981). Hormonal Regulation of Epithelial Transport of Ions and Water. W. N. SCOTT AND D. B. P. GOODMAN, *Editors and Conference Chairmen*.
- 373 (1981). Fourth International Conference on Collective Phenomena. J. L. LEBOWITZ, *Editor*.
- 374 (1981). Vestibular and Oculomotor Physiology: International Meeting of the Bárány Society. B. COHEN, *Editor and Conference Chairman*. K. BROOKLER, *Conference Chairman*.
- 375 (1981). Tenth Texas Symposium on Relativistic Astrophysics. R. RAMATY AND F. C. JONES, *Editors and Conference Chairmen*.
- 376 (1981). The Research Potential of Anthropological Museum Collections. A.-M. E. CANTWELL, J. B. GRIFFIN, AND N. A. ROTHSCHILD, *Editors and Conference Organizers*.
- 377 (1981). Myasthenia Gravis: Pathophysiology and Management. D. GROB, *Editor and Conference Chairman*.
- 379 (1981). Native Language and Foreign Language Acquisition. H. WINITZ, *Editor and Conference Organizer*.

ANNALS BY TITLE

- A**erosols: Anthropogenic and Natural, Sources and Transport. **338** (1980).
 Airborne Contagion. **353** (1980).
 Anion and Proton Transport. **341** (1980).
 Annals Index (1978-1979). **351** (1980).
 Applications of Photochemistry in Probing Biological Targets. **346** (1980).
- B**iochemical Engineering II. **369** (1981).
- C**almodulin and Cell Functions. **356** (1980).
 Carriers and Channels in Biological Systems—Transport Proteins, Second International Conference on. **358** (1980).
 Child Language and Multilingualism, Studies in. **345** (1980).
 Clever Hans Phenomenon, The: Communication with Horses, Whales, Apes, and People. **364** (1981).
 Collective Phenomena, Third International Conference on. **337** (1980).
 Collective Phenomena, Fourth International Conference on. **373** (1981).
 Contributions to Hemostasis. **370** (1981).
 Cooley's Anemia Symposium, Fourth. **344** (1980).
- D**ifferentiation and Carcinogenesis in Liver Cell Cultures. **349** (1980).
- F**orensic Psychology and Psychiatry. **347** (1980).
 Fourth Cooley's Anemia Symposium. **344** (1980).
 Fourth International Conference on Collective Phenomena. **373** (1981).
- G**enetic Variation of Viruses. **354** (1980).
 Growth Regulation by Ion Fluxes. **339** (1980).
- H**emostasis, Contributions to. **370** (1981).
 Hormonal Regulation of Epithelial Transport of Ions and Water. **372** (1981).
- L**ipoprotein Structure. **348** (1980).
 Long-Span Bridges: O. H. Ammann Centennial Conference. **352** (1980).
 Luminescence from Biological and Synthetic Macromolecules: Eighth Katzir Conference. **366** (1981).
- M**anagement of Assessed Risk for Carcinogens. **363** (1981).
 Micronutrient Interactions: Vitamins, Minerals, and Hazardous Elements. **355** (1980).
 Modulation of Cellular Interactions by Vitamin A and Derivatives (Retinoids). **359** (1981).
 Myasthenia Gravis. **377** (1981).
- N**ative Language and Foreign Language Acquisition. **79** (1981).
 Ninth Texas Symposium on Relativistic Astrophysics. **336** (1980).
 Nonlinear Dynamics. **357** (1980).
- O**rigins and Evolution of Eukaryotic Intracellular Organelles. **361** (1981).
- P**apers in Science and Public Policy I. **368** (1981).
 Precursor Processing in the Biosynthesis of Proteins. **343** (1980).
 Psychology: The Leading Edge. **340** (1980).
- Q**uantum Chemistry in Biomedical Sciences. **367** (1981).
- R**egulatory Functions of Interferons. **350** (1980).
 Research Development in Drug and Alcohol Use. **362** (1981).
 Research Potential of Anthropological Museum Collections, The. **376** (1981).
- S**cience and Public Policy I, Papers in. **368** (1981).

- Science and Technology Policy: Perspectives for the 1980s. **334** (1979).
- Second International Conference on Carriers and Channels in Biological Systems—Transport Proteins. **358** (1980).
- Structure and Mobility in Molecular and Atomic Glasses. **371** (1981).
- Studies in Child Language and Multilingualism. **345** (1980).
- Tenth Texas Symposium on Relativistic Astrophysics. **375** (1981).
- Thermal Characteristics of Tumors: Applications in Detection and Treatment. **335** (1980).
- Third International Conference on Collective Phenomena. **337** (1980).
- Three Mile Island Nuclear Accident, The: Lessons and Implications. **365** (1981).
- Transition Metal Mediated Organic Synthesis. **333** (1980).
- Ultrasoft X-Ray Microscopy: Its Application to Biological and Physical Sciences. **342** (1980).
- Vestibular and Oculomotor Physiology: International Meeting of the Bárány Society. **374** (1981).
- Victorian Science and Victorian Values: Literary Perspectives. **360** (1981).

SUBJECT INDEX

- A**bsorbing gas (see Gas, absorbing)
- Absorption bands, light-scattering by chromophores at their, **366**: 125-139
- Absorption-line spectra of quasi-stellar objects, **336**: 39-50
- Abuse, alcohol (see Alcoholism)
- Academia and nutrition, **355**: 366-370
- Acceleration of cosmic rays by shock waves, **375**: 297-313
- Accretion in astrophysics, **336**: 590-597
- Acetone, biochemical production of, **269**: 205-218
- Acetylcholine
- binding sites of, on peripheral blood and CSF mononuclear cells, **377**: 848-849
 - changes in, during transmission of single nerve impulse, **377**: 830
 - desensitization to, at motor end-plates, in myasthenia gravis, **377**: 567-582
- Acetylcholine esterase deficiency in myasthenia gravis, **377**: 614-639
- Acetylcholine receptor(s)
- and molecular dissection and monoclonal antibodies in myasthenia gravis, **377**: 110-124
 - autoimmune helper T-lymphocyte specific for, **377**: 831-832
 - autoimmunity to, genetic control of, **377**: 258-277
 - from *Torpedo*, and formation of planar membranes from natural liposomes, **358**: 361
 - immune response to, influence of alpha-fetoprotein in, **377**: 208-221
 - immunochemical characterization of, using monoclonal antibodies, **377**: 893-894
 - in different membrane species, **377**: 20-37
 - in myasthenia gravis, immune response against, **377**: 823-824
 - in myasthenic human muscle, **377**: 61-76
 - increased rate of degradation of, induced by sera of myasthenic patients, **377**: 825-827
 - loss of, in myasthenia gravis, antibody-mediated mechanisms of, **377**: 175-188
 - monoclonal autoantibodies to, **377**: 77-96
 - muscle, and human and murine monoclonal antibody, **377**: 143-157
 - nicotinic
 - and human lymphocytes, **377**: 427-435
 - antibodies to, in myasthenia gravis, **377**: 199-207
 - purification of, from human muscle, **377**: 891
- Acetylcholine receptor antibodies
- and anti-idopathic antibodies, **377**: 125-142
 - fluctuation of, in myasthenia gravis, **377**: 292-306
 - in myasthenia gravis, **377**: 812-815
 - monoclonal
 - in muscle, **377**: 143-157
 - molecules of, **377**: 1-19
 - titer of, and clinical status in myasthenia gravis, **377**: 856-857
- Acetylcholine-receptor-immunized rabbits, production of autoimmune myasthenia gravis in, **377**: 222-236
- Acetylcholine receptor molecule, structure and function of, studied with monoclonal antibodies, **377**: 1-19
- Acetylcholine receptor preparations, purified, photochemical probes in study of, **346**: 458-474
- Acetylcholine receptor site, nicotinic, coupled with ionic channel site, **358**: 239-252
- Acetylcholine receptor synthesis, effects of carbamylcholine, calcium and cyclic nucleotides on, **377**: 189-197
- Acetylenes, cyclodimerization of, with norbornadiene, **333**: 273-285
- Achievement, motivation for, and psychological dimensions of femininity and masculinity, **340**: 88-101
- AChR (see Acetylcholine receptor)
- Acid(s) (see also specific acid)
- precipitation of, and terrestrial and aquatic ecosystems, **338**: 540-555

- Acidification**
 luminal fluid
 and CO₂ permeability of the nephron, **341**: 111-116
 in nephron segments, **341**: 67-76
 mechanism of, CO₂ tension in identifying, **341**: 90-96
 of urine, and bicarbonate and chloride transport, **341**: 210-224
- Acoustic-induced eye movements**, **374**: 674-688
- Acoustic targets, fixation of, in vestibular nystagmus**, **374**: 706-721
- Acoustic wave instabilities in anisotropic piezosemiconductors**, **337**: 173-184
- Acrolein, hydrogenation of, to allyl alcohol**, **333**: 155-164
- ACTH**
 biosynthesis of, in the rat, **343**: 94-110
 common precursor to, signal sequence in, **343**: 79-93
 precursor and secretion of, glycosylation in, **343**: 79-93
- Acutin related to prothrombin activation**, **370**: 453-467
- Adaptive gain control in primate vestibulo-ocular reflex**, **374**: 513-525
- Addicts, opiate (see Opiate addicts)**
- Adenine nucleotides, thrombin-induced release of, from endothelial cells**, **370**: 51-56
- Adenocarcinomas, transport function by, anatomic evidence of**, **372**: 455-464
- Adenosine derivatives in photoaffinity labeling of phosphofructokinase**, **346**: 31-44
- Adenosine 3',5'-monophosphate (see cAMP)**
- Adenosine triphosphate (see ATP)**
- Adenosine triphosphatase (see ATPase)**
- Adenoviral gene control, mechanisms of**, **354**: 466-471
- Adenoviral genome, evolution of**, **354**: 426-452
- Adenoviruses**
 genetic variability of, **354**: 16-42
 mRNA synthesis in, **354**: 1-15
- Adenylate cyclase**
 brain and cardiac muscle, calcium-dependent regulation of, **356**: 220-231
 calmodulin-sensitive, in adrenal medulla, **356**: 402-403
 prokaryotic, activated by calmodulin, **356**: 360
- Adipocytes**
 hexose transport in, **358**: 356
 metabolic activation of, by insulin, **372**: 347-351
- Adolescents, aggression in, and TV viewing**, **347**: 319-331
- ADP, ATP translocator, asymmetry of**, **358**: 83-95
- Adrenal steroids**
 effect of, on epithelia formed by A6 cells, **372**: 442-454
 inducing amiloride-sensitive sodium transport, **372**: 64-78
- Adrenocorticotrophic hormone (see ACTH)**
- Aerodynamic lessons learned from individual bridge members**, **352**: 265-281
- Aerodynamic response of long-span bridges to wind**, **352**: 229-246
- Aerosols**
 atmospheric
 climatic effects of, **338**: 575-587
 in Northeastern United States, **338**: 463-482
 trace element abundances and chemistry of, **338**: 13-25
 dynamics of, **338**: 174-189
 formation of, in urban plumes, **338**: 258-275
 over Lake Michigan, **338**: 219-232
 future, of Southwest, **338**: 588-598
 in dissemination of bacterial plant pathogens, **353**: 94-104
 in power plant plumes, **338**: 276-296
 in urban plumes over rural monitoring site, **338**: 202-218
 natural, **338**: 317-329; 348-358
 organic constituents of, **338**: 359-376
 research in
 and future aerosols of the Southwest, **338**: 588-598
 overview of, **338**: 599-604
 sea-salt, **338**: 330-347
 secondary, and sulfate compounds in atmosphere, **338**: 26-38
 spreading plant viruses, **353**: 167-173
 sulfurous, transported to Scandinavia, **338**: 504-514
 transport of
 in Northern Europe, **338**: 389-398
 mesoscale and synoptic scale, **338**: 379-388
 urban
 optical properties of, **338**: 70-85
 size distribution in, **338**: 1-12
 sulfur and nitrogen compounds in, **338**: 39-49
 visibility-reducing, in Southwestern plumes, **338**: 233-257
 winter Arctic, transport of, **338**: 486-503
- Affinity chromatography (see Chromatography, affinity)**
- Affinity precipitation technique in isolation of trypsin from bovine pancreas**, **369**: 257-263
- AFI (see Research Institute of Physics)**
- Aflatoxin B₁ cytotoxicity in rat hepatoma cultures**, **349**: 401-403
- Agar technique, *in vitro* semi-solid, in assay of sensitivity of ovarian carcinoma cells to interferon**, **350**: 228-244
- Agarose gel method of evaluation of factor VIII procoagulant electrophoretic distribution**, **370**: 236-240
- Agglutination, platelet (see Platelet agglutination)**
- Aggression**
 in adolescents, and TV viewing, **347**: 319-331
 in preschool children, and television viewing, **347**: 289-303

- observed on film in presence of sanctioning adults, effects on children of, **347**: 304-318
- Agonists, mineralocorticoid, binding to renal receptor, **372**: 83-84
- Agreement through fair play, **373**: 93-100
- Agriculture
 - genetic engineering in, and *Rhizobium japonicum*, **369**: 15-22
 - origin of, and museum-curated plant remains, **376**: 345-356
- Air
 - indoor, and airborne contagion, **353**: 308-311
 - recirculated, in naval vessel, and spread of tuberculosis, **353**: 10-24
 - sampling of, in hospitals, **353**: 230-240
- Air-conditioning systems in spread of microorganisms, **353**: 209-217
- Air currents as continuing vector, **353**: 123-139
- Air masses, hazy, transport of, **338**: 418-433
- Air pollution
 - and problems with energy, **338**: 561-562
 - regional scale, **338**: 399-417
 - transport of, OECD program on, **338**: 453-462
- Air-water interface, apolipoproteins at, **348**: 122-137
- Airborne bacteria
 - in contamination of fine-particle nebulizers, **353**: 218-229
 - in operating room, ultraviolet light for control of, **353**: 271-284
- Airborne contagion
 - and indoor air, **353**: 308-311
 - historical background for study of, **353**: 3-9
 - in animals, **353**: 174-178
 - in hepatitis B transmission, **353**: 157-166
 - viruses as agents of, **353**: 147-156
- Airborne dissemination of fungal spores, **353**: 116-122
- Airborne infection
 - during surgery, **353**: 255-261
 - in hospitals, prevention and control of, **353**: 312-330
 - in the community, prevention and control of, **353**: 331-339
 - of acute contagious diseases, **353**: 35-44
- Airborne microorganisms, sampling of, in clean rooms and spacecraft assembly areas, **353**: 241-254
- Airborne particles, physics of, **353**: 71-80
- Airborne pollutants identified by long-term and seasonal trends of elemental compounds, **338**: 116-125
- Airborne spread
 - of brucellosis, **353**: 105-114
 - of plant viruses and spiroplasmas, **353**: 179-185
- Airborne transmission
 - of bacteria, long-range, **353**: 186-200
 - of legionellosis, **353**: 61-66
- Airflow environment, laminar, in treatment of burn patients, **353**: 285-293
- Alabama, Moundville, WPA-CCC collections from, **376**: 443-447
- Aladdin Electron Storage Ring, **342**: 35-43
- L-Alanine, sodium-dependent transport of, and brush border proteins, **358**: 253-266
- Albumin
 - bovine, biosynthesized in cell-free system, **343**: 210-217
 - synthesis of, in rat hepatocytes, **349**: 413
- Alcohol
 - allyl, hydrogenation of acrolein to, **333**: 155-164
 - effects of, on pregnancy and the newborn, **362**: 136-157
 - metabolic interactions of, with opiates, **362**: 36-49
 - production of, membrane separations in, **369**: 367-382
 - transport of, in deformed PMMA, **371**: 310-311
 - use of, national patterns of, **362**: 4-15
- Alcoholism
 - and opiate addiction, combined approach to treatment of, **362**: 50-56
 - medical complications of, **362**: 132-135
- Aldosterone
 - controlling sodium permeability in toad bladder, **372**: 1-14
 - inducing proteins in toad urinary bladder, **372**: 81-82
 - inducing synthesis of proteins related to sodium transport, **372**: 15-29
 - localization of response of, in rabbit urinary bladder by electrophysiologic technique, **372**: 56-63
 - response of toad bladder to, and lipid metabolism, **372**: 30-38
- Algae
 - endosymbiotic eukaryotic, in evolution of chloroplasts, **361**: 193-208
 - prokaryotic and eukaryotic, biosynthesis of storage glucans in, **361**: 426-434
- Algebras, *, KMS condition for, **373**: 22-27
- Alkali-cation movements across muscle and epithelial cell membranes, effect of insulin on, **372**: 272-290
- Alkalinization of urine, and bicarbonate and chloride transport, **341**: 210-224
- Alkenes catalyzed by zeroequivalent palladium compound, addition of hydrogen cyanide to, **333**: 225-228
- Alkylation of nucleic acid structures, **367**: 295-325
- Allegheny Mountain, ambient sulfates on, **338**: 145-173
- Allosteric enzyme system, immobilized, **369**: 235-243
- Allyl alcohol (see Alcohol, allyl)
- Alpha-adrenergic receptors in cervical ganglion, **358**: 342-345
- Alpha-fetoprotein, influence of, on immune response to AChR, **377**: 208-221
- Aluminum, effect of, on fluoride metabolism in man, **355**: 181-194

- American families, marital violence and social stress in, **347**: 229-250
- Amiloride-sensitive sodium transport induced by adrenal steroids, **372**: 64-78
- Amine intercalates of FeOCl₂ lattice and molecular dynamics of, **373**: 28-36
- Amines, biogenic, **361**: 369-375
- Amino acid composition
of human fibroblast interferons, **350**: 385-389
of human lymphoblastoid interferon, **350**: 390-398
- Amino acid control of protein synthesis in rat hepatocyte, **349**: 1-17
- Amino acid frequencies, analysis of, in glycoproteins, **361**: 472-480
- Amino acid hydration, **367**: 132-150
- Amino acid-purine hydrogen bonding interactions, **367**: 281-294
- Amino acid side chains in well-characterized enzymes, catalytic function of, **367**: 383-406
- Amino acid transport in monolayer hepatocyte cultures in rats, **349**: 385-386
- Amino terminal sequence
of human fibroblast interferon, **350**: 385-389
of human lymphoblastoid interferon, **350**: 390-398
of mouse interferon species A from Ehrlich ascites tumor cells, **350**: 428-431
- Ammann, O.H., centennial conference, **352**: vii-281
- Anaerobic fermentation, continuous, process dynamic aspects of, **369**: 135-146
- Analysis
convex, foundations of, **337**: 103-117
factor and cluster, in identification of pollutants, **338**: 103-115
nonsmooth, and theory of fans, **373**: 101-112
of linear Boolean equations, **337**: 97-102
- Anesthetics, local, in calmodulin antagonism, **356**: 441-442
- Angiotensin as neuromodulator of intestinal sodium and water absorption, **372**: 646-648
- Anhydrase, carbonic, membrane-bound, **341**: 246-258
- Animals
airborne contagion in, **353**: 174-178
circus, and behavior in context, **364**: 18-25
instruction of, Piagetian analysis of, **364**: 60-93
- Anion channel of red blood cells, **358**: 1-12
- Anion efflux, sarcoplasmic reticulum, DIDS inhibition of, **358**: 328-331
- Anion exchange, erythrocyte
kinetics of titratable carrier for, **341**: 384-393
photoaffinity probe for, **346**: 211-231
- Anion fluxes, role of, in neutrophil secretion, **358**: 346-347
- Anion regulation of proximal tubular sodium and fluid transport, **341**: 125-133
- Anion-selective channel, voltage-dependent, in
outer mitochondrial membrane, **341**: 552-563
- Anion transport
in chromaffin granules, **358**: 354-355
in Ehrlich ascites tumor cells, **341**: 482-493
in hepatocyte plasma membranes, **346**: 232-243
in neurons, **341**: 510-523
in red cell membrane, **341**: 357-360; 394-418
and protein in band 3, **341**: 361-383
in red cells, **341**: 444-454
and protein structure, **341**: 433-443; 455-464
in renal tubule in rats, **341**: 97-110
in salivary secretion, **341**: 172-190
in yeast, **341**: 494-509
transport ATPases in, **341**: 335-356
- Anion transport protein in red cell membrane, investigated by chemical labeling, **341**: 419-432
- Anion transporters, **341**: 27-36
- Anisotropic piezosemiconductors, acoustic wave instabilities in, **337**: 173-184
- Anisotropy, luminescence, in rotational diffusion of biological macromolecules, **366**: 176-196
- Annals of the New York Academy of Sciences*,
index to, **351**: 3-90
- Antagonists, mineralocorticoid, binding of, to renal receptor, **372**: 83-84
- Anthrax, inhalation, **353**: 83-93
- Anthropological museum collections
and ethics, **376**: 575-578
and ethnographic reconstruction, **376**: 177-199
broken bones in, **376**: 35-52
collecting now for the future of, **376**: 567-573
Dalmatian, **376**: 529-555
excavating in, **376**: 17-34
in New Jersey, **376**: 557-566
old donations to, **376**: 337-344
outdoor, relationship between artifacts and the public, **376**: 301-313
preparation of, for use as primary data in ethnographic research, **376**: 201-227
research potential of, **376**: 1-6
- Anti-acetylcholine receptor antibodies
heterogeneity of, in myasthenia gravis, **377**: 895-897
- HLA B8, in familial myasthenia gravis, **377**: 872-873
- in myasthenia gravis
avidity and titer of, **377**: 316-331
binding characteristics of, **377**: 836-837
in serum and thymus, **377**: 854-855
multiple forms of, **377**: 342-359
patient-specific, **377**: 332-341
properties and serum levels of, **377**: 307-315
monoclonal hybridoma, **377**: 97-109
regulation of, by T-cells, in myasthenia gravis, **377**: 882-883
related to severity of myasthenia gravis, **377**: 859-861
specificities of, **377**: 806-807

- synthesis of, by lymphocytes in myasthenia gravis, **377: 393-402**
- Anti-acetylcholine receptor Fab fragments, effect of, on receptor-rich membrane vesicles, **377: 386-847**
- Antibiotics
- feeding of, to livestock, consequences of, **368: 23-60**
- β -lactam, theoretical studies of, **367: 531-544**
- photolabile, as probes of ribosomal structure, **346: 302-323**
- Antibodies
- and thymectomy in myasthenia gravis, **377: 786-804**
- acetylcholine receptor (see Acetylcholine receptor antibodies)
- anti-acetylcholine receptor (see Anti-acetylcholine receptor antibodies)
- anti-cholinesterase, in myasthenia gravis, **377: 360-371**
- combining region of, photoaffinity probes in, **346: 78-89**
- effects of, on post-synaptic membrane of neuromuscular junction, **377: 519-543**
- from myasthenic patients, binding characteristics of, **377: 836-837**
- insight into action of, from intrinsic and extrinsic fluorescent probes, **366: 208-216**
- lymphocyte binding in, in myasthenia gravis, **377: 436-446**
- mediating mechanisms of AChR loss in myasthenia gravis, **377: 175-188**
- monoclonal
- in immunochemical characterization of AChR, **377: 893-894**
- in myasthenia gravis, and AChR, **377: 110-124**
- serum, to nucleic acids in myasthenia gravis, **377: 833-834**
- to nicotinic AChR in myasthenia gravis, and hippocampal nerve endings, **377: 199-207**
- to thymosin α and human thymic epithelial cells in myasthenia gravis, **377: 477-485**
- Anti-calmodulin antisera, production of, **356: 437-438**
- Anticellular effects of PPPA (2'P5'A)N, **350: 611-612**
- Anticholinesterase compounds, effect of, and motor end-plate cholinesterase activity, **377: 852-853**
- Anticoagulant, lupus, mechanism of action of, **370: 359-365**
- Anticoagulant effect of heparin *in vitro*, **370: 656-661**
- Anticoagulant HMW fraction isolated from porcine heparin, **370: 627-643**
- Antidiuretic hormone
- action of
- and inhibitory effect of lanthanum, **372: 131-143**
- intracellular water transport in, **372: 118-130**
- membrane shuttle mechanism in, **372: 106-117**
- biology of, historical highlights of, **372: 85-91**
- bladders treated with, ruthenium red and horseradish peroxidase localization in, **372: 208-211**
- regulating water permeability in frog urinary bladder, **372: 144-162**
- washout of, cytoplasmic disposition of aggregate-carrying membranes during, **372: 212**
- Antigen(s)
- and thymectomy in myasthenia gravis, **377: 786-804**
- HLA (see HLA antigens)
- inducing interferon synthesis, suppression of, in human lymphocytes, **350: 586**
- release of leukocyte inhibitory factor by blood cells in presence of, **350: 577-579**
- xenogenic oncofetal, re-expressed in human neoplasia, **349: 409-410**
- Antigenic drift in influenza viruses, **354: 142-161**
- Antigenic properties
- of crossprotecting factors in human leukocyte and mouse L-cell interferons, **350: 332-338**
- of pro-C4 of human plasma, **343: 252-265**
- Antigenic relationships among interferon species, **350: 422-427**
- Antigenic variation in the picornaviruses, molecular basis of, **354: 202-218**
- Antihemophilic/von Willebrand factor protein, human, **370: 210-226**
- Antiheparin protein, bovine platelet, **370: 668-679**
- Antimitotic effects of interferons, role of interferon-induced enzymes in, **350: 459-472**
- Antiserum
- anti-calmodulin, production of, **356: 437-438**
- anti-thymocyte, in progressive myasthenia gravis, **377: 779-785**
- Antithrombin, radioactive, reacting with thrombin, **370: 695-699**
- Antithrombin III
- chemically modified, heparin binding and protease inhibitor activity of, **370: 700-707**
- fluorogenic substrates for assay of, **370: 720-730**
- interacting with protein-bound heparin, **370: 708-713**
- kinetic studies of, **370: 680-694**
- Anti-thymocyte antiserum, effect of, in myasthenia gravis, **377: 779-785**
- Antitumor agents, sensitivity of human ovarian carcinoma cells to, **350: 228-244**
- Antiviral activity
- of interferon
- effect of multiplicity of infection on, **350: 633**
- molecular basis of, **350: 432-440**
- of purified leukocyte interferon, **350: 399-404**
- Antiviral defense, and interferon and host gene interaction, **350: 558-565**
- Antiviral effects
- of interferons
- effects of concanavalin A on, **350: 211-227**
- in cloned transformed mouse cells, **350: 188-207**

- role of interferon-induced enzymes in, **350**: 459-472
- of PPPA(2'PS'A)N, **350**: 611-612
- Antiviral state
- development of, and interferon-induced protein synthesis in human fibroblasts, **350**: 613-614
- role of interferon-induced enzymes in, **350**: 497-509
- Antiviral studies, purification of human fibroblast interferon for, **350**: 599-600
- Apes
- signing in, method and interpretation of, **364**: 115-129
- use of symbols by, **364**: 35-59
- Apolipoprotein A, interaction of, with lipid monolayers, **348**: 75-86
- Apolipoprotein A-I interacting with L- α -dimyristoylphosphatidyl choline vesicles, **348**: 318-334
- Apolipoprotein A-II, effect of, on high-density lipoproteins, **348**: 160-173
- Apolipoprotein B, primary structure of, **348**: 87-103

in activating tryptophan hydroxylase by phosphorylating conditions, **356**: 399
in altered catecholamine sensitivity, **356**: 304-318
in calcium regulation, **356**: 43-54
in calcium transport in cardiac sarcoplasmic reticulum preparations, **356**: 267-278
in dopaminergic transmission, **356**: 292-303
in endocytosis, **356**: 429-432
in erythrocyte calcium transport, **356**: 443
in neurotransmitter release and synaptic function, **356**: 92-109
in prostaglandin metabolism, **356**: 179-189
spin-labeled, for studying Ca^{2+} and macromolecular interactions, **356**: 20-32
stimulating Ca^{2+} transport and (Ca^{2+} + Mg^{2+})-ATPase activity, **356**: 387-388
structure and function of, **356**: 374-375
in myosin light chain kinase system, **356**: 413-414
studied by ^1H and ^{113}Cd nuclear magnetic resonance, **356**: 397-398

- tissue levels of, in experimental diabetes, **356: 422**
 tyrosine-138 of, nmr studies on, **356: 433-434**
 Calmodulin-dependence of water permeability in toad bladder, **372: 194-203**
 Calmodulin domains, sequence alignment of, **356: 378-379**
 Calmodulin-mediated phosphorylation of synaptosomal cytosolic proteins, **356: 417-421**
 Calmodulin-regulated NAD kinase in proliferating fibroblasts, **356: 439-440**
 Calmodulin-sensitive adenylate cyclase in adrenal medulla, **356: 402-403**
 Calmodulin-Sepharose chromatography in purification of NAD kinase, **356: 371-373**
 Calmodulin-stimulated phosphodiesterase activity, inhibition of, by neuroleptic drugs, **356: 415-416**
 Calorimetric studies of plasma lipoprotein structure, **348: 335-351**
- cAMP
 and calcium in cell proliferation, **339: 216-240**
 in chloride transport by epithelial cells, **341: 139-155**
 in regulation of proliferation of rat liver cells, **349: 294-311**
 in stimulus-response coupling, **356: 346-353**
 regulation of metabolism of, in Reuber hepatoma cells, **349: 195-209**
- Canada
 assessed risk for carcinogens in, **363: 261-268**
 Western, isolated power plant in oil sands area, particulate emissions from, **338: 434-452**
- Cancer
 breast
 in a rural population, thermography in screening for, **335: 492-500**
 thermography for
 blind reading of, **335: 501-519**
 in mass screening for, **335: 489-491**
 thermopathology of, **335: 383-415**
 xenograft of, in mice, inhibition of growth of, by interferon, **350: 591-592**
 breast tissue in, microwave thermography in, **335: 443-455**
 gastric, prevention of, with vitamins C and E, **355: 278-279**
 generic, regulation of, by OSHA, **363: 21-28**
 in the U.S., economic implications of, **363: 189-204**
 occupational (see Occupational cancer)
 pain clinic for, narcotic drug use in, **362: 161-172**
 spread of, role of transport in, **372: 455-464**
 therapy for
 hyperthermia in, **335: 372-378**
 local perfusion in, heat transfer during, **335: 311-326**
 multistep, hyperthermia in, **335: 356-361**
 radio-frequency, clinical experience with, **335: 362-371**
 thrombophlebitis in patients with, **370: 138-144**
- Carbamylcholine, effect of, on AChR synthesis in myotubes, **377: 189-198**
 Carbene precursor, photosensitive, of phosphatidylcholine, **348: 244-255**
 Carbon dioxide permeability of nephron and luminal fluid acidification, **341: 111-116**
 Carbon dioxide tension
 macro method of determination of, **341: 90-96**
 new method of determination of, **341: 67-76**
 Carbon monoxide
 and water
 homogeneous catalysts for reduction with, **333: 101-106**
 hydroformylation and hydrohydroxymethylation with, **333: 124-140**
 hydrogenation of, **333: 4-57**
 Carbonic anhydrase
 different hypotheses on, **367: 340-355**
 membrane-bound, **341: 246-258**
 Carbonyl compounds, α -halogenmethyl, as inhibitors of factor XIIIa, **370: 836-842**
 Carbonylation
 diene, catalysis of, **333: 264-272**
 methanol, as alternative to chemicals, **333: 58-66**
 Carboxyl-methylase, protein, modifying calmodulin function, **356: 385-386**
 Carcinogenesis, rat liver, and protein synthesis and ultrastructure, **349: 357-372**
 Carcinogens
 comprehensive occupational policy for, **363: 13-20**
 elimination of risk for, in consumer products, **363: 63-78**
 environmental, cost-benefit analysis in regulation of, **363: 109-122**
 metabolism of
 in rat liver cell culture, **349: 247-263**
 liver cell, **349: 228-231**
 practical policy for control of, **363: 79-88**
 regulation of
 dilemma about, **363: 89-98**
 in food, **363: 29-36, 37-42**
 in imprecise world, **363: 217-232**
 risks for
 acceptable levels of, **363: 139-145**
 and Toxic Substances Control Act, **363: 145-166**
 assessment of, **363: 43-48; 49-58; 59-62**
 in Canada, **363: 261-268**
 in United States, **363: 283-294**
 issues of the 1980s in, **363: 295-299**
 law determining acceptability of, **363: 1-12**
 management of
 in industry, **363: 167-172**
 in Norway, **363: 247-254**
 occupational, management of, in Sweden, **363: 255-260**
 uncertainty factor in, **363: 269-282**
- Carcinoma
 hepatocellular, F-type retinoid-binding protein in, **359: 91-103**
 mammary, thermal properties and metabolism of, **335: 1-21**

- Carcinoma cells (see Cells, carcinoma)
- Cardiac function in patients with thalassemia major, **344**: 384-396
- longitudinal study of, **344**: 397-404
- Cardiovascular disease, interactions of copper and zinc in, **355**: 140-151
- Carlyle's use of biological analogy, **360**: 69-84
- Carp (see *Cyprinus carpio*)
- Carrier, titratable, for anion exchange in erythrocytes, **341**: 384-393
- Carrier protein, lactose, of *E. coli*, **358**: 292-306
- Catabolism, monocyte/macrophage-mediated, of fibrinogen and fibrin, **370**: 568-587
- Catalase, natural precursor of, and peroxisome biogenesis, **343**: 293-303
- Catalysis
- asymmetric, chiral ligands in, **333**: 1-15
- enzyme, valence bond calculations of, **367**: 370-382
- hydrocarbon, and organo-molybdenum and -tungsten chemistry, **333**: 229-240
- of diene carbonylation, **333**: 264-272
- phase-transfer, in transition metal chemistry, **333**: 208-224
- Catalyst(s)
- cobalt, in cyclodimerization of olefins, acetylenes, and acyclic dienes, **333**: 273-285
- homogeneous, for reduction with carbon monoxide and water, **333**: 101-106
- organometallic, photoactivation of, **333**: 188-207
- palladium, in natural product synthesis, **333**: 250-263
- polymer-attached optically active, in asymmetric synthesis, **333**: 35-44
- polymer-bound, selectivity effects using, in organic synthesis, **333**: 67-73
- rhodium chiral phosphine, in asymmetric hydrogenations, **333**: 16-22
- stable, tetraphenylborate zwitterionic transition metal complexes as, **333**: 90-100
- Catalytic function of active site amino acid side chains in well-characterized enzymes, **367**: 383-406
- Catastrophes, and responses of long-span bridges to wind action, **352**: 247-264
- Catecholamine sensitivity, altered, role of calmodulin in, **356**: 304-318
- Cation binding, effect of, on $(\text{Ca}^{2+} + \text{Mg}^{2+})$ -ATPase, **358**: 322-323
- Cation fluxes, monovalent, and lymphocyte activation, **339**: 191-200
- Cation specificity for melibiose transport system of *E. coli*, **341**: 465-472
- Cation transport in reconstituted systems, **358**: 64-72
- Cell(s) (see also Erythrocytes; Leukocytes; Lymphocytes and other specific cells)
- A6, epithelia formed in culture by, and adrenal steroid hormones, **372**: 442-454
- animal, production of, in microcarrier culture, **369**: 33-46
- B16F10 melanoma, glycosaminoglycan synthesis in, retinoic-acid-induced changes in, **359**: 322-330
- blood mononuclear, releasing human leukocyte inhibitory cells, **350**: 577-579
- breast cancer, nuclear acceptor sites of, photo-attachment of estrogen receptor to, **346**: 415-418
- carcinoma
- differentiation of, by retinoic acid, **359**: 192-199
- membrane microviscosity changes in, **359**: 398-400
- cerebrospinal fluid mononuclear, in myasthenic patients, ACh binding sites on, **377**: 848-849
- chronically infected murine, synthesis of viral and cellular proteins by, **350**: 629-630
- cortical visual, in cat, visual-vestibular interactions in, **374**: 262-273
- cotton-adherent mononuclear, in suppression of antigen-induced interferon synthesis, **350**: 586
- cultured
- and 1,25-dihydroxyvitamin D_3 , **372**: 502-517
- and evolution of LDL receptor concept, **348**: 48-68
- interaction of, with platelets, **370**: 42-50
- restriction point control in, and leukocyte interferon, **350**: 208-210
- diploid, mass culture of, improved microcarrier for, **369**: 61-64
- Ehrlich ascites
- anion transport in, **341**: 482-493
- interferon-induced mRNA and protein in, **350**: 615-616
- mouse interferon species A from, amino terminal sequence of, **350**: 428-431
- endothelial
- and platelet binding sites for thrombin, **370**: 57-66
- human cultured, thrombin-induced release of adenine nucleotides from, **370**: 51-56
- epidermal (see Epidermal cell lines)
- epithelial
- alkali-cation movements across, **372**: 272-290
- and fibroblast, in rat liver, **349**: 138-152
- and hormone-sensitive ion transport systems in erythrocytes, **372**: 291-309
- chloride transport by, role of bicarbonate ions and cAMP in, **341**: 139-155
- growth and differentiation of, **372**: 354-370
- in mussel gill, calmodulin in, **356**: 423-426
- in rat liver, synthesis of collagen by, **349**: 153-164
- kidney, dome formation in, **372**: 371-383
- plasma membranes of, **341**: 48-56
- epithelioid, cultured monolayers of, fluxes, junctions and blisters in, **372**: 422-441
- erythroleukemia, embryonic hemoglobin synthesis in, **344**: 233-239
- eukaryotic
- nuclear genome of, modified by tumor viruses, **361**: 435-460

- mycoplasma-like Archaeobacterium related to, **361**: 312-324
transition to, from prokaryotic cells, and locked-cell hypothesis, **361**: 376-396
- F-, regulation of, **344**: 219-232
fibroblastoid, interferon in, isolation of, **350**: 376-384
gastric parietal, interacting with K^+ , **358**: 118-137
goblet, in rat intestine, effect of vitamin A on, **359**: 181-191
- hair
directional sensitivity of, to deflection of hair bundles, **374**: 1-10
vestibular type I, and its primary afferent chemical, **374**: 210-214
- HeLa
interferon-induced mRNA and proteins in, **350**: 615-616
interferon-treated, activation of 2'5'-oligo(A) polymerase of, **350**: 607-608
proliferation rate of and cell surface components, **359**: 407-409
- hepatoma
inducibility of different monooxygenase forms in, **349**: 399-400
membrane phenotype in, hormonal regulation of, **349**: 210-220
tyrosine aminotransferase mRNA in, **349**: 183-194
- immobilized whole, in biochemical energy conversion, **369**: 91-98
- infected with MuLV, effects of interferon in, **350**: 301-313
- intact, vasopressin binding to, regulation of, **372**: 92-105
- interferon-treated
discrimination between viral and host mRNA in, **350**: 609-610
inhibition of phosphoprotein phosphatase in, **350**: 605-606
vesicular stomatitis virus released by, **350**: 601-602
- junctional communication in, and growth control, **339**: 39-45
- killer
cytotoxicity by, regulated by interferon, **350**: 63-71
interferon modulating natural activity of, **350**: 55-62
- L-, EMC virus-infected, interferon treated, and 2-5A, **350**: 448-458
- leukemic, effects of fibroblast and leukocyte interferon on, **350**: 628
- liver (see also Cells, hepatoma; Hepatocytes)
carcinogen metabolism of, **349**: 228-321
differentiation of, **349**: 389-390
in mutagenesis studies, **349**: 264-272
in study of retinol-binding protein metabolism, **349**: 221-227; **359**: 171-180
- LLC-PK₁, orientation of epithelia in, and active sugar transport, **372**: 480
- lymphoblastoid, growth inhibition activities on, **350**: 626-627
- lymphoid
effects of interferon on, **350**: 112-120
endotoxin-induced interferon in, **350**: 632
- malaria parasite, effects of photosensitive chemicals on, **346**: 419-433
- mammalian
distinct interferon responses in, **350**: 621-622
heat-induced killing of, time-temperature relationships for, **335**: 234-253
lateral diffusion in plasma membrane of, **339**: 1-7
- mammary tumor, interferon treatment of, **350**: 631
- MDCK
canine kidney, and mammalian cortical collecting tubule, **372**: 384-405
fluxes, junctions and blisters in, **372**: 422-441
microchemical analysis of, and X-ray microscopy, **342**: 288-303
- mouse L, interferons in, antigenic properties of crossprotecting factors in, **350**: 332-338
- natural killer
and interferon and persistent virus infection, **350**: 45-52
augmentation of activity of, by interferon, **350**: 102-111
susceptibility of, to modulation by interferons, **350**: 572
- ovarian carcinoma, sensitivity of, to interferon and other antitumor agents, **350**: 228-244
- parietal
biology of, **341**: 312-334
function of, hormonal regulation of, **372**: 637-642
isolated canine, gastrin binding to, **372**: 649-650
- photodamage to, photoenzyme probes of, **346**: 389-397
- producer, of interferon in the lymphocyte, **350**: 587-588
- rat liver
carcinogen metabolism in, **349**: 247-263
carcinogenesis in, and protein synthesis, **349**: 357-372
metabolism of aryl hydrocarbon hydroxylase in, **349**: 232-245
mutagenesis assay in, genotoxic chemicals in, **349**: 407-408
neoplastic transformation of, **349**: 323-331
markers for, **349**: 312-322, 397-398
regulation of proliferation of, by calcium and cyclic AMP, **349**: 294-311
requirement for methionine in, **349**: 283-293
- red blood (see Erythrocytes)
- retinoblastoma, and retinoid-binding proteins, **359**: 115-134
- retinoid-binding protein in, **359**: 69-78
- Reuber hepatoma, cAMP metabolism and protein synthesis in, **349**: 195-209
- shape of, cytoskeletal element organization in,

- in rat liver, **349**: 138-152
- somatic, in genetic analysis of interferon production and response, **350**: 174-178
- suppressor activity of
- Con A-stimulated, in myasthenia gravis, **377**: 447-454
- in myasthenia gravis, **377**: 436-446
- induced by Con A in blood of myasthenic patients, **377**: 838-839
- T-, regulating anti-AChR antibodies in myasthenia gravis, **377**: 882-883
- 10T1/2, effects of retinoids on, **359**: 218-236
- testicular, response to vitamin A of, **359**: 412-413
- thermosensitivity of, correlated to their malignant potential, **335**: 206-214
- thymic epithelial, identified with antibodies to thymosin α in myasthenia gravis, **377**: 477-485
- transformed, interferon in, cell growth inhibitory and antiviral effects of, **350**: 188-207
- transition of, from prokaryotic to eukaryotic, **361**: 376-396
- tubular, from dog kidney, preparation of, **372**: 468-469
- tumor
- cloned tracheal epithelial, glycoprotein synthesis in, **359**: 410-411
- exposed to hyperthermia, and tissue environmental factors, **335**: 234-253
- metastasis of, role of platelets in, **370**: 101-118
- natural killer activity against, effect of leukocyte interferon on, **350**: 573-574
- Cell adhesion, effects of retinoids on, **359**: 218-236
- Cell biology, parietal, **341**: 312-334
- Cell-derived products (virus and interferon), production of, **369**: 47-60
- Cell differentiation, **339**: 263-264
- control of, **339**: 307-325
- hematopoietic, and interferons, **350**: 279-293
- 3T3-L1, effects of interferon on, **350**: 294-300
- Cell DNA, photodamage to, photoenzyme probes of, **346**: 389-397
- Cell-free synthesis of high molecular weight relaxin-related protein, **343**: 148-154
- Cell-free system, biosynthesis of bovine fibrinogen, prothrombin and albumin in, **343**: 210-217
- Cell fusion, inhibition of, by interferon, **350**: 625
- Cell gene expression, pleiotropic effect on, **339**: 280-306
- Cell growth
- and binding of retinoids to human fibroblast cell lines, **359**: 405-406
- and electrical fields and calcium gradients, **339**: 132-138
- effect of retinoids and phorbol esters on, **359**: 200-217
- Cell growth inhibitory effects of interferons
- and antiviral effects in cloned transformed mouse cells, **350**: 188-207
- effects of concanavalin A on, **350**: 211-227
- Cell interactions in augmentation of human NK activity by interferon, **350**: 102-111
- Cell level, hemoglobin synthesis at, **344**: 189-205
- Cell line
- hepatocarcinoma, membrane characteristics of, **349**: 332-345
- hepatoma, inducibility of different monooxygenase forms in, **349**: 399-400
- J774, effects of trifluoperazine on, **356**: 162-178
- Cell-low-density lipoprotein interaction, **348**: 256-264
- Cell mass formation, material balancing applied to production of, **369**: 167-180
- Cell membranes, dynamics of hormone receptors on, **366**: 274-284
- Cell motility, regulation of, by interferon, **350**: 623-624
- Cell organelles (see Organelles, cellular)
- Cell osmolality regulating water permeability in frog urinary bladder, **372**: 144-162
- Cell phenotype, transformed, vitamin-A-induced modulation of, **359**: 389-390
- Cell populations, electrochemical measurements of, **369**: 321-334
- Cell proliferation
- cAMP and calcium in, **339**: 216-240
- in cultured fibroblasts and monovalent ion fluxes, **339**: 175-190
- Cell regulation of fetal hemoglobin production, **344**: 206-218
- Cell surface, fibronectin in, in rat liver, **349**: 138-152
- Cell surface components of HeLa cells, **359**: 407-409
- Cell surface structures, glycoproteins from, amino acid frequencies in, **361**: 472-480
- Cell suspensions
- fresh, differentiated from fresh or maintained monolayers, **349**: 57-66
- ion flows in, **341**: 56-66
- Cell types in long-term propagable cultures of rat liver, **349**: 128-137
- Cell uptake of retinoic acid, **359**: 420-421
- Celts, Mississippian, and excavations in museums, **376**: 14-34
- Central nervous system
- disorders of, visual-vestibular interaction in, **374**: 764-773
- dysfunction of, modification of saccade by, **374**: 755-763
- involvement of, in myasthenia gravis, **377**: 810-811
- mitogenesis in neurons in, ionically mediated induction of, **339**: 115-131
- Cerebellar ataxia, accuracy of gaze with and with-

- out head movement in, **374**: 579-589
- Cerebellar dysfunction, new neurological test to detect, **374**: 526-531
- Cerebellar flocculus
brain-stem projection to, **374**: 455-464
mossy fiber activation, from visual system, **374**: 476-490
- Cerebrospinal fluid cells in myasthenic patients, ACh binding sites on, **377**: 848-849
- Cervicocollic reflexes, **374**: 395-402
- Chains
 C_γ and A_γ , of hemoglobin F in β^+ thalassemia and related hemoglobinopathies, **344**: 253-261
statistics and dynamics of, luminescence methods in study of, **366**: 1-10
- Chalcogenides, phase transition between supercool liquid and glass in, **371**: 313-314
- Channels (see also *specific channel*)
anion-selective, in outer mitochondrial membrane, **341**: 552-563
chloride conductance, from *Torpedo* electroplax membrane, **341**: 534-551
in bilayers made of rhodopsin-phosphatidylcholine complex, **358**: 337
opening and closing of, in rhodopsin-containing lipid bilayers, **358**: 36-42
transmembrane, produced by complement proteins, **358**: 43-63
- Chaotic behavior in one dimension, **357**: 337-342
- Charismatic leader and violent surrogate family, **347**: 266-276
- Chelation therapy
and transfusion requirement and iron balance in young thalassemic patients, **344**: 409-417
intensive, decreasing iron stores during, **344**: 405-408
- Chelators, new iron, **344**: 425-435
- Chemical(s)
genotoxic, in rat liver cell mutagenesis assay, **349**: 407-408
light-sensitive, to probe protein structure, **346**: 59-77
methanol carbonylation as alternative to, **333**: 58-66
photosensitive (see Photosensitive chemicals)
primary afferent, and transmission to vestibular type I hair cell, **374**: 210-214
- Chemical carcinogens (see Carcinogens)
- Chemical element balance method applied to dichotomous sampler data, **338**: 126-144
- Chemical labeling methods to study red cell anion protein, **341**: 419-432
- Chemistry
of atmospheric aerosols, **338**: 13-25
of the urban aerosol, **338**: 70-85
organo-molybdenum and organo-tungsten, and hydrocarbon catalysis, **333**: 229-240
transition metal, phase-transfer catalysis in, **333**: 208-224
- Chemostat cultures
of *Rhizobium trifolii*, polysaccharide yields in, **369**: 81-90
start-up of, **369**: 245-255
- Chemotaxonomic approaches to cyanobacterial taxonomy and phylogeny, **361**: 397-408
- Child development, effects of fetal blood sampling on, **344**: 165-180
- Child language (see Language, child)
- Children
acquisition of syntax in, **345**: 45-67
and aggression, after film aggression with adult sanction, **347**: 304-318
expression of meaning by, **379**: 172-189
interferon studies in, **350**: 636-637
preschool, aggressive behavior in, and TV viewing, **347**: 289-303
Zambian, linguistic flexibility of, **345**: 97-119
- Chiral ligands in asymmetric catalysis by transition metal complexes, **333**: 1-15
- Chiral phosphine catalysts, rhodium, in asymmetric hydrogenations, **333**: 16-22
- Chlamydomonas reinhardtii*, chloroplast DNA in, **361**: 219-247
- Chloride conductance channel, voltage-dependent, from *Torpedo* electroplax membrane, **341**: 534-551
- Chloride distribution in vertebrate heart and skeletal muscle, **341**: 524-533
- Chloride secretion
by canine tracheal epithelium, hormonal control of, **372**: 558-559
by teleost opercular membrane, and effects of prolactin, **372**: 644-645
hormonal control of, by teleost opercular membrane, **372**: 643
- Chloride secretory systems, cytoskeleton in, and membrane beta-receptors, **372**: 309-331
- Chloride transport
and acidification or alkalization of urine, **341**: 210-224
by epithelial cells, role of bicarbonate ions and cAMP in, **341**: 139-155
in corneal epithelium, **341**: 233-245
mechanisms of, stimulants and inhibitors to study, **341**: 117-124
regulation of, by cyclic nucleotides and calcium, **341**: 156-171
- Chlorinated ethylenes, molecular properties of, **367**: 478-492
- Chloroplast(s)
ancient and modern evolution of, **361**: 154-165
and presumptive and de facto organelles, **361**: 341-355
DCCD-binding proteolipid in proton translocation, **358**: 362-363
evolution of, DNA methylation studies of, **361**: 209-218
intact, in post-translational uptake of cytoplasmically synthesized proteins, **343**: 266-274
of algal groups, evolution of, **361**: 193-208
origin of, and protein and nucleic acid sequences, **361**: 260-272

- Chloroplast DNA in *Chlamydomonas reinhardtii*, **361**: 219-247
- Chloroplast membranes, proton channels in, **358**: 25-35
- Chloroplast protein-synthesizing system, *Euglena*, **361**: 461-471
- Cholesteric plate thermography, **335**: 475-480
- Cholinergic compounds, photoisomerizable, electrophysiologic experiments with, **346**: 475-490
- Cholinesterase activity, motor end-plate, **377**: 852-853
- Cholinesterase inhibitors, effects of, on single-fiber electromyography in myasthenia gravis, **377**: 884-886
- Chromaffin granules, proton and anion transport in, **358**: 354-355
- Chromatid exchange, sister, effects of retinoids on, **359**: 237-250
- Chromatin, maintenance of, during culture of perinatal rat hepatocytes, **349**: 393-396
- Chromatin structure, fluorescence studies on, **366**: 246-252
- Chromatography
 affinity, in Ca-CaM-sensitive dynein ATPase from *Tetrahymena* cilia, **356**: 391-392
 calcium-dependent affinity-based, in isolation of brain protein, **356**: 410-411
 calmodulin-Sepharose, in purification of plant NAD kinase, **356**: 371-373
 concanavalin A-agarose affinity, separating leukocyte interferon components, **350**: 597-598
 high-pressure liquid, in analysis of retinoids, **359**: 422-423
- Chromodynamics, quantum, in large transverse momentum hadron photoproduction, **373**: 8-14
- Chromogenic substrate spectrophotometric assays to measure clotting function, **370**: 812-821
- Chromophores, light-scattering by, at their absorption bands, **366**: 125-139
- Chromosome 16, mouse, sensitivity to interferon and soluble superoxide dismutase to, **350**: 171-173
- Chromosomes, interphase, soft X-ray lithographic studies of, **342**: 304-325
- Circadian rhythms, heterodyne hypothesis for, **361**: 369-375
- Circadian temperature rhythm and tumors in rats, **335**: 22-34
- Circular dichroism, and ribavirin-related derivatives in drug design, **367**: 518-530
- Circularvection in the monkey, **374**: 274-283
- Circus animals, and behavior in context, **364**: 18-25
- Civilian economy, conversion of, to military economy, **368**: 93-102
- Classification of complex situations, formal methods for, **337**: 72-80
- Clever Hans
 feeding of, **364**: 26-34
 phenomenon of
 and cuing and signing among apes, **364**: 60-93
 and dolphin research, **364**: 130-136
 from animal psychologist's point of view, **364**: 1-17
 ultimate enigma of, **364**: 199-205
- Climate and effects of atmospheric aerosols, **338**: 575-587
- Clonal variation of HSV-1, **354**: 291-308
- Cloned DNA and structure for bovine corticotropin- β -lipoprotein precursor protein, **343**: 415-424
- Cloned mRNA, and biosynthesis of proinsulin of carp, **343**: 111-132
- Clonidine HCl, neurobiological implications of, **362**: 191-202
- Clotting enzymes, LMW inhibitors of, in control of blood coagulation, **370**: 757-764
- Clotting factor, vitamin K-dependent, **370**: 311-324
- Clotting function measured by chromogenic substrate spectrophotometric assays, **370**: 812-821
- Coagulant, factor VIII bypassing, **370**: 291-302
- Coagulant-platelet protein interactions in contact activation, **370**: 241-252
- Coagulation
 blood
 enzymes involved in, **370**: 511-527
 pharmacologically controlled by LMW inhibitors of clotting enzymes, **370**: 757-764
 disseminated intravascular (see Intravascular disseminated coagulation)
 revolution in concepts of, **370**: 5-10
 synthetic peptides with affinity for proteases in, **370**: 798-811
- Coagulation cofactor, HMW kininogen as, **370**: 253-260
- Coagulation enzymes, synthetic substrate assays of, **370**: 785-797
- Coagulation factors, humoral substances regulating levels of, **370**: 281-291
- Coagulation inhibitors, natural, assessed in patients, **370**: 708-713
- Coagulopoeitins, **370**: 281-291
- Coal, future use of, effects of, **338**: 563-568
- Cobalt in way to estrone, **333**: 241-249
- Cobalt catalyst in cyclodimerization of olefins, acetylenes, and acyclic dienes, **333**: 273-285
- Cocaine, adverse effects of, **362**: 125-131
- Coding strategies in short-term memory, **340**: 1-8
- Coercion to therapy, legal perspectives on, **347**: 199-208
- Cold, common, epidemiology of, **353**: 54-60

- Collagen synthesis by rat liver epithelial cultures, **349**: 153-164
- Collapse
gravitational, physics of, **336**: 366-379
stellar
and neutrino flow, **336**: 358-367
summary of workshop on, **336**: 395-401
- Colliding beams, nuclear interaction of, in particle storage rings, **357**: 236-248
- Collisions, photon-photon, **373**: 8-14
- Combinatorial problems solved by analytic methods, **337**: 87-96
- Communication
junctional cell-to-cell, and growth control, **339**: 39-45
paranormal, **364**: 297-309
referential, and semiotic function, **364**: 206-219
technological attitude toward, **334**: 125-130
- Community
airborne infection in, prevention and control of, **353**: 331-340
scientific, and the Three Mile Island accident, **365**: 216-221
violent patients in, **347**: 176-184
- Community health service experience and national health service movement in the U.S., **368**: 147-154
- Community stress at Three Mile Island, **365**: 159-174
- Compactification, maximal nondegenerated, of dynamical systems, **357**: 157-168
- Competence to stand trial, **347**: 12-19
- Diagnosis versus description in, **347**: 20-26
- Complex λ and z , iteration of $z \rightarrow \lambda z(1 - z)$ for, **357**: 249-259
- Complex I, photoaffinity labeling in study of, **346**: 244-279
- Compounds, elemental, and sources of airborne pollutants, **338**: 116-125
- Computer applications, trends in development of, **373**: 202-204
- Computer-generated 3-dimensional model of B chain of bovine α -thrombin, **370**: 496-510
- Computer simulation
of glass transition, **371**: 136-150
liquid state, of biomolecular solvation problems, **367**: 108-131
- Computerized tomography, cranial, in spinocerebellar atrophies, **374**: 831-838
- Concanavalin A, effects of, on antiviral and cell growth inhibitory action of human interferons, **350**: 211-227
- Concanavalin A-agarose affinity chromatography separating leukocyte interferon components, **350**: 597-598
- Concanavalin A-induced suppressor cells in blood of myasthenic patients, **377**: 838-839
- Concanavalin A-stimulated suppressor cell activity in myasthenia gravis, **377**: 447-454
- Concrete deck structure in cable-stayed bridges, **352**: 103-122
- Concrete segmental bridges, long-span, **352**: 123-132
- Condensed matter, **336**: 402-408
- Conductance channel, chloride, from *Torpedo* electroplax membrane, **341**: 534-551
- Confinement in gauge theories, **373**: 171-178
- Conformation
of polypeptides in solution studied by novel fluorescence method, **366**: 44-61
protein, prediction of, from primary structure, **348**: 147-159
- Conformational changes, temperature-induced, in Ca- and Mg-dependent ATPase, **358**: 350-353
- Conformational dynamics of tropomyosin in solution, **366**: 285-299
- Conformational properties of nucleic acid structures, **367**: 295-325
- Conformational states, backbone, SCF-MO calculations of, in glassy polymers, **371**: 299-300
- Congenital syndromes in myasthenia gravis, recently recognized, **377**: 614-639
- Congress
and the Three Mile Island nuclear accident, **365**: 114-115
response of, to accident at Three Mile Island, **365**: 210-215
role of, in science and technology policy, **334**: 257-263
- Conjunctival epithelial glycoprotein biosynthesis, vitamin-A-induced changes in, **359**: 358-365
- Consumer products, elimination of risk of carcinogens in, **363**: 63-78
- Contagion, airborne (see Airborne contagion; Airborne infection)
- Contamination, environmental (see Environmental contamination)
- Contour dynamics for Euler equations, **373**: 160-170
- Convection, turbulent, subharmonic route to, **357**: 22-27
- Convection layer, rotating, weakly nonlinear turbulence in, **357**: 28-36
- Conversation
mother-child, and child's acquisition of syntax, **345**: 45-67
progression of, **364**: 160-168
strategy in, **364**: 144-151
- Convex analysis, foundations of, **337**: 103-117
- Cooperativity, negative, in rabbit muscle glyceraldehyde 3-phosphate dehydrogenase, **366**: 217-236
- Coordination, eye-head
and active head rotations, **374**: 540-559
during lateral gaze in labyrinthine disease, **374**: 571-578

- effect of frontal-eye-field lesion on, **374**: 656-673
- vestibular influence on, **374**: 560-570
- Copper**
- cytotoxicity of, and lipid peroxidation, **355**: 240-248
- dietary
- and biologic effects of orally ingested lead, **355**: 298-308
- and cadmium toxicity, **355**: 319-332
- interacting with zinc and iron in mammals, **355**: 130-139
- interacting with zinc in cardiovascular disease, **355**: 140-151
- nutritional interactions of, and thiomolybdate, **355**: 195-207
- Copper-arsenic bronzes from north coast of Peru, **376**: 77-121
- Copper gouges, middle woodland, Mississippian, **376**: 17-34
- Corneal epithelial glycoprotein biosynthesis, vitamin-A-induced changes in, **359**: 358-365
- Corneal epithelium, chloride transport, membrane lipids, and receptors in, **341**: 233-245
- Cortical cells (see Cells, cortical)
- Cortical neurons in the cat, and human psychophysics, **374**: 361-372
- Corticoid hormones, effects of, on mammalian nephron, **372**: 39-55
- Corticosteroids, possible direct effects of, in myasthenia gravis, **377**: 840-841
- Corticotropin- β -lipoprotein precursor protein encoded by cloned DNA, **343**: 415-424
- COS-B**
- for observation of the Milky Way in high-energy gamma rays, **336**: 211-222
- gamma ray astronomy with, **375**: 381-390
- Cosmic background radiation, **336**: 116-124; **375**: 188-209
- ultraviolet, workshop on, **375**: 428-441
- Cosmic rays**
- acceleration of, by shock waves, **375**: 297-313
- and astrophysics, workshop on, **375**: 442-445
- and dynamics of the galaxy, **336**: 223-233
- Cosmological distance scale and Hubble constant, **375**: 90-122
- Cosmological impact of neutrino rest mass, **375**: 32-42
- Cosmology, limits to verification in, **336**: 130-160
- Cost-benefit analysis
- as uncertain guide in public policy, **363**: 173-188
- in regulation of environmental carcinogens, **363**: 109-122
- in regulatory decision-making, **363**: 99-108, 123-128
- alternatives to, **363**: 129-138
- Cotransport mechanisms, thermodynamic efficiency of, **341**: 494-509
- Counterrolling, binocular, in humans with labyrinthectomy, **374**: 69-79
- Courtroom testimony, psychological aspects of, **347**: 27-37
- Crab nebula, **336**: 429-441
- Cracking, fatigue, in longer span bridges, **352**: 193-218
- Cranial computerized tomography in spinocerebellar atrophies, **374**: 831-838
- Creation, song of, **376**: 115
- Creep in metallic glasses, **371**: 218-237
- Crime**
- and media, **347**: 277-334
- and society, and human nature, **347**: 335-348
- Criminal(s) (see Offenders)
- Criminal behavior (see Behavior, criminal)
- Criminal justice system, interface of, with mental health system, **347**: 5-11
- Crisis intervention and hostage negotiation, **347**: 109-156
- Crisis negotiation teams, values and organization in, **347**: 113-116
- Crisis situations, media sharing responsibility during, with the utility, **365**: 116-120
- Cross-linking, photochemical
- between proteins and nucleic acid, **346**: 386-388
- in study of nucleic acid, **346**: 379-385
- δ -crystallin synthesis in embryonic chick lens, **339**: 265-279
- Crystallographic studies of calmodulin, **356**: 14-19, 365-366
- Cues**
- unwitting, for experimental outcomes, **364**: 152-159
- visual motion, and postural control in falling monkey, **374**: 403-411
- Cuing in apes, and the Clever Hans phenomenon, **364**: 60-93
- Culture**
- and nature and ultimate enigma of Clever Hans, **364**: 199-205
- material, activity system approach to, **376**: 325-335
- Cultures**
- chemostat
- of *Rhizobium trifolii*, polysaccharide yields in, **369**: 81-90
- start-up of, **369**: 245-255
- epithelial cell, kidney, dome formation in, **372**: 371-383
- liver, assays of, in classification of hepatocarcinogens, **349**: 273-282
- liver cell
- in mutagenesis studies, **349**: 264-272
- to investigate retinol-binding protein metabolism, **349**: 221-227
- long-term
- of diploid rat hepatocyte, **349**: 165-182
- of normal rat hepatocytes on liver biomatrix, **349**: 70-76
- propagable, of rat liver, **349**: 128-137
- mass, of human diploid cells, improved microcarrier for, **369**: 61-64
- microcarrier, production of animal cells in, **369**: 33-46
- monolayer, of rat hepatocytes, **349**: 385-386

- of perinatal rat hepatocytes, maintenance of chromatic and cytoplasmic enzymes during, **349**: 393-396
- primary
 rat hepatocytes in
 biochemical functions of, **349**: 77-84
 gene expression in, **349**: 99-110
 growth control of, **349**: 111-127
 phenotypic stability of, **349**: 85-98
 primary hepatocyte
 C-reactive protein synthesis by, **349**: 387-388
 DNA repair in, **349**: 404
 hormone responsiveness in, **349**: 383-384
 membrane characteristics of, **349**: 332-345
 rat liver, epithelial and fibroblast cells in, **349**: 138-152
 rat liver epithelial, synthesis of collagen by, **349**: 153-164
- Curare sensitivity in familial myasthenia gravis, **377**: 872-873
- Curare test, systemic, in myasthenia gravis, **377**: 877-878
- Curatorship of anthropological museum collections, **376**: 7-15
- Cyanidium caldarium*, ultrastructural studies of, **361**: 409-425
- Cyanobacterial taxonomy and phylogeny, chemotaxonomic approaches to, **361**: 397-408
- Cyclic nucleotides
 and anti-myasthenic drugs, **377**: 889-890
 effect of, on AChR synthesis in monotubes, **377**: 189-197
- metabolism in
 calcium regulation of, **356**: 205-219
 effects of calcium and calmodulin on, **356**: 369-370
 phosphodiesterase activity in, effect of trifluoperazine on, **356**: 367-368
- Cyclization, end-to-end, of polystyrene probed by intramolecular pyrene excimer formation, **366**: 75-92
- Cyclodimerization, selective homo diels-alder, of olefins, acetylenes, and conjugated acyclic dienes, **333**: 273-285
- Cyprinus carpio*, proinsulin of, biosynthesis of, **343**: 111-132
- Cytochrome c oxidase, yeast, protein precursors in assembly of, **343**: 275-292
- Cytochrome P-450
 drug metabolizing systems of, hepatic, effects of interferon-inducing agents on, **350**: 314-331
 structure, spectra and function of, **367**: 192-218
- Cytochrome system, protonmotive, of mitochondria, **341**: 564-584
- Cytomegalovirus, and genetic variation of viral genomes, **354**: 332-346
- Cytoplasmic disposition of aggregate-carrying membranes during ADH washout in toad bladder, **372**: 212
- Cytoplasmic enzymes (see Enzymes, cytoplasmic)
- Cytoplasmic membrane (see Membrane, cytoplasmic)
- Cytoplasmic proprotein, M13 coat protein as, **343**: 384-390
- Cytoskeleton
 and cell shape in rat liver, **349**: 138-152
 in chloride secretory systems, and membrane beta-receptors, **372**: 309-331
 platelet (see Platelet cytoskeleton)
 role of, in reverse transformation and steroidogenesis induced by interferon, **350**: 254-265
- Cytosol binding of retinyl palmitate and palmitic acid in pigment epithelium and retina, **359**: 427-428
- Cytotoxicity
 aflatoxin B₁, in rat hepatoma cultures, **349**: 401-403
 by natural killer cells and macrophages, regulation of, by interferon, **350**: 63-71
 lymphocyte, interferon-induced enhancement of, **350**: 570-571
 natural killer, interferon augmenting, **350**: 121-129
 of copper and lipid peroxidation, **355**: 240-248
- Dalmation museum collections and settlement pattern studies, **376**: 529-555
- Daniel Deronda*, language of science and psychology in, **360**: 269-298
- Daresbury U.K. Storage Ring, instrumentation and experiments at, **343**: 22-34
- Darwin and landscape, **360**: 85-110
- Data, missing
 among independent variables, linear regression with, **373**: 128-137
 in sample set, **337**: 124-138
- Decay, fluorescence, in vinyl aromatic polymers and copolymers, **366**: 109-124
- Deceleration of nearby galaxies, density of universe from, **375**: 169-177
- Deception
 detection of, **364**: 245-255
 and nonverbal behavior, **364**: 279-290
 mistakes during, **364**: 269-278
 self-, **364**: 220-235
- Decks
 concrete structure of, cable-stayed bridges with, **352**: 103-122
 upper, of George Washington Bridge, replacement of, **352**: 143-156
- Decompositions, Doob-Meyer, for two-parameter stochastic processes, **373**: 205-207
- Defense, insanity, and sentencing discretion, **347**: 185-198
- Defenses, ego, of hostages, and law enforcement policy, **347**: 137-150
- Degrees of freedom, Hamiltonian systems with, Arnold diffusion in, **357**: 119-142

- Deiters' gaze, ascending tract of, **374**: 102-111
- Delinquency, persistent, neuropsychological perspective on, **347**: 349-355
- Delinquents
group treatment of, **347**: 167-175
intervention programs for, **347**: 218-222
- Demyelinating disease and mitogens of myelin origin, **339**: 139-150
- Density of universe from deceleration of nearby galaxies, **375**: 169-177
- Dentate nucleus, role of, in generation of vertical smooth eye movements, **374**: 446-454
- Depolarization, fluorescence, measuring isothermal viscosity variation, **371**: 336-337
- Desert dust, transport of, **338**: 515-532
- Detection of deception, and nonverbal behavior, **364**: 279-290
- Detoxification
after methadone maintenance, **362**: 217-230
short-term, with methadone, **362**: 203-216
- Developing countries, aid to, **334**: 208-216
- Diabetes, experimental, tissue levels of calmodulin in, **356**: 422
- Diagnosis
of myasthenia gravis, validation of, **377**: 583-605
prenatal
of hemoglobinopathies, **344**: 141-150
New England approach to, **344**: 151-164
of β thalassemia, and fetal blood sampling **344**: 165-180
of thalassemia major, in Greece, **344**: 181-188
- Diagnosis versus description in competence to stand trial, **347**: 20-26
- Dibutyl- γ -CAMP in rabbit kidney cortex, and phosphatidate-polyphosphoinositide cycle, **372**: 539-551
- Dichroism, circular, and ribavirin-related derivatives in drug design, **367**: 518-530
- Dickens, Charles, and Victorian dream theory, **360**: 197-216
- Dicoumarol-induced prothrombins, **370**: 426-437
degradation of, with thrombin, **370**: 438-452
- Dictyostelium discoideum*, calmodulin from, **356**: 358-359
- Diels-alder cycloaddimerization of olefins, acetylenes, and acyclic dienes, **333**: 273-285
- Diene carbonylation, catalysis of, **333**: 264-272
- Dienes, conjugated acyclic, cycloaddimerization of, with norbornadiene, **333**: 273-285
- Diethylnitrosamine-treated livers, culture of rat hepatocytes from, **349**: 413
- Differentiability of invariant manifolds, **357**: 322-329
- Differential equations (see Equations, differential)
- Differentiation, cell (see Cell differentiation)
- Diffraction studies, X-ray, of enzyme-other molecule interactions, **367**: 326-339
- Diffusion
in metallic glasses, **371**: 218-237
rotational
of biological macromolecules by delayed luminescence anisotropy, **366**: 176-196
of rhodopsin in membranes, **366**: 265-273
- Diffusion-controlled reactions in solution, rates of, triplet probe study of, **366**: 62-74
- Diffusivity, number dependence of, in small periodic systems, **371**: 338-340
- 1,25-dihydroxyvitamin D_3
as new cultured cell models, **372**: 502-517
liponomic regulation of calcium transport by, **372**: 518-529
- 4,4'-diisothiocyanato-2,2'-stilbene disulfonic acid (DIDS) in inhibition of sarcoplasmic reticulum anion efflux and calcium transport, **358**: 328-331
- Dimension(s)
one
chaotic behavior in, **357**: 337-342
dynamics of, **357**: 343-347
three, plasma transport at, **357**: 223-235
- L- α -dimyristoylphosphatidylcholine vesicles interacting with apolipoprotein A-I, **348**: 318-334
- Dipeptide, solvation of, by water, **367**: 151-161
- Disease(s) (see also specific disease)
acute contagious, and airborne infection, **353**: 35-44
air currents as vector for, **353**: 123-139
associated with Epstein-Barr virus, epidemiology of, **354**: 326-331
autoimmune
role of interferon in, **350**: 21-32
thymosin in treatment of, **377**: 486-495
cardiovascular (see Cardiovascular disease)
demyelinating, and mitogens of myelin origin, **339**: 139-150
interferon-induced, in mice and rats, **350**: 12-20
outbreaks of, and aerosol spread of plant viruses, **353**: 167-173
- Disseminated intravascular coagulation
and hereditary hemorrhagic telangiectasia, **370**: 851-854
clinical and laboratory study of, **370**: 843-850
- Dissociation kinetics of a proflavine-dinucleotide complex, **367**: 250-268
- Distance, measurement of, of extragalactic objects, **375**: 123-156
- Distance scale, cosmological, and Hubble constant, **375**: 90-122
- Disulfonic acid stilbene and anion transport, **341**: 482-493
- Diuretics, "loop," inhibiting anion-dependent $Na^+ + K^+$ cotransport system, **341**: 134-138
- Divers, vestibular and neurologic disorders in, **374**: 839-845
- DNA
animal mitochondrial, mechanisms of evolution in, **361**: 119-134
B-, and Na^+ -B-DNA double helix, solvation model for, **367**: 83-107

- cellular, photodamage to, photoenzyme probes of, **346**: 389-397
- chloroplast, in *Chlamydomonas reinhardtii*, **361**: 219-247
- cloned, encoding structure for bovine corticotropin- β -lipotropin precursor protein, **343**: 415-424
- endogenous retroviral, origin and structure of, **354**: 379-383
- of herpes simplex, and molecular epidemiology, **354**: 279-290
- mitochondrial, studied in *Rattus*, **361**: 135-153
- photoaffinity labeling of, **346**: 355-368
- proflavine binding to, two-step mechanism of, **367**: 240-249
- DNA methylation studies in analysis of chloroplast evolution, **361**: 209-218
- DNA-organelle research, and endocytobiont studies, **361**: 284-297
- DNA synthesis
in primary rat hepatocytes, **349**: 405-406
influence of retinoids on, in mouse epidermis, **359**: 275-280
unscheduled, as DNA repair in hepatocyte primary culture, **349**: 404
- Dolphins, research in
and Clever Hans phenomenon, **364**: 130-136
and porpoise trainers, **364**: 130-136
- Domain structure, matter-antimatter, in universe, **375**: 69-79
- Donations to anthropological museum collections, **376**: 337-344
- Doob-Meyer decompositions for two-parameter stochastic processes, **373**: 205-207
- Dopaminergic transmission, role of calmodulin in, **356**: 292-303
- Double helix, B-DNA and Na⁺-B-DNA, solvation model for, **367**: 83-107
- Double-stranded RNA (see RNA, double-stranded)
- Doubt, quantum model of, **373**: 84-92
- Dream theory, Victorian, and Charles Dickens, **360**: 197-216
- Drift, antigenic, in influenza viruses, **354**: 142-161
- Drug(s)
anti-myasthenic, and cyclic nucleotides, **377**: 889-890
effect of
and intercostal muscle biopsy studies in myasthenia gravis, **377**: 544-566
on post-synaptic membrane of neuromuscular junction, **377**: 519-543
immunosuppressive, in myasthenia gravis, **377**: 691-699, 700-708, 869-871
of abuse
and endogenous reinforcement system, **362**: 60-66
therapeutic uses of, **362**: 173-180
prescription, optimizing therapy with, **368**: 61-66
neuroleptic, in inhibition of calmodulin-stimulated phosphodiesterase activity, **356**: 415-416
Drug abuse, patterns of
international, **362**: 16-21
on East Coast, **362**: 16-21
on East and West coast, **362**: 22-28
Drug action
at neuromuscular junction studied by end-plate current fluctuation analysis, **377**: 879
molecular determinants of, quantum chemical studies on, **367**: 434-451
Drug availability, effect of Drug Regulation Reform Act of 1978 on, **368**: 175-186
Drug design
and theoretical calculations, **367**: 510-517
ribavirin-related derivatives in, and circular dichroism, **367**: 518-530
Drug development, patient's needs in, **368**: 187-202
Drug innovation, and changing health care environment, **368**: 171-174
Drug metabolism in rat hepatocyte suspensions, **349**: 46-56
Drug Regulation Reform Act of 1978, effect of, on clinical research, drug availability, and public health, **368**: 175-186
Duct, endolymphatic (see Endolymphatic duct)
Duffing's equation, explosion of strange attractors exhibited by, **357**: 422-434
Dust, desert, transport of, **338**: 515-532
Dutch syntax, English speakers' acquisition of, **379**: 235-250
Dynamical systems, maximal nondegenerated compactification of, **357**: 157-168
Dynamics
of forced beam, horseshoe in, **357**: 313-321
of vortex lines in superfluid ⁴helium, **337**: 146-160
one-dimensional, **357**: 343-347
- Early universe (see Universe, early)
- Earth
ocular torsion on, **374**: 80-92
rotation of, and propagation of weak nonlinear surface and long ocean waves, **373**: 150-159
Earth-horizontal axis, rotations about, nystagmus produced by, **374**: 40-43
East River (New York), bridges over, performance of, **352**: 133-142
Ecarin related to prothrombin activation, **370**: 453-467
Ecology, nonlinear phenomena in, **357**: 267-281
Economic constraints on health care, **358**: 155-166
Economic growth and technical advances, **334**: 47-57
Economic implications of cancer in the U.S., **363**: 189-204

- Economy
and public policy, **334**: 135-162
conversion of, from military to civilian, **368**:
93-102
- Ecosystems, terrestrial and aquatic, and acid
precipitation, **338**: 540-555
- Edible symbols, and effectiveness of placebos,
364: 256-268
- Egg white proteins (see Proteins, egg white)
- Eggs, sea urchin, ionic triggers in fertilization of,
339: 74-85
- Ego defenses of hostages, and law enforcement
policy, **347**: 137-150
- Ehrlich ascites tumor cells (see Cells, Ehrlich ascites
tumor)
- Einstein observatory, extragalactic X-ray
astronomy with, **375**: 210-234
- Elastomeric liquid crystal film, **335**: 484-488
- Electrical fields and calcium gradients and cell
growth, **339**: 132-138
- Electrical resistance of red cell membrane and
anion transport, **341**: 357-360
- Electrochemical measurements of cell populations,
369: 321-334
- Electrodes, enzyme, applications of, in analysis,
369: 285-294
- Electrogenic proton transport mechanisms, **341**:
1-11
- Electrolyte transport, ileal, neurohumoral control
of, **372**: 571-593
- Electromagnetic field, structure of, in a magneto-
active plasma, **337**: 185-197
- Electromagnetic waves, $0 \leq \omega \leq \omega_L$ in magneto-
plasma, and influence of ions, **373**: 138-
149
- Electromyography, single-fiber, in myasthenia
gravis, effects of cholinesterase inhibitors
and thymectomy on, **377**: 884-886
- Electron beam plasma source, pulsed, of X-rays,
342: 53-64
- Electron correlation in large molecules with many-
body methods, **367**: 62-82
- Electron microscopy, freeze-etching, of serum
lipoproteins, **348**: 352-364
- Electron storage ring
Aladdin, **342**: 35-43
Daresbury U.K., **342**: 22-34
- Electron transport chain, cyclic, of photosynthetic
bacteria, **341**: 12-26
- Electronic structure calculation of large molecules,
potential methods for, **367**: 17-34
- Electrophoresis
microdisc gel, in SDS of material from rat
otoconial complexes, **374**: 808-819
polyacrylamide gel, to identify aldosterone-
induced proteins, **372**: 81-82
- Electrophoretic distribution, F VIII procoagulant,
method for evaluating, **370**: 236-240
- Electrophysiologic analysis of hormonal control of
chloride secretion by canine tracheal epi-
thelium, **372**: 558-559
- Electrophysiologic experiments with photoiso-
merizable cholinergic compounds,
346: 475-490
- Electrophysiologic studies in relatives of patients
with myasthenia gravis, **377**: 606-613
- Electrophysiologic techniques in localization of
aldosterone response in rabbit bladder,
372: 56-63
- Electroplax membrane, *Torpedo*, chloride con-
ductance channel from, **341**: 534-551
- Electrostatic interactions, Langevin distribution
of, spectral effects of, **366**: 140-154
- Electrostatic molecular potential contour maps,
MODPOT/VRDDO/MERGE calcula-
tions on, **367**: 452-477
- Elements
essential trace and ultratrace, interactions be-
tween, **355**: 152-164
toxic, interacting with essential elements, **355**:
282-284
- Eliot, George, and language of science and psy-
chology in *Daniel Deronda*, **360**:
269-298
- Embryonic chick lens, δ -crystallin synthesis and
ion concentrations in, **339**: 265-279
- Embryonic hemoglobin genes, expression of, in
 α -thalassemic and β -duplication mice,
344: 280-283
- Embryonic hemoglobin synthesis in erythroleu-
kemia cells, **344**: 233-239
- Emission-line spectra of active galactic nuclei and
quasars, **336**: 22-38
- Encephalitis virus, St. Louis, variation among
strains of, **354**: 219-237
- Encephalomyocarditis virus-infected L-cells, inter-
feron-treated, occurrence of 2-5A in,
350: 448-458
- Endocytobiont and DNA-organelle research, meth-
odological analogies between, **361**:
284-297
- Endocytosis, role of calmodulin in, **356**: 429-432
- Endolymphatic duct studied with ionic lanthanum,
374: 11-19
- Endolymphatic sac decompression in Ménière's
disease, **374**: 820-830
- Endoplasmic reticulum proteins associated with ri-
bosome binding sites, **343**: 17-33
- β -Endorphin
biosynthesis of, in the rat, **343**: 94-110
common precursor to, signal sequence in, **343**:
79-93
precursor and secretion of, glycosylation in,
343: 79-93
- β -Endorphin/ α -MSH precursor from pars inter-
media, **343**: 443-446
- Endosymbionts, **361**: 369-375
- Endosymbiosis
hypothesis of, molecular approaches to, **361**:
298-311
in green hydra, **361**: 273-283
in plastid origin, **361**: 248-259

and neural activity in nucleus reticularis tegmenti pontis in monkey, **374**: 249-261
compensatory, in lateral- and frontal-eyed animals, **374**: 20-30
horizontal, and reticulovestibular organization, **374**: 130-143
horizontal signals in, in vestibular nuclei neurons in cat, **374**: 144-156
in patients with Wallenberg's syndrome, **374**: 600-613
saccadic, in myasthenia gravis, **377**: 805
vertical smooth, and dentate nucleus and Y-group, **374**: 446-454
- Eye-muscle geometry in lateral-eyed and frontal-eyed animals, **374**: 20-30
- Eye muscles, extraocular, pathways controlling, transsynaptic autoradiographic study of, **374**: 157-170
- Eye-velocity programming in brain-stem disorders, **374**: 774-783
- F-cells (see Cells, F-)
- Fab fragments
anti-AChR, and receptor-rich membrane vesicles, **377**: 846-847
from myasthenic IgG protecting end-plates, **377**: 842-843
- Factor V
inactivation of, in plasma, **370**: 303-310
role of, in assembly of prothrombinase complex, **370**: 378-388
- Factor VII, inactivation of, in plasma, **370**: 303-310
- Factor VIII bypassing coagulant, **370**: 291-302
- Factor VIII procoagulant electrophoretic distribution, agarose gel method of evaluating **370**: 236-240
- Factor VIII/von Willebrand factor, analysis of, and variant von Willebrand's disease subtypes, **370**: 205-209
- Factor IX concentrates, commercial, **370**: 731-746

- Factor X, human, thromboplastin-dependent activation of, **370**: 325-335
- Factor XIIIa, inhibition of, by α -halogenmethyl carbonyl compounds, **370**: 836-842
- Fair play, agreement through, **373**: 93-100
- Familial disorders, lecithin:cholesterol acyltransferase deficiency, and apolipoprotein distribution, **348**: 224-243
- Families
- American, and marital violence and social stress, **347**: 229-250
 - violence-prone, **347**: 251-265
 - violent surrogate, and charismatic leader, **347**: 266-276
- Fans, theory of, and nonsmooth analysis, **373**: 101-112
- Fat-soluble vitamins (see Vitamins, fat soluble)
- Fatigue cracking in longer span bridges, **352**: 193-218
- Feathers, scales into, as effect of retinoic acid in chick, **359**: 394-395
- Federal government, policy of, in biomedical research, **335**: 176-177
- Feeding of oxygen and glucose in ethanol-producing yeast culture, dynamic and steady-state effects of, **369**: 159-166
- Females and the social fabric, Carlyle's use of biological analogy to discuss, **360**: 69-84
- Femininity, psychological dimensions of, and achievement, **340**: 88-101
- FeOCl₂, amine intercalates of, lattice and molecular dynamics of, **373**: 28-36
- Fermentation, continuous anaerobic, process dynamic aspects of, **369**: 135-146
- Fermentation/isolation process, industrial approach to, **369**: 181-186
- Fermentation process, application of microbial sensors to, **369**: 307-320
- Fermi gas, relativistic, magnetic properties of, **373**: 208-210
- Ferrara β^0 thalassemia (see β^0 thalassemia, Ferrara)
- Fertilization of sea urchin eggs, ionic triggers in, **339**: 74-85
- Fetal blood sampling in prenatal diagnosis of β thalassemia, **344**: 165-180
- Fetal hemoglobin production, cellular regulation of, **344**: 206-218
- Fetal studies, bioheat transfer equation in, **335**: 161-172
- Fibrin
- formation, mechanism and regulation of, **370**: 536-544
 - monocyte/macrophage-mediated catabolism of, **370**: 568-587
 - thrombin binding by, mechanism of, **370**: 545-550
- Fibrinogen
- bovine, biosynthesized in cell-free system, **343**: 210-217
 - immunology of, **370**: 528-535
 - monocyte/macrophage-mediated catabolism of, **370**: 568-587
- Fibrinolysis
- molecular aspects of, **370**: 551-567
 - synthetic peptides with affinity for proteases in, **370**: 798-811
- Fibrinopeptide B, human, serologic and cellular immune responses of, **370**: 528-535
- Fibroblast(s)
- binding of retinoids to, and effects on cell growth, **359**: 405-406
 - cultured, cell proliferation in, and monovalent ion fluxes, **339**: 175-190
 - human
 - and leukocyte interferon, effects of, on leukemic cells, **350**: 628
 - dermal, metabolites of retinol in, **359**: 393
 - interferon in
 - and cell growth inhibition activities on lymphoblastoid cells, **350**: 626-627
 - mRNA of, and poly (I) • Poly (C), **350**: 405-412
 - purification of, **350**: 364-373, 599-600
 - purification and amino acid composition of, **350**: 385-389
 - tolerability of, **350**: 374-375
 - interferon-induced protein synthesis in, **350**: 613-614
 - Le interferon production by, **350**: 596
 - producing inhibitor against plasminogen activator, **370**: 609-616
 - membrane microviscosity changes in, induced by retinoids, **359**: 398-400
 - proliferating, NAD kinase in, calmodulin-regulated, **356**: 439-440
 - 3T12, in biosynthesis of mannosidip with metabolite of retinoic acid, **359**: 135-149
- Fibroblast cells (see Cells, fibroblast)
- Fibroblast growth factor and vertebrate regeneration and repair, **339**: 151-174
- Fibroblast plasma membrane vesicles, phosphate ion transport in, **341**: 37-47
- Fibroblastoid cells (see Cells, fibroblastoid)
- Fibronectin, cell surface, in rat liver cultures, **349**: 138-152
- Field
- electromagnetic (see Electromagnetic field)
 - magnetic (see Magnetic field)
- Film, elastomeric liquid crystal, **335**: 484-488
- Film materials in soft X-ray region, **342**: 230-234
- Finite-difference schemes for a Navier-Stokes system, **337**: 118-132
- Fish as models for hemosiderosis, **344**: 336-351
- Flocculus
- cerebellar
 - brain-stem projection to, in cats, **374**: 455-464
 - mossy fiber activation of, **374**: 476-490
 - primate cerebellar, input-output activity of, during visual vestibular interaction, **374**: 491-503

- Flow(s)
 circular Couette, modulation patterns and multiple frequencies in, **357**: 10-21
 in wake of body and near side surface, **337**: 139-145
 ion (see Ion flows; Ion fluxes)
 turbulent
 measures describing, **357**: 1-9
 scaling and structures in, **357**: 368-376
 Fluid transport, proximal tubular, anions regulating, **341**: 125-133
 Fluorescence
 excimer, as molecular probe of polymer-polymer interactions in amorphous solid state, **366**: 387-403
 in flexible macromolecules, **366**: 35-43
 lanthanide ion, as probe of ionomer structure, **366**: 356-372
 protein, new component in, **366**: 237-245
 Fluorescence analyses of interaction of apolipoprotein A-I with L- α -dimyristoylphosphatidylcholine vesicles, **348**: 318-334
 Fluorescence anisotropy in rotational diffusion of biological macromolecules, **366**: 176-196
 Fluorescence decay, multicomponent, in vinyl aromatic polymers and copolymers, **366**: 109-124
 Fluorescence depolarization measuring isothermal viscosity variation, **371**: 336-337
 Fluorescence method, novel, in study of conformation and intramolecular motility of polypeptides, **366**: 44-61
 Fluorescence polarization, solid-state polymers studied by, **366**: 328-340
 Fluorescence probe
 and activation of calmodulin by terbium, **356**: 436
 intrinsic and extrinsic, in study of antibody action, **366**: 208-216
 Fluorescence studies on chromatin structure, **366**: 246-252
 Fluoride metabolism, effects of calcium, phosphorus, magnesium, and aluminum on, **355**: 181-194
 Fluorogenic substrates, use of, for assay of antithrombin III and heparin, **370**: 720-730
 Fluorometry, nanosecond, and luminescence of biological macromolecules, **366**: 197-207
 Fluorophores in polar media, **366**: 140-154
 Fluxes in cultured monolayers of epithelioid cells, **372**: 422-441
 Folic acid interacting with vitamin B₁₂ and thyroxine, **355**: 119-129
 Food
 and nutrition, **334**: 71-79
 regulation of carcinogens in, **363**: 29-36, 37-42
 Foreign language (see Language, foreign)
 Foreign policy (see Policy, foreign)
 Forensic psychology and hostage negotiation, **347**: 109-112
 Formalism, Hirota's bilinear, **373**: 54-67
 Fourier transform infrared spectroscopy of amorphous polymers, **371**: 87-105
 Fractal aspects of iteration of $z \rightarrow \lambda z(1-z)$ for complex λ and z , **357**: 249-259
 Fracture control in welded steel bridges, **352**: 219-228
 Fragments, synthetic apolipoprotein
 in activation of lipoprotein lipase, **348**: 213-223
 phospholipid binding studies with, **348**: 187-211
 Freeze-etching, electron microscopic, of serum lipoproteins, **348**: 352-364
 Freeze-fracture studies in myasthenia gravis, **377**: 38-60
 Frequencies, multiple, in circular Couette flow, **357**: 10-21
 Fresnel shelter, plant remains from, **376**: 387-392
 Fresnel structures, micro, for microscopy of laser-generated bright X-ray sources, **342**: 65-80
 Frog, semicircular canal in, **373**: 31-39
 Fungal spores (see Spores, fungal)
 Fusion reactor wall materials at AFI, surface studies of, **373**: 77-83
 Galactic bulge sources, **336**: 451-478
 Galactic center
 gamma-ray lines from, **336**: 248-266; **375**: 338-346
 positron annihilation radiation from, **375**: 330-337
 Galactic nucleus, **375**: 347-356
 active, emission-line spectra of, **336**: 22-38
 list of papers presented at workshop on, **336**: 113-114
 Galactic X-ray sources, compact, optical counterparts of, **336**: 520-549
 Galaxies
 active
 relativistic jet production and propagation in, **375**: 254-286
 workshop on, **375**: 415-418
 companion, absolute magnitude of quasars near, **336**: 94-112
 distribution of, statistics of, **336**: 161-171
 formation of
 and clustering of, gravitational instability theory of, **336**: 172-190
 summary of workshop on, **336**: 206-210
 theories of, **336**: 191-205
 nearby, deceleration of, and density of universe, **375**: 169-177
 radio, and quasars, **336**: 1-11
 Seyfert, gamma-ray observations with, **336**: 267-277
 Galaxy, dynamics of, and gamma and cosmic rays, **336**: 223-233
 Gamma ray(s)
 and dynamics of the galaxy, **336**: 223-233
 high-energy
 COS-B observations of Milky Way in, **336**: 211-222

- localized sources of, **336**: 234-247
- Gamma ray astronomy with COS-B, **375**: 381-390
- Gamma-ray backgrounds, **375**: 235-254
- extragalactic, and observation of Seyfert galaxies, **336**: 267-277
- Gamma-ray bursts
- high-precision measurements of, **375**: 314-329
- sources of, **375**: 391-402
- Gamma-ray lines from the galactic center, **336**: 248-266; **375**: 338-346
- Gamma-ray observations of Seyfert galaxies, **336**: 267-277
- Gamma-ray transients, **375**: 338-346
- Ganglion, superior cervical, alpha-adrenergic receptors in, **358**: 342-345
- Gas
- absorbing, and absorption-line spectra of quasi-stellar objects, **336**: 39-50
- Lorentz, ergodic and kinetic properties of, **357**: 143-149
- relativistic Fermi, magnetic properties of, **373**: 208-210
- Gasohol, commercial perspective on, **369**: 187-204
- Gastric acid, secretion of, **341**: 259-273
- Gastric cancer (see Cancer, gastric)
- Gastric glands, isolated, ATP metabolism in, **341**: 274-282
- Gastric mucosa, frog, energy production and consumption in, **341**: 283-296
- Gastrin binding to isolated canine parietal cells, **372**: 649-650
- Gastrin interaction with specific receptor in parietal cells, **372**: 637-642
- Gastrin mRNA studied with oligonucleotide probe, **343**: 433-442
- Gauge theories
- confinement and phase transitions in, **373**: 171-178
- non-Abelian, arbitrariness in perturbation series in, **373**: 1-7
- of gravitation, **336**: 299-300
- Gaussian core model, glass transition in, **371**: 335
- Gaussian objects, explosively heated, **373**: 68-76
- Gaze
- Deiters' and horizontal, ascending tract of, **374**: 102-111
- lateral, eye-head coordination during, in labyrinthine disease, **374**: 571-578
- with and without head movement, in cerebellar ataxia, **374**: 579-589
- Gaze-pursuit system investigated by sigma-movement and -nystagmus, **374**: 284-302
- Gaze shift during sinusoidal head and neck rotation, **374**: 590-599
- Gels, denaturing, binding of radio-iodinated calmodulin to proteins on, **356**: 73-74
- Gene(s)
- assignment of, for sensitivity to interferon and soluble superoxide dismutase to mouse chromosome 16, **350**: 171-173
- embryonic hemoglobin, expression of, in α -thalassemic and β -duplication mice, **344**: 280-283
- globin, at molecular level, **344**: 262-279
- α -globin, racial differences in, **344**: 31-40
- β -globin, in β^0 thalassemia, **344**: 12-30
- host, interacting with interferons, in antiviral defense, **350**: 558-565
- in determination of values and ethics, and sociobiology, **368**: 1-16
- interrupted, structure and function of, **354**: 453-465
- mitochondrial, organization and regulation of, **361**: 53-75
- preproinsulin, in the rat, **343**: 425-432
- src, of avian sarcoma viruses, genetic variation and host markers in, **354**: 384-397
- structural, isolated in calmodulin, **356**: 110-118
- viral, pleiotropic effect on, **339**: 280-306
- Gene coding assignments of bunyaviruses and arenaviruses, **354**: 84-106
- Gene control, adenovirus, mechanisms of, **354**: 466-471
- Gene defects in thalassemia, detection of, **344**: 1-11
- Gene expression, regulation of, in primary cultures of rat hepatocytes, **348**: 99-110
- Gene locus, γ related to δ/β , **344**: 73-75
- Gene organization
- globin, in thalassemia, **344**: 48-61
- in the thalassemias, **344**: 41-47
- Gene-protein correlation of immunoglobulin precursors, **343**: 218-231
- Gene structure in yeast, eukaryotic features of, **361**: 105-118
- Genetic analysis, somatic cell, of interferon production and response, **350**: 174-178
- Genetic classification of St. Louis encephalitis virus, **354**: 219-237
- Genetic control
- of autoimmunity to AChR, **377**: 258-277
- of interferon formation, **350**: 179-187
- Genetic determinants in relatives of patients with myasthenia gravis, **377**: 606-613
- Genetic engineering
- and stability of recombinant plasmid, **369**: 1-14
- in agriculture, and *Rhizobium japonicum*, **369**: 15-22
- Genetic engineering manifesto for the genus *Bacillus*, **369**: 23-32
- Genetic variation
- among hepatitis B and related viruses, **354**: 371-378
- among papillomaviruses, **354**: 60-79
- in human influenza viruses, **354**: 135-141
- in src gene of avian sarcoma viruses, **354**: 384-397
- of adenoviruses, **354**: 16-42
- of influenza A viruses studied by recombinant DNA techniques, **354**: 162-171
- of SV40, **354**: 43-52

- of viral genomes, and cytomegalovirus, **354**: 332-346

- Le*, production of, by human fibroblasts, **350**: 596
- leukocyte, and restriction point control in cultured cells, **350**: 208-210
- murine, effect of, on phagocytosis, **350**: 582-583
- native and modified, purification and properties of, **350**: 354-363
- priming by, new protein synthesis requirement for, **350**: 617-620
- priming effect of, on production of endotoxin-induced interferon, **350**: 632
- producer cells of, in the lymphocyte, **350**: 587-588
- production of, **369**: 47-60
- in lymphocytes
 - in abnormal immune function, **350**: 589-590
 - in rheumatoid arthritis, **350**: 575-576
- production and activity of, in children, **350**: 636-637
- production and response of, somatic cell genetic analysis of, **350**: 174-178
- purified leukocyte, growth-inhibitory and antiviral activity of, **350**: 399-404
- recovery by, of mengovirus-induced shutoff of host protein synthesis, **350**: 522-531
- regulating cell motility, **350**: 623-624
- regulating persistent infection, **350**: 545-557
- release of leukocyte inhibitory factor by blood cells in presence of, **350**: 577-579
- responses to
- and mononuclear phagocytes, **350**: 72-90
 - in cultured mammalian cells, **350**: 621-622
- role of
- in immediate hypersensitivity and autoimmune diseases, **350**: 21-32
 - modulating natural killer cell activity, **350**: 55-62
 - regulating cytotoxicity by natural killer cells

- and macrophages, **350**: 63-71
- sensitivity to
- assignment of genes for, **350**: 171-173
 - of human ovarian carcinoma, **350**: 228-244
- species A from Ehrlich ascites tumor cells, amino terminal sequence of, **350**: 428-431
- stabilization of, with rare earth salts, **350**: 593
- type I
- immunoregulatory action of, **350**: 1-11
 - in virus-induced erythroid leukemia, **350**: 364-365
- type II
- properties of, in the mouse, **350**: 145-156
 - spontaneously produced by murine reticulum-cell sarcoma, **350**: 157-167
 - various species of, antigenic relationships among, **350**: 422-427
- Interferon-induced disease in mice and rats, **350**: 12-20
- Interferon-induced enzymes, role of
- in antiviral and antimutagenic effects of interferon, **350**: 459-472
 - in antiviral state, **350**: 497-509
- Interferon-induced mRNA and protein in Ehrlich ascites tumor and HeLa cells, **350**: 615-616
- Interferon-induced synthesis of proteins in human fibroblasts, **350**: 613-614
- Interferon-inducing agents, effects of, on hepatic cytochrome P-450 drug-metabolizing systems, **350**: 314-331
- Interferon induction, minimal, after use of potent inducer, **350**: 568
- Interferon-like substance, tuberculin-induced, **350**: 584-585
- Interferon-mediated inhibition of protein synthesis, **350**: 473-485
- Interferon synthesis, antigen-induced, suppression of, **350**: 586
- Interferon-treated cells (*see* Cells, interferon-treated)
- Interferon-treated EMC virus-infected L-cells, occurrence of 2-5A in, **350**: 448-458
- Interferon treatment of mammary tumor cells, **350**: 631
- Intermittency, and fully developed turbulence, **357**: 359-367
- Interphase chromosomes, soft X-ray lithographic studies of, **342**: 304-325
- Intervention programs for juvenile delinquents, **347**: 218-222
- Intestinal calcium transport, action of vitamin D on, **372**: 481-501
- Intestinal membranes
- basolateral, transport properties of, **372**: 626-636
 - calcium-binding protein in, **372**: 530-539
- Intestine(s)
- ion transport in, effect of enkephalin and somatostatin on, **372**: 594-612
 - small, of bullfrog, chloride transport by epithelial cells in, **341**: 139-155
 - sodium and water absorption in, angiotensin as neuromodulator of, **372**: 646-648
- Intramolecular motility of polypeptides in solution studied by novel fluorescence method, **366**: 44-61
- Inverse scattering, **373**: 54-67
- Ionic channels
- acetylcholine-induced, abnormality of, in myasthenia gravis, **377**: 614-639
 - coupled with nicotinic acetylcholine receptor site, **358**: 239-252
 - single-filing, gramicidin as, **339**: 8-20
- Ionic concentrations in embryonic chick lens, **339**: 265-279
- Ionic events, membrane, and rat liver regeneration, **339**: 201-215
- Ionic flows in cell suspension systems, **341**: 57-66
- Ionic fluxes, monovalent, and cell proliferation in cultured fibroblasts, **339**: 175-190
- Ionic gradients, electrochemical, and active transport, **339**: 53-60
- Ionic influence, and low-frequency electromagnetic waves $0 \leq \omega \leq \omega_L$ in magnetoplasma, **373**: 138-150
- Ionic lanthanum as tracer in study of endolymphatic duct, **347**: 11-19
- Ionic pathways in proteins of sarcoplasmic reticulum, **358**: 138-148
- Ionic selectivity of lobster nerve sodium channels in scybean liposomes, **358**: 336
- Ionic transport
- hormone-sensitive, in erythrocytes, **372**: 291-308
 - in intestinal and respiratory epithelium, effects of serotonin on, **372**: 345-346
 - intestinal, effect of somatostatin and enkephalin on, **372**: 594-612
 - phosphate, in fibroblast plasma membrane vesicles, **341**: 37-47
- Ionic triggers in fertilization of sea urchin eggs, **339**: 74-85
- Ionomer structure probed by lanthanide ion fluorescence, **366**: 356-372
- Ionophoresis, quantitative, at myasthenic rat endplates, **377**: 892
- Ions
- bicarbonate (*see* Bicarbonate ions)
 - in induction of mitogenesis of CNS neurons, **339**: 115-131
- Iron
- abnormal metabolism of, and vitamin A, **355**: 58-61
 - decrease of, during chelation therapy, **344**: 405-408
 - effects of, on cadmium metabolism, **355**: 249-261
 - interacting with copper and zinc in mammals, **355**: 130-139
 - interacting with vitamin C, **355**: 32-44

- metabolic interactions of, with calcium and lead, **255**: 285-297
- Iron balance in young thalassemic patients, **344**: 409-417

- Liponomic regulation of calcium transport by 1,25 (OH)₂D₃, **372**: 518-530
- Lipophilic photoactivable reagents to identify lipid-embedded domains of membrane proteins, **346**: 199-211
- Lipoprotein(s)
high-density
effect of apolipoprotein A-II on structure of, **348**: 160-173
insect, structural studies on, **348**: 431-432
subclasses of, interacting with phospholipid, **348**: 429-430
subfragments 2 and 3, and dynamics of lipid motion, **348**: 299-317
low-density
evolution of concept of receptor in, **348**: 48-68
interaction of, with cell, **348**: 256-264
murein, biosynthesis and assembly of, **343**: 368-383
plasma
biosynthesis and metabolism of, **348**: 16-29
conversions of from low to high density, **348**: 30-47
historical development and nomenclature of, **348**: 1-15
metabolic activity of, and chemically altered apolipoproteins, **348**: 265-280
structure of, calorimetric studies of, **348**: 335-351
X-ray and neutron scattering studies of, **348**: 284-298
serum
freeze-etching electron microscopy of, **348**: 352-364
interacting with human macrophages, **348**: 433-434
synthetic models for, **348**: 365-377
Lipoprotein biosynthesis, avian model of, **348**: 427-428
Lipoprotein complex, yolk, lipid domains in, **348**: 408-418
Lipoprotein lipase, activation of, by synthetic fragments of apolipoprotein C-II, **348**: 213-223
Liposomes
natural, formation of planar membranes from, **358**: 361
soybean
lobster nerve sodium channels in, **358**: 336
nerve membrane sodium channel incorporated into, **358**: 183-203
Liquid(s)
glass-forming, theory of, **371**: 316-317
supercool, and glass, phase transition between, in chalcogenides, **371**: 313-314
Liquid crystal film, elastomeric, **335**: 484-488
Liquid side of glass transition, vibrational theory of, **371**: 328-330
Lithic technology, Ohio Hopewell, micro component of, **376**: 489-528
Lithium chloride, response of toad urinary bladder epithelium to, **372**: 218-219
Lithographic studies, soft X-ray, of interphase chromosomes, **342**: 304-325
Liver
cytochrome P-450 drug-metabolizing systems in, and interferon-inducing agents, **350**: 314-331
rat
diethylnitrosamine-treated, culture of hepatocytes from, **349**: 413
epithelial and fibroblast cells in culture of, **349**: 138-152
epithelial cultures in, collagen synthesis by, **349**: 153-164
long-term propagable cultures of, cell types in, **349**: 128-137
regeneration of, and ionic events at membrane, **339**: 201-215
Liver biomatrix, long-term cultures of rat hepatocytes on, **349**: 70-76
Liver cells (*see Cells, liver; Hepatocytes*)
Liver colony assay for new hepatocyte phenotype, **349**: 373-382
Livestock, feeding antibiotics to, causing antibiotic-resistant bacteria, **368**: 23-60
LLC-PK₁ cells (*see Cells, LLC-PK₁*)
Logic in early child language, **345**: 27-43
"Loop" diuretics inhibiting anion-dependent Na⁺

- + K⁺ cotransport system, **341**: 134-138
- Lorentz gas, ergodic and kinetic properties of, **357**: 143-149

 - in phagocytosis of thalassemic red blood cells, **344**: 314-322
 - interaction of, with prostaglandin effect, **350**: 91-101
 - murine, interferon from, **350**: 413-421
- Macrophage/monocyte-mediated catabolism of fibrinogen and fibrin, **370**: 568-587
- Macular vestibular inputs, responses of vestibulo-spinal neurons to, **374**: 373-394
- Magical thinking in analysis of scientific data, **364**: 236-244
- Magnesium
 - effect of, on fluoride metabolism in man, **355**: 181-194
 - interacting with calcium and parathyroid hormone, **355**: 165-180
- Magnesium-dependent ATPase
 - ATP synthesis by, at constant calcium levels, **358**: 359-360
 - temperature-induced conformational changes in, **358**: 350-353
- Magnesium depletion in thalassemia, **334**: 436-443

- Magnesium-transporting ATPase of sarcoplasmic reticulum, and the membrane, **358**: 149-158
- Magnetic field, evoked, of human brain, **340**: 45-65
- Magnetic properties of relativistic Fermi gas, **373**: 208-210
- Magnetoactive plasma, structure of electromagnetic field in, **337**: 185-197
- Magnetoplasma, extra-low-frequency electromagnetic waves $0 \leq \omega \leq \omega_L$ in, and influence of ions, **373**: 138-149
- Magnetorotational model of supernovae explosions, **336**: 389-394
- Magnitude, absolute, of quasars near companion galaxies, **336**: 94-112
- Malaria parasite cells, effects of photosensitive chemicals on, **346**: 419-433
- Malinger, determination of, **347**: 86-99
- Mammalian cells (see Cells, mammalian)
- Mammalian nervous system (see Nervous system, mammalian)
- Mammary carcinomas (see Carcinomas, mammary)
- Manifolds, invariant, differentiability and continuity of, **357**: 322-329
- Mannolipid containing metabolite of retinoic acid, biosynthesis of, **359**: 135-149
- Mannose, retinyl phosphate as carrier of, in biological membranes, **359**: 345-357
- Mannose disaccharides, formation of, from mannosyl retinyl phosphate, by rat liver membrane enzymes, **359**: 331-344
- Mannosyl retinyl phosphate in formation of α -1,2 and α -3,3-linked mannose disaccharides, **359**: 331-344
- Mappings
 linked twist, and *K*-property, **357**: 65-76
 Lozi, strange attractors for, **357**: 348-358
 of the distribution of particular atomic species, **342**: 268-272
 of the distribution of West African rain-forest monkeys, **376**: 53-63
 quantization of, **357**: 183-202
- Maps, electrostatic molecular potential contour, MODPOT/VRDDO/MERGE calculations on, **367**: 452-477
- Marijuana, adverse affects of, **362**: 119-124
- Marital violence and social stress in American families, **347**: 229-250
- Markers, host, in *src* gene of avian sarcoma viruses, **354**: 384-397
- Masculinity, psychological dimensions of, and achievement, **340**: 88-101
- Mass of the universe, **375**: 157-168
- Material balancing applied to glutamic acid production and cell mass formation, **369**: 167-180
- Materials and minerals, energy policy concerning, **334**: 84-91
- Mathematical models of thermal regulation, **335**: 98-106
- Matter, condensed, **336**: 402-408
- Matter-antimatter domain structure in the universe, **375**: 69-79
- MDCK cells (see Cells, MDCK)
- Meaning, child's expression of, **379**: 172-189
- Measles, spread of, in public school, role of ventilation in, **353**: 25-34
- Measurement of thermal properties of growing tumors, **335**: 67-85
- Mechanics, nonequilibrium statistical, reduced description in, **357**: 150-156
- Mechanism, behavioral, to explain abnormal behavior, **340**: 66-87
- Media
 and crime, **347**: 277-334
 and the President's Commission, during the Three Mile Island accident, **365**: 95-106
 heterogeneous, heat-radiation transfer in, **337**: 167-172
 role of, in Three Mile Island accident, **365**: 123-133
 sharing responsibility with the utility in crisis situations, **365**: 116-120
- Medical complications of alcoholism, **362**: 132-135
- Megakaryocytes, circulating and platelet-forming, studied with scanning electron microscope, **370**: 30-41
- Meizothrombin 1 related to prothrombin activation, **370**: 453-467
- Melanoma of the extremities, hyperthermic perfusion for, **335**: 352-355
- Melanoma cells
 glycosaminoglycan synthesis in, retinoic-acid-induced changes in, **359**: 322-330
 retinoic-acid induced changes in, **359**: 150-170
 α -Melanotropin, biosynthesis of, in the rat, **343**: 94-110
- Melibiose transport system of *E. coli*, cation specificity for, **341**: 456-472
- Membrane(s)
 acetylcholine receptor identified in, **377**: 20-37
 aggregate-carrying, cytoplasmically disposed during ADH washout, **372**: 212
 bilayer (see Bilayer membranes)
 biological, **348**: 391-407
 studied by phospholipids, containing photoactivable groups, **346**: 165-198
 brush border (see Brush border membranes)
 cell (see Cell membranes)
 chloroplast (see Chloroplast membranes)
 cytoplasmic, outer membrane proteins of *E. coli* secreted across, **343**: 362-367
 epithelial cell, cation-alkali movements across, effect of insulin on, **372**: 272-290
 fashions in, **358**: 96-102
 intestinal basolateral, transport properties of, **372**: 626-636
 ionic events at, and rat liver regeneration, **339**: 201-215
 lipid (see Lipid membranes)
 mitochondrial
 glutamate transport across, **341**: 593-608
 inner, and protein precursors, **343**: 275-292

- outer, voltage-dependent anion-selective channel in, **341**: 552-563
- model, rhodopsin in, **358**: 36-43
- nerve (see Nerve membrane)
- pancreatic, protease activities in, and human preplacental lactogen, **343**: 405-414
- planar (see Planar membranes)
- plasma (see Plasma membranes)
- platelet (see Platelet membranes)
- post-synaptic, of neuromuscular junction, effects of drugs and antibodies on, **377**: 519-543
- red cell
- anion transport in, **341**: 361-383
- anion transport protein in, **341**: 419-432
- anion and proton transport and interactions of, **341**: 394-418
- electrical resistance of, and anion transport, **341**: 357-360
- relationship of, and $(\text{Ca}^{2+} + \text{Mg}^{2+})$ -ATPase of sarcoplasmic reticulum, **358**: 149-158
- rotational diffusion of rhodopsin in, **366**: 265-273
- teleost opercular, and hormonal control of chloride secretion, **372**: 643
- chloride secretion by, and prolactin, **372**: 644-645
- in hormonal control of chloride secretion, **372**: 643
- Torpedo* electroplax, chloride conductance channel from, **341**: 534-551
- Membrane assembly, early events in, signal sequences for, **343**: 356-361
- Membrane beta-receptors, and cytoskeleton in chloride secretory system, **372**: 309-331
- Membrane characteristics of primary hepatocyte cultures and stable hepatocarcinoma cell line, **349**: 332-345
- Membrane function and phospholipid methylation, **373**: 51-53
- Membrane lipids in corneal epithelium, **341**: 233-245
- Membrane-mediated events, amplification of translational control by, **339**: 280-306
- Membrane microviscosity induced by retinoids in carcinoma and fibroblast cells, **359**: 398-400
- Membrane permeability and thermal resistance, **335**: 215-233
- Membrane phenotype in hepatoma cells, hormonal regulation of, **349**: 210-220
- Membrane potential
- and rates of lateral diffusion in plasma membrane, **339**: 1-7
- post-tetanic, in single axon and myelinated nerve trunk, **339**: 21-38
- Membrane protein(s)
- intrinsic, photogenerated hydrophobic reagents for, **346**: 45-58
- labeling of, **346**: 144-164
- lipid-embedded domains of, lipophilic photoactivable reagents to identify, **346**: 199-211
- M13 coat protein as, **343**: 384-390
- Membrane protein content of vesicular stomatitis virus released by interferon-treated cells, inhibition of, **350**: 601-602
- Membrane separations in alcohol production, **369**: 367-382
- Membrane shuttle mechanism in antidiuretic hormone action, **372**: 106-117
- Membrane topography, effects of retinoids on, **359**: 218-236
- Membrane vesicles
- cotranslational sequestration of placental lactogens and egg white proteins in, **343**: 192-209
- from *E. coli*, lactose translocation in, **341**: 473-481
- receptor-rich, and anti-AChR Fab fragments, **377**: 846-847
- Memory, short-term, coding strategies in, **340**: 1-8
- Mengovirus-induced shutoff of host protein synthesis, recovery by interferon of, **350**: 522-532
- Ménière's disease
- endolymphatic sac decompression in, **374**: 820-830
- temporal bone characteristics in, **374**: 794-808
- Mental health and criminal justice systems, **347**: 3-11
- Mental health effects of the Three Mile Island nuclear accident on nuclear workers, **365**: 134-145
- Mental patients (see also Psychiatric patients)
- violent released, and the criminal justice system, **347**: 3-11
- Mentally disturbed offenders and insanity defense, **347**: 185-198
- Mepacrine in antagonism of calmodulin, **356**: 441-442
- Mercury
- and selenium compounds, interacting with selenium-selenium compounds, **355**: 347-360
- and silver, interacting with vitamin E and selenium, **355**: 212-226
- interacting with vitamin C, **355**: 262-266
- Mesoscale transport of aerosols, **338**: 379-388
- Metabolic activation of adipocytes by insulin, **372**: 347-351
- Metabolic activity of plasma lipoproteins, and chemically modified apolipoproteins, **348**: 265-280
- Metabolic interactions for lead, calcium and iron, **355**: 285-297
- Metabolic studies, HPLC analysis of retinoids in, **359**: 422-423
- Metabolism
- abnormal, of iron, and vitamin A deficiency, **355**: 58-61

- cadmium, effects of iron and vitamin C on, **355**: 249-261
- calcium and phosphorus, controlled by vitamin D endocrine system, **355**: 1-17
- cAMP, in Reuber hepatoma cells, **349**: 195-209
- carcinogen
in rat liver cell culture, **349**: 247-263
of liver cells, **349**: 228-231
- cyclic nucleotide, effects of calcium and calmodulin on, **356**: 369-370
- lipid, and response of toad bladder to aldosterone, **372**: 30-38
- microbial, application of macroscopic principles to, **369**: 113-134
- of all-*trans* and 13-*cis*-retinoic acid in the hamster **359**: 37-44
- of aromatic retinoid, **359**: 54-68
- of aryl hydrocarbon hydroxylase and benzo[a]pyrene in rat liver cells, **349**: 232-245
- of ATP in isolated gastric glands, **341**: 274-282
- of 13-*cis* retinoic acid by 9000 \times g rat liver supernatant, **359**: 424-426
- of drugs and other foreign compounds in hepatocytes, **349**: 46-56
- of fluoride, effects of calcium, phosphorus, magnesium, and aluminum on, **355**: 181-194
- of lipoproteins, **348**: 16-29
- of mammary carcinomas, influence of blood supply on, **335**: 1-21
- of retinoic acid to 5,6-epoxyretinoic acid, retinoyl- β -glucuronide, and other polar metabolites, **359**: 25-36
- of retinol-binding protein
in liver cells, **359**: 172-180
studied with cultured liver cells, **349**: 221-227
- of α -tocopherol, altered, by low dietary level of retinoic acid, **359**: 387-388
- prostaglandin, role of calmodulin in, **356**: 179-189
- tissue, and thermal dilution methods, **335**: 107-132
- epoxide, of chlorinated ethylenes, **367**: 478-492
- of retinoic acid, mannolipid containing, synthesis of, **359**: 135-149
- of retinol in human dermal fibroblasts, **359**: 393
- polar, metabolism of retinoic acid to, **359**: 25-36
- secondary, from plant tissue culture, **369**: 65-80
- Metal(s)
heavy, polyphosphine complexes of, ^{31}P nmr spectroscopy in, **333**: 141-154
transition (see Transition metals)
- Metal complexes, ligand properties of, quantum chemistry of, **373**: 37-50
- Metallic glasses
creep, diffusion and structural relaxation in, **371**: 218-237
structural relaxation in, **371**: 238-251
- Metalloenzymes, active sites of, **367**: 356-369
- Metalloproteases, gram-negative bacterial, in proteolysis of human fixed washed platelets, **370**: 179-190
- Metastases, tumor cell, role of platelets in, **370**: 101-118
- Metathesis reaction, olefin, stereochemical approach to, **333**: 165-187
- Meteorological effects of rejected heat, **338**: 569-574
- Methadone, short-term detoxification with, **362**: 203-216
- Methadone maintenance
detoxification after, **362**: 217-230
termination of, long-term outcomes after, **362**: 231-238
- Methadyl acetate, clinical status of, **362**: 100-115
- Methanol carbonylation as an alternative to chemicals, **333**: 58-66
- Methionine, elevated requirement for, by transformed rat liver epithelial cells, **349**: 283-293
- Methodology
experimental and theoretical, on glassy state, **371**: xi-xii
for electronic structure calculations of large molecules, **367**: 17-34
quantum mechanical, for large molecules, **367**: 35-58
theoretical, for large molecules, **367**: 1-16
- Methods
analytical
in solving combinatorial problems, **337**: 87-96
of analysis of linear Boolean equations, **337**: 97-102
chemical labeling, to study red cell anion protein, **341**: 419-432
formal, for classification of complex situations, **337**: 72-80
macro, for determination of CO_2 tension, and acidification mechanism, **341**: 90-96
micro, for determination of CO_2 tension, and luminal fluid acidification, **341**: 67-76
numerical, in solidification theory, **337**: 198-204
- Methylation,
DNA, in analysis of chloroplast evolution, **361**: 209-218
of calmodulin, **356**: 412
phospholipid, and membrane function, **373**: 51-53
- Metric analysis of sequence alignment of calmodulin domains, **356**: 378-379
- Metric universal properties of period doubling bifurcations, **357**: 330-336
- Mice, Pavlov's, and study of interpersonal expectancy effects, **364**: 182-198
- Microbial metabolism, macroscopic principles applied to, **369**: 113-134
- Microbial sensors, application of, to fermentation process, **369**: 307-321
- Microbrownian motion in flexible macro-

- molecules, **366**: 35-43
- Microcarrier culture
of human diploid cells, **369**: 61-64
production of animal cells in, **369**: 33-46
- Microorganisms
air-conditioning systems in spread of, **353**: 209-217
airborne (see Airborne microorganisms)
- Microscope
grazing incidence, for X-ray imaging, **342**: 116-129
scanning transmission X-ray (see Scanning transmission X-ray microscope)
soft X-ray, high-power zone plates for, **342**: 94-104
zone plate, in X-ray microscopy of biological specimens, **342**: 368-386
- Microscopic dynamics and macroscopic laws, **373**: 220-233
- Microscopy
of laser-generated bright X-ray sources, micro-Fresnel structures for, **342**: 65-80
X-ray (see X-ray microscopy)
- Microsomal oxidation of retinoic acid in hamster liver, intestine and testis, **359**: 45-53
- Microsomal vesicles, gastric, proton transport by, **341**: 297-311
- Microsomes, oviduct, in processing of precursor proteins, **343**: 180-191
- Microspheres, polystyrene, X-ray microscopy of, **342**: 330-349
- Microtubules, and undulipodia, and *Pillotina* spiracles, **361**: 356-368
- Microvascular contributions in tissue heat transfer, **335**: 137-150
- Microwave(s)
cosmic, **336**: 116-124
background radiation of, **375**: 188-209
in heat transfer, **335**: 327-346
- Microwave thermography (see Thermography, microwave)
- Military economy, conversion of, to civilian economy, **368**: 93-102
- Military systems, human reliability in, **368**: 103-116
- Milky Way, COS-B observation of, in high-energy gamma rays, **336**: 211-222
- Mill (J.S.), Matthew Arnold, and scientific humanism, **360**: 181-196
- Mineralocorticoid agonists and antagonists, binding of, to renal receptor, **372**: 83-84
- Mineralocorticoid effects
on (Na + K)-ATPase in rabbit nephron, **372**: 79-80
on RNA and protein synthesis in MDCK cells, **372**: 470-472
- Minerals and materials, energy policy concerning, **334**: 84-91
- Mirrors
grazing incidence toroidal, X-ray microscope using, **342**: 158-166
X-ray (see X-ray mirrors)
- Mississippian hoes, copper gauges, and celts in museum collections, **376**: 17-34
- Mitochondria
adipose tissue, uncoupling protein of, **358**: 83-95
eukaryotic, originating from protein and nucleic acid sequences, **361**: 92-104
in *Paracoccus* and *Rhodopseudomonas*, **361**: 330-340
localization of specific sites on, fluorescently labeled calmodulin in, **356**: 395-396
protonmotive cytochrome system of, **341**: 564-584
rat liver, calmodulin in, **356**: 427-428
respiration-coupled H⁺ ejection by, **341**: 585-592
two transport proteins from, **358**: 83-95
- Mitochondrial DNA, animal, mechanisms of evolution in, **361**: 119-134
- Mitochondrial DNA polymorphism studied in genus *Rattus*, **361**: 135-153
- Mitochondrial function, photoaffinity labels in study of, **346**: 444-457
- Mitochondrial genes, organization and regulation of, **361**: 53-75
- Mitochondrial membrane
glutamate transport across, **341**: 593-608
inner, and protein precursors, **343**: 275-292
outer, anion-selective channel in, **341**: 552-563
- Mitochondrial phosphate transporter, **358**: 364-367
- Mitochondrial transcription in yeast, eukaryotic features of, **361**: 105-118
- Mitochondrial uncoupler binding site, photoaffinity labeling of, **346**: 434-443
- Mitogen reactivity, and thymic biopsy in myasthenia gravis, **377**: 818-820
- Mitogenesis in CNS neurons, ionically mediated induction of, **339**: 115-131
- Mitogens of myelin origin and demyelinating disease, **339**: 139-150
- Mixing properties of strange attractors, **357**: 453-472
- Models, synthetic, for lipoproteins, **348**: 365-377
- MODPOT/VRDDO/MERGE calculations on large biomedical molecules and electrostatic molecular potential contour maps, **367**: 452-477
- Molecular approaches to endosymbiotic hypothesis, **361**: 298-311
- Molecular aspects
of fibrinolysis, **370**: 551-567
of phototoxicity, **346**: 398-414
of voltage-dependent sodium channel, **358**: 169-182
- Molecular basis
of antigenic variation in the picornavirus, **354**: 202-218
of antiviral activity of interferons, **350**: 432-440
- Molecular behavior in quasi-periodic and stochastic regimes, **357**: 169-182
- Molecular determinants for drug action, quantum

- chemical studies on, **367**: 434-451
- Molecular dissection and acetylcholine receptor in myasthenia gravis, **377**: 110-124
- Molecular dynamics of amine intercalates of FeOCl, **373**: 28-36
- Molecular dynamics simulation of glass transition, **371**: 123-135
- Molecular epidemiology, and structure of herpes simplex virus DNA, **354**: 279-290
- Molecular features that modulate opiate agonist and antagonist activity, quantum chemical studies of, **367**: 219-239
- Molecular heterogeneity of thalassemia syndromes, **344**: 83-100
- Molecular level, globin gene expression at, regulation of, **344**: 262-279
- Molecular mechanisms
in α -thalassemia, **344**: 31-40
of models of myasthenia gravis, **377**: 496-518
of nucleotide-regulated phenomena, photoaffinity probes in study of, **346**: 280-301
- Molecular model for relaxation in glass, **371**: 21-37
- Molecular motion
in glasses, **371**: 252-260
in polymer solid, **371**: 341
- Molecular potential contour maps, electrostatic, MODPOT/VRDDO/MERGE calculations on, **367**: 452-477
- Molecular probe of polymer-polymer interactions, excimer fluorescence as, **366**: 387-403
- Molecular properties of chlorinated ethylenes and their epoxide metabolites, **367**: 478-492
- Molecular sequence data and endosymbiotic origin of plastids, **361**: 248-259
- Molecule(s)
acetylcholine receptor, structure and function of, **377**: 1-19
Ia, and genetic control of autoimmunity to AChR, **377**: 258-277
large
electron correlation in, with many-body methods, **367**: 62-82
electron structure calculations of, **367**: 17-34
MODPOT/VRDDO/MERGE calculations on, **367**: 452-477
quantum mechanical methods for, **367**: 35-58
self-consistent field method for, **367**: 59-61
theoretical methodology for, **367**: 1-16
poly- and dichromatic, in solution, excimer formation in, **366**: 93-108
- Molybdenum (see also Organo-molybdenum)
nutritional interactions of, and thiomolybdates, **355**: 195-207
- Monkeys
rotatory nystagmus in, **374**: 44-55
West African rain-forest, distribution map of, **376**: 53-63
- Monocrystal, absorbing, reflection of X-rays from, **342**: 130-134
- Monocyte/macrophage-mediated catabolism of fibrinogen and fibrin, **370**: 568-587
- Monolayers
fresh or maintained, differentiated from fresh cell suspensions, **349**: 57-66
hepatocyte, phenotypic expression of, **349**: 67-69
lipid (see Lipid monolayers)
rat hepatocytes in, phenotypic stability of, **349**: 85-98
- Mononuclear phagocytes (see Phagocytes, mononuclear)
- Monooxygenase forms, inducibility of, in hepatoma cells lines, **349**: 399-400
- Morphology
and child's expression of meaning, **379**: 172-189
of tumor cells exposed to hyperthermia, **335**: 234-253
- Mossy fiber
activation of, of cerebellar flocculus from visual system, **374**: 476-490
visual, and flocculus of monkey, **374**: 465-475
- Mother-child conversation, and child's acquisition of syntax, **345**: 45-67
- Motion
natural retinal image, origin and change of, **374**: 312-329
visually induced self-, and left-right reversal of vision, **374**: 352-360
- Motion cues, visual, and postural control in falling monkey, **374**: 403-411
- Motion sickness due to vision reversal, **374**: 303-311
- Motivation for achievement and psychological dimensions of masculinity and femininity, **340**: 88-101
- Motives, theory of, phenomenological approach to, **340**: 16-44
- Motor development, gross, influence of labyrinthine hypoactivity on, **374**: 412-420
- Moundville, Alabama, WPA-CCC collections from, **376**: 433-447
- α -MSH/ β -endorphin precursor from pars intermedia, **343**: 443-446
- Mucosa, gastric (see Gastric mucosa)
- Multilingual adults, language-learning styles in, **345**: 73-96
- Multiple regression (see Regression, multiple)
- MuL V, mouse cells infected with, effects of interferon in, **350**: 301-313
- Murein lipoprotein, biosynthesis and assembly of, in *E. coli*, **343**: 368-383
- Muscle(s)
alkali-cation movements across, effect of insulin on, **372**: 272-290
eye (see Eye muscles)
fibers of, recorded in myasthenia gravis, **377**: 835
heart (see Heart muscle)
intercostal, biopsy studies of, in myasthenia gravis, **377**: 544-566

- normal and myasthenic, acetylcholine receptors in, 377: 61-76
- purification of AChR from, 377: 891
- skeletal (see Skeletal muscle)
- smooth

- Organelles
 cellular, universality of energy-coupling principle in, **361**: 1-7
 eukaryotic
 evolutionary theories of, **361**: 1-7
 intraorganism competition involving, **361**: 44-52
 evolution of, **361**: 8-19
 and patterns of enzyme diversity, **361**: 505-510
 presumptive and de facto, and chloroplasts, **361**: 341-355
- Organelle genomes, evolution of, **361**: 20-43
- Organization for Economic Cooperation and Development
 major issues before member countries of, **334**: 58-65

- program of, on long-range transport of air pollutants, **338**: 453-462
- Organometallic catalysts, photoactivation of, **333**: 188-207
- Organometallic compounds, transition metal, radical pathways in, **333**: 80-89
- Organomolybdenum chemistry and hydrocarbon catalysis, **333**: 229-240
- Organotungsten chemistry and hydrocarbon catalysis, **333**: 229-240
- Oriental effects in intra- and intermolecular long-range excitation energy transfer, **366**: 155-175
- Ornithine decarboxylase, inhibition of, and antiproliferative effects of retinoids, **359**: 281-297
- Oscillation, heteroclinic, **357**: 108-119
- Oscillator, degenerate nonlinear, **357**: 473-488
- OSHA (see Occupational Safety and Health Administration)
- Osmolarity, cell, regulating water permeability in frog urinary bladder, **372**: 144-162
- Otoconial complexes, rat microdisc gel electrophoresis in SDS of material from, **374**: 808-819
- Otolithic oculomotor system, **374**: 56-68
- Ouabain binding site of (Na, K)-ATPase, photo-labels to probe, **346**: 90-103
- Oxidation, microsomal, of retinoic acid, **359**: 45-53
- Oxygen, cyclic feeding of, in ethanol-producing yeast culture, **369**: 159-166
- Oxygen binding, theoretical studies of, **367**: 419-433
- Ovaries, carcinoma cells in, sensitivity of, to interferon, **350**: 228-244
- Ozone in power plant plumes, **338**: 276-296
- P**
- Pain
 clinic for, and use of narcotic drugs in cancer, **362**: 161-172
 regulation of **340**: 102-114
- Painlevé-type of ordinary differential equations, **373**: 54-67
- Paleocerebellum, presence or absence of, neck and macular vestibular inputs in, **374**: 373-394
- Paleolithic design structure and broken bones in museum collections, **376**: 35-52
- Paleonutrition, assessment of, from skeletal remains, **376**: 405-416
- Palladium catalysts in natural product synthesis, **333**: 250-263
- Palladium compound, zeroequivalent, alkenes catalyzed by, **333**: 225-228
- Palmitic acid, cytosol binding of, in pigment epithelium and retina, **359**: 427-428
- Panacea phenomenon, and *Scared Straight*, **347**: 213-217
- Pancreas
 bovine, isolation and purification of trypsin from, **269**: 257-263
 canine, calmodulin-binding proteins in, **356**: 358-359
 exocrine, bicarbonate transport in, **341**: 191-209
 Pancreatic membranes, canine, in processing of human preplacental lactogen, **343**: 405-414
 Pancreatic signal peptidase, canine, in processing of presecretory proteins, **343**: 391-404
 Papillomaviruses, genetic variation among, **354**: 60-79
Paracoccus, and establishment of mitochondria, **361**: 330-340
 Paradox, Kauzmann's, and glass transition, **371**: 274-298
Paramecium tetraurelia, calmodulin in, **356**: 408-409
 Paranormal communication, **364**: 297-309
 Parathyroid hormone
 action of, on isolated renal tubules, **372**: 552-557
 and phosphatide-polyphosphoinositide cycle, **372**: 539-551
 biosynthesis of, **343**: 17-33
 interacting with calcium and magnesium, **355**: 165-180
 Parietal cells (see Cells, parietal)
 Parole, role of psychotherapy in, **347**: 157-166
 Pars intermedia, α -MSH/ β -endorphin precursor from, **434**: 443-446
 Particle physics and very early universe, **375**: 54-68
 Particle storage rings, colliding beams in, **357**: 236-248
 Particles, airborne (see Airborne particles)
 Particulate data, multielement, and source information, **338**: 93-102
 Particulates emitted from power plant in Western Canada, **338**: 434-452
 Pathogens, bacterial plant, aerosol dissemination of, **353**: 94-104
 Pathophysiology of thalassemia, **344**: 284-304
 Patient(s)
 areas for care of, *Aspergillus* in, **353**: 140-146
 as offenders, **347**: 157-166
 needs of, in drug development and regulation, **368**: 187-202
 psychiatric (see Psychiatric patients)
 value of the views of, **368**: 17-22
 violent, in the community, **347**: 176-184
 Patterns, modulation, in circular Couette flow, **357**: 10-21
 Pavlov's mice, and study of interpersonal expectancy effects, **364**: 182-198
 Peer review, nonscientist participation in, **368**: 213-228, 229-235
 Penicillamine-induced myasthenia gravis autoantibodies and HLA antigen in, **377**: 372-384
 pathophysiology of, **377**: 640-651
 Pennsylvania, Commonwealth of, emergency preparedness of, during Three Mile Island accident, **365**: 316-322

- Peptidase, pancreatic signal, in processing of pre-secretory proteins, **343**: 391-404
- Peptides
 hydration of, **367**: 132-150
 low molecular weight, in inhibition of serine proteases, **370**: 765-784
 pre- and pro-, specific cleavage of, and prepro-melittin, **343**: 338-346
 synthetic, with affinity for proteases in coagulation and fibrinolysis, **370**: 798-811
- Perception, self-motion, during sinusoidal head and neck rotation, **374**: 590-599
- Percolation theory, recent rigorous results in, **337**: 205-213
- Perfusion
 blood, thermography as indicator of, **335**: 429-437
 hyperthermic, for melanoma of extremities, **335**: 352-355
 local, in cancer therapy, heat transfer during, **335**: 311-326
- Period doubling bifurcations, metric universal properties of, **357**: 330-336
- Periodic orbits, families of, sources and sinks of, **357**: 300-304
- Periodic systems, small, number dependence of pressure and diffusivity in, **371**: 338-340
- Periodicity, noisy, and reverse bifurcation, **357**: 282-291
- Permeability
 CO₂, of nephron and luminal fluid acidification, **341**: 111-116
 membrane, and thermal resistance, **335**: 215-233
- Peroxidation, lipid (see Lipid peroxidation)
- Peroxisomes, biogenesis of, and natural precursor of catalase, **343**: 293-303
- Perturbation series in non-Abelian gauge theories, **373**: 1-7
- Peru, north coast of, copper-arsenic bronzes from, **376**: 77-121
- Pfungst's horse, and interpersonal expectancy effects, **364**: 182-198
- pH, intracellular, early increase in, and metabolic activation of adipocytes by insulin, **372**: 347-351
- Phagocytes, mononuclear, and interferon production, **350**: 72-90
- Phagocytosis
 effect of murine interferon on, **350**: 582-583
 of thalassemic red blood cells, **344**: 314-322
- Pharmacokinetics of an aromatic retinoid, **359**: 54-68
- Pharmacologic control of blood coagulation by LMW inhibitors of clotting enzymes, **370**: 757-764
- Pharmacologic regulation of calmodulin, **356**: 319-345
- Phase-transfer catalysis (see Catalysis, phase-transfer)
- Phase transitions in gauge theories, **373**: 171-178
- Phenanthrenechromium tricarbonyl in catalysis of tricyclo[4.2.2.0^{2,5}]deca-3,9-diene system, **333**: 23-34
- Phenomenological approach to theory of motives, **340**: 16-44
- Phenothiazine-Sepharose conjugates, chromatography on, in isolation of brain protein, **356**: 410-411
- Phenotype(s)
 hepatocyte, liver colony assay for, **349**: 373-382
 membrane, in hepatoma cells, hormonal regulation of, **349**: 210-220
 temperature-sensitive, escape of influenza A virus mutant from, **354**: 172-182
- transformed
 bromodeoxyuridine-induced changes in, **349**: 346-356
 vitamin-A-induced modulation of, **359**: 389-390
- Phenotypic expression in hepatocyte monolayers, **349**: 67-69
- Phenotypic stability of rat hepatocytes in primary monolayer culture, **349**: 85-98
- Phlorizin binding, high-affinity, and solubilization of brush border proteins, **358**: 267-281
- Phonological development, theories of, **379**: 130-137
- Phonological systems, delayed, **379**: 138-143
- Phonological universals in language acquisition, **379**: 110-129
- Phorbol esters, action of, on cell growth, and binding of epidermal growth factor, **359**: 200-217
- Phosphate in erythrocyte calcium transport, **356**: 443
- Phosphate ion transport (see Ion transport, phosphate)
- Phosphate transporter, mitochondrial, **358**: 364-367
- Phosphatidate-polyphosphoinositide cycle in rabbit kidney cortex, **372**: 539-551
- Phosphatidylcholine, nitrene and carbene precursor of, photosensitive, **348**: 244-255
- Phosphatidylcholine exchange protein, identification of lipid binding site with, **348**: 244-255
- Phosphine catalysts, rhodium chiral, in asymmetric hydrogenations, **333**: 16-22
- Phosphodiesterase
 calmodulin-activated
 from vertebrate smooth muscle, **356**: 33-35
 neuroleptic drugs inhibiting, **356**: 415-416
- cyclic nucleotide
 activated by calmodulin, **356**: 190-204
 effect of trifluoperazine on, **356**: 367-368
- Phosphofructokinase, photoaffinity labeling of, with adenosine derivatives, **346**: 31-44
- Phospholipid(s)
 containing photoactivable groups in studies of biological membranes, **346**: 165-198
 interacting with high-density lipoprotein subclasses, **348**: 429-430

- Phospholipid binding studies with synthetic apolipoprotein fragments, **348**: 187-211
- Phospholipid methylation and membrane function, **373**: 51-53
- Phospholipid vesicles, detergent-solubilized adipocyte plasma membranes reconstituted into, **358**: 332-333
- Phosphoprotein phosphatase in interferon-treated cells, inhibition of, by double-stranded RNA, **350**: 605-606
- Phosphorescence anisotropy in rotational diffusion of biological macromolecules, **366**: 176-196
- Phosphorus, effect of, on fluoride metabolism in man, **355**: 181-194
- Phosphorus metabolism, control of, by vitamin D endocrine system, **355**: 1-17
- Phosphorylase kinase, skeletal muscle, calcium control of, **356**: 151-161
- Phosphorylation
and role of calmodulin in activating tryptophan hydroxylase, **356**: 399
calmodulin-mediated, of synaptosomal cytosolic proteins, **356**: 417-421
cardiac sarcoplasmic reticulum, regulated by calmodulin, **356**: 279-291
erythrocyte (Ca^{2+} + Mg^{2+})-ATPase, and calmodulin, **356**: 406-407
of myosin in smooth muscle, **356**: 130-141
reversible, in regulation of myosin light chain kinase, **356**: 142-150
- Photoactivable groups, phospholipids containing, in study of biological membranes, **346**: 165-198
- Photoactivable reagents, lipophilic, to identify lipid-embedded domains of membrane proteins, **346**: 199-211
- Photoactivation of organometallic catalysts, **333**: 188-207
- Photoaffinity labeling
in study of mitochondrial function, **346**: 444-457
in study of ribosomal binding sites for tRNA, **346**: 324-354
in study of structure of Complex I, **346**: 244-279
nitrenes in, **346**: 491-500
of anion transport components in hepatocyte plasma membranes, **346**: 232-243
of DNA, **346**: 368-378
of mitochondrial uncoupler binding site, **346**: 434-443
of phosphofructokinase using adenosine derivatives, **346**: 31-44
retrospective and prospective view of, **346**: 134-143
- Photoaffinity probes
for erythrocyte anion exchange system, NAPTaurine as, **346**: 212-231
in antibody combining region, **346**: 78-89
to study molecular mechanisms of nucleotide-regulated phenomena, **346**: 280-301
- Photoattachment of estrogen receptor to nuclear acceptor sites in breast cancer cells, **346**: 415-418
- Photobiological systems, reactive intermediates involved in, **346**: 1-17
- Photochemical cross-linking
between proteins and nucleic acids to probe nucleoprotein interactions, **346**: 386-388
studies of, in nucleic acid, **346**: 379-385
- Photochemical probes in study of purified acetylcholine receptor preparations, **346**: 458-474
- Photochromism, steady-state polarized, in determination of rotational diffusion of rhodopsin in membranes, **366**: 265-273
- Photocurrents induced on black lipid membranes, **358**: 324-327
- Photodamage to cells and cellular DNA, photoenzyme probes of, **346**: 389-397
- Photodocumentation, art historical, of Iroquoian effigy pipes, **376**: 161-176
- Photoelectronic behavior of glasses during structural relaxation, **371**: 170-185
- Photoenzyme probes of photodamage to cells and cellular DNA, **346**: 389-397
- Photogenerated hydrophobic reagents for intrinsic membrane proteins, **346**: 45-58
- Photoisomerizable cholinergic compounds, electrophysiologic experiments with, **346**: 475-490
- Photolabels to probe ouabain binding site of (Na,K)-ATPase, **346**: 90-103
- Photolabile antibiotics as probes of ribosomal structure, **346**: 302-323
- Photon, soft X-ray, image formation methods with, **342**: 387-391
- Photon correlation spectroscopy of bulk polymers near glass transition temperature, **371**: 326-327
- Photon-photon collision, **372**: 15-21
- Photo-physical processes in organized systems, **366**: 341-355
- Photoproduction, hadron, quantum chromodynamics in, **373**: 8-14
- Photoreists, exposure of, X-ray sources for, **342**: 235-251
- Photosensitive chemicals, effects of, on malaria parasite cells, **346**: 419-433
- Photosensitive nitrene and carbene precursor of phosphatidylcholine, **348**: 244-255
- Photosensitive steroids as probes of estrogen receptor sites, **346**: 18-30
- Photosynthetic bacteria, cyclic electron transport chain of, **341**: 12-26
- Photosynthetic prokaryotes and organelles, **361**: 8-19
- Phototoxicity, molecular aspects of, **346**: 398-414
- Phylogenesis, and ultrastructural studies of *Cyanidium caldarium*, **361**: 409-425
- Phylogeny, cyanobacterial, chemotaxonomic approaches to, **361**: 397-408

- Physical examination and thermography in screening for breast cancer, **335**: 492-500
- Physics
 modern, strange attractors in, **357**: 435-452
 of airborne particles, **353**: 71-80
 of gravitational collapse, **336**: 366-379
 particle (see Particle physics)
- Piagetian analysis of methods of instructing animals, **364**: 60-93
- Picornavirus genome, structure and expression of, **354**: 183-201
- Picornaviruses, antigenic variation of, molecular basis of, **354**: 202-218
- Pictures, use of, in study of Plains Indian history, art and religion, **376**: 247-266
- Picuris syntax, **345**: 147-163
- Piezosemiconductors, anisotropic, acoustic wave instabilities in, **337**: 173-184
- Pigment epithelium, cytosol binding of retinyl palmitate and palmitic acid in, **359**: 427-428
- Pigments, visual, excited-state properties of, **367**: 269-280
- Pillotina* spirochetes, and undulopodia, and microtubules, **361**: 368
- Pipes, Iroquoian effigy, art historical photodocumentation of, **376**: 161-176
- Placebos, effectiveness of, and edible symbols, **364**: 256-268
- Placental lactogen
 cotranslational sequestration of, in membrane vesicles, **343**: 192-209
 mature forms and biosynthetic precursors of, **343**: 155-167
- Placental peptide hormone (see Hormone, placental peptide)
- Placental studies, bioheat transfer equation in, **335**: 161-172
- Plains Indians, art, religion and history of, studied through artifacts and pictures, **376**: 247-266
- Planar membranes, formation of, from natural liposomes, **358**: 361
- Plant microsomal calcium uptake, calmodulin-activated, **356**: 371-373
- Plant remains
 from Fresnel shelter, research potential of, **376**: 387-392
 museum-curated, and origin of agriculture, **376**: 345-356
- Plant tissue culture, production of secondary metabolites from, **369**: 65-80
- Plant viruses (see Viruses, plant)
- Plantar mechanoreceptor, role of, in equilibrium control, **374**: 855-864
- Plants
 bacterial pathogens in, aerosol dissemination of, **353**: 94-104
 calmodulin in, and regulation of NAD kinase, **356**: 119-129
 viruses in, aerosol spread of, **353**: 167-173
- Plasma
 human, pro-C4 of, **343**: 252-265
 magnetoactive, electromagnetic field in, **337**: 185-197
 retinoid-binding proteins in, **359**: 69-78
 retinol-binding protein in, **348**: 378-390
- Plasma apolipoproteins (see Apolipoproteins, plasma)
- Plasma exchange (see Plasmapheresis)
- Plasma lipoproteins (see Lipoproteins, plasma)
- Plasma membrane(s)
 apical and basal-lateral, of epithelial cells, **341**: 48-56
 hepatocyte, anion transport components in, **346**: 232-243
 rates of lateral diffusion in, and membrane potential, **338**: 1-7
 sperm flagellar, (Ca²⁺ + Mg²⁺)-ATPase in, **356**: 382-384
 viiuses that bud from, interferon inhibition of, **350**: 533-544
- Plasma membrane calcium pump and calmodulin, **356**: 232-244
- Plasma membrane vesicles, fibroblast, phosphate ion transport in, **341**: 37-47
- Plasma transport in three dimensions, **357**: 223-235
- Plasmapheresis
 alone, in myasthenia gravis, **377**: 729-743
 and immunosuppression in myasthenic syndrome, **377**: 828-829
 and immunosuppressive drugs in myasthenia gravis, **377**: 869-871
 in myasthenia gravis, **377**: 700-708; 709-724
 from 1978 to 1980, **377**: 725-728
- Plasmid, recombinant, stability of, **369**: 1-14
- Plasmin, thiol ester substrate for, in assay for plasminogen activator, **370**: 617-626
- Plasmin activators, **370**: 588-591
- Plasminogen activation, kinetics of, **370**: 588-591
- Plasminogen activators
 assay for, using thiol ester substrate for plasmin, **370**: 617-626
 inhibitor directed against, produced by human fibroblasts, **370**: 609-616
 multiple molecular weight, production of, **370**: 592-608
- Plastids
 endosymbiotic origin of, **361**: 248-259
 origin and evolution of, **361**: 166-192
- Platelet(s)
 blood, heparin and other sulfated polyanions interacting with, **370**: 662-667
 fixed, washed, proteolysis of, by gram-negative bacterial metalloprotease, **370**: 179-190
 interaction of, with cultured cells, **370**: 42-50
 role of, in tumor cell metastases, **370**: 101-118
 thrombin binding to, high-affinity, **370**: 96-100
 von Willebrand (see von Willebrand platelets)
- Platelet-activating factor (PAF-acether), research on, **370**: 119-137

- Platelet agglutination, von Willebrand factor-supported, **370**: 227-236
- Platelet-aggregating von Willebrand factor, **370**: 191-204
- Platelet binding sites for thrombin, **370**: 57-66
- Platelet-coagulant protein interactions in contact activation, **370**: 241-252
- Platelet cytoskeleton, elucidation of, **370**: 11-21
- Platelet factor 1 and 3 and thrombin generation, **370**: 348-358
- Platelet factor 4, **370**: 668-679
- Platelet-forming megakaryocytes, ultrastructure of, scanning electron microscopic study of, **370**: 30-41
- Platelet membranes
as catalytic surface in thrombin generation, **370**: 348-358
biochemistry and immunology of, and glycoprotein composition, **370**: 72-86
- Platelet reactivity in arthritis, **370**: 22-29
- Platelet-thrombin interaction
and purification of thrombin substrate, **370**: 87-95
hypothetical models for, **370**: 67-71
- Plates, end-
cholinesterase activity in, **377**: 852-853
current fluctuation analysis of, to study drug action at neuromuscular junction, **377**: 879
desensitization to AChR at, in myasthenia gravis, **377**: 567-582
from myasthenic rat, quantitative ionophoresis at, **377**: 892
protected by Fab fragments from myasthenic IgG, **377**: 842-843
- Pleiotropic effect on cellular and viral gene expression, **339**: 280-306
- Plumes
power plant, ozone and aerosols in, **338**: 276-296
Southwestern, visibility-reducing aerosols in, **338**: 233-257
urban
aerosol formation in, **338**: 258-275
over Lake Michigan, **338**: 219-232
over rural monitoring site, **338**: 202-218
review of studies of, **338**: 198-202
sulfate formation in, **338**: 297-308
- Pneumonia, nosocomial, role of airborne bacteria in, **353**: 218-229
- Polar media, fluorophores in, **366**: 140-154
- Polar radiation budget, perturbations of, **338**: 533-539
- Polarization
fluorescence, in study of solid-state polymers, **366**: 328-340
of BL Lac objects, **336**: 55-58
- Policy
for control of carcinogens, **363**: 79-88
for control of occupational carcinogens, **363**: 13-20
foreign, and science and technology, **334**: 187-199
law enforcement (see Law enforcement policy)
public (see Public policy)
regulatory, and industry, **334**: 163-171
science and technology (see Science and technology policy)
- Pollutants, air (see Air pollutants)
- Pollution
air (see Air pollution)
sources of
identified and resolved through factor and cluster analysis, **338**: 103-115
study of multielement particulate data to discover, **338**: 93-102
- Poly ICLC, immune modulating effects of, **350**: 33-41
- Poly (I) • Poly (C)-induced human fibroblast interferon mRNA, **350**: 405-412
- Polyamine, influence of retinoids on, in mouse epidermis, **359**: 275-280
- Polyanions, sulfated, interacting with blood platelet, **370**: 662-667
- Polymer(s)
amorphous, Fourier transform infrared spectroscopy of, **371**: 87-105
bulk
laser light scattering studies of, in glass transition regime, **371**: 186-197
photon correlation spectroscopy of, **371**: 326-327
bulk siloxane, dynamics of, **371**: 301-302
glass transition in, via rotational isomeric model, **371**: 322-323
glassy, backbone conformational states in, **371**: 299-300
high-pressure luminescence probes in, **371**: 261-273
singlet energy transfer in, studied by time-resolved fluorescence spectroscopy, **366**: 11-23
solid-state, studied by fluorescence polarization, **366**: 328-340
synthetic, intramolecular excimer formation in, **366**: 24-34
with aromatic side-groups, energy transfer in films of, **366**: 373-386
- Polymer-bound catalysts
asymmetric synthesis with, **333**: 35-44
selectivity effects using, in organic synthesis, **333**: 67-73
- Polymer compatibility studied by nonradiative energy transfer, **366**: 404-412
- Polymer cyclization, dynamics of, **366**: 75-92
- Polymer-polymer interactions, excimer fluorescence as molecular probe of, **366**: 387-403
- Polymer solid, molecular motions in, **371**: 341
- Polymeric glasses
cross-linked, ultrasonic behavior of, **371**: 308-309

- isothermal enthalpy and density studies of, **371**: 306-307
- pressure-vitrified and mechanically stressed, enthalpy recovery in, **371**: 67-86
- Poly(methyl methacrylate) (PMMA), deformed, transport of alcohols in, **371**: 310-311
- Polymyositis and myasthenic syndrome, **377**: 864-866
- Polysaccharide yields in chemostat cultures of *Rhizobium trifolii*, **369**: 81-90
- Polystyrene
atactic, glass transition temperature varying with pressure in, **371**: 333-334
end-to-end cyclization of, excluded volume effects in, **366**: 75-92
- Polystyrene microspheres, X-ray microscopy of, **342**: 330-349
- Population, rural, screening for breast cancer in, **355**: 492-500
- Pore formation of matrix protein of *E. coli* in planar bilayer membranes, **358**: 13-24
- Porin of *E. coli*, pore formation by, in bilayer, **358**: 13-24
- Pornography and violence against women, **347**: 277-288
- Porpoise trainers, and research in dolphins, **364**: 130-136
- Positron annihilation radiation from galactic center region, **375**: 330-337
- Postsynaptic density, calmodulin in, **356**: 55-72
- Postural dynamics, human, physical model of, **374**: 722-730
- Postural imbalance with head extension, **374**: 636-649
- Potassium-ATPase and proton transport by gastric microsomal vesicles, **341**: 297-311
- Potassium interacting with gastric parietal cells and gastric ATPase, **358**: 118-137
- Potential, membrane (see Membrane potential)
- Pottery, "meaning" of, **376**: 315-323
- Power plant in oil sands area, particulate emissions from, **338**: 434-452
- Power plant plumes (see Plumes, power plant)
- Power spectra and mixing properties of strange attractors, **357**: 453-472
- PPPA(2'P5'A)N
anticellular and antiviral effects of, **350**: 611-612
natural occurrence of in EMC virus-infected L-cells, **350**: 448-458
- Precipitation of acids and their effects on terrestrial and aquatic ecosystems, **338**: 540-555
- Precursor(s)
immunoglobulin (see Immunoglobulin precursors)
 α -MSH/ β -endorphin, from pars intermedia, **343**: 443-446
of catalase, and peroxisome biogenesis, **343**: 293-303
of placental lactogen and growth hormone, **343**: 155-167
photosensitive nitrene and carbene, of phosphatidylcholine, **348**: 244-255
protein, in assembly of yeast cytochrome *c* oxidase, **343**: 275-292
to ACTH and endorphin and glycosylation, **343**: 79-93
signal sequence in, **343**: 79-93
to exopenicillinase of *Bacillus licheniformis* 749/C, **343**: 447
- Precursor protein
bovine corticotropin- β -lipoprotein and cloned DNA, **343**: 415-424
processing of, using oviduct microsomes, **343**: 180-191
- Pregnancy, effects of alcohol and narcotics on, **362**: 136-157
- Prenatal diagnosis
of hemoglobinopathies, **344**: 141-150
New England approach to, **344**: 151-164
of β thalassemia, fetal blood sampling in, **344**: 165-180
of thalassemia major in Greece, **344**: 181-188
- Prepeptide, specific cleavage of, *in vitro*, and pre-promelittin, **343**: 338-346
- Preplacental lactogen
processed by canine pancreatic membranes, **343**: 405-414
processing of, **343**: 168-179
- Preproalbumin, processing of, **343**: 168-179
- Preproinsulin genes, rat, structure of, **343**: 425-432
- Prepromelittin, and specific cleavage of the pre- and propeptide, **343**: 338-346
- Prescription drugs (see Drugs, prescription)
- President's Commission and the media, and the Three Mile Island accident, **365**: 95-106
- Press and nuclear energy, **365**: 107-109
- Prethrombin 2 related to prothrombin activation, **370**: 453-467
- Private sector
and nutrition, **355**: 366-370
initiatives of, and science and technology, **334**: 228-235
- Pro-C4 of human plasma, **343**: 252-265
- Probation, role of psychotherapy in, **347**: 157-166
- Probes
fluorescent (see Fluorescent probes)
of active sites of enzymes, aryl azides as, **346**: 104-114
of estrogen receptor sites, photosensitive steroids as, **346**: 18-31
of nucleoprotein interactions by photochemical cross-linking between proteins and nucleic acids, **346**: 386-388
of ouabain binding site of (Na, K)-ATPase, photolabels as, **346**: 90-103
of protein structure, light-sensitive chemicals as, **346**: 59-77
of ribosomal structure, photolabile antibiotics as, **346**: 302-323
photoaffinity
for erythrocyte anion exchange system, NAP-taurine as, **346**: 211-231

- in antibody combining region, **346**: 78-89
to study molecular mechanisms of nucleotide-regulated phenomena, **346**: 280-301
photochemical, to study acetylcholine receptor preparations, **346**: 458-474
photoenzyme, of photodamage to cells and cellular DNA, **346**: 389-397
Process control, enzyme thermistors for, **369**: 295-306
Process dynamic aspects in continuous anaerobic fermentation, **369**: 135-146
Processing
 enzymatic, of secretory lactoproteins, **343**: 218-231
 of placental peptide hormones by smooth microsomes, **343**: 69-78
 of precursor to exopencillinase of *Bacillus licheniformis* 749/C, **343**: 447
 of pre-proalbumin and pre-placental lactogen, **343**: 168-179
 precursor (see: Precursor processing)
 post-translational, of presecretory proteins with pancreatic signal peptidase, **343**: 391-404
Prochloron, and theory of symbiogenesis, **361**: 325-329
Profile of Nonverbal Sensitivity (PONS), Pygmalion's, and interpersonal expectancy effects, **364**: 182-198
Proflavine binding to DNA, two-step mechanisms of, quantum chemical calculations of, **367**: 240-249
Proflavine-dinucleotide complex, dissociation kinetics of, **367**: 250-268
Programming, integer, and number theory, **373**: 191-201
Proinsulin of carp, biosynthesis of, **343**: 111-132
Prokaryotes, photosynthetic and respiratory, **361**: 8-19
Prokaryotic algae, biosynthesis of storage glucans in, **361**: 426-434
Prokaryotic protein-synthesizing system, **361**: 461-471
Prolactin, effects of, and chloride secretion by teleost opercular membrane, **372**: 644-645
Prolactin secretion in patients with myasthenia gravis, **377**: 880-881
Propeptide, specific cleavage of, *in vitro*, **343**: 338-346
Propranolol in calmodulin antagonism, **356**: 441-442
Proprotein, soluble cytoplasmic, M13 coat protein as, **343**: 384-390
Prostaglandin E₂, pH-dependent, modulating vasopressin in toad bladder, **372**: 180-193
Prostaglandin effect, interaction of, with interferon, macrophage, and lymphocyte tumoricidal activity, **350**: 91-101
Prostaglandin metabolism, role of calmodulin in, **356**: 179-189
Prostaglandin-vasopressin interaction in toad bladder, **372**: 215-217
Prostaglandins interacting with vasopressin in kidneys, **372**: 163-179
Protease activities in canine pancreatic membranes, human preplacental lactogen processed by, **343**: 405-414
Protease inhibitor activity of chemically modified antithrombin III, **370**: 700-707
Protease inhibitors, and proteolysis in thalassemia, **344**: 323-335
Protease-resistant integral brush border membrane proteins, **358**: 253-266
Proteases
 serine, inhibited by LMW peptides, **370**: 765-784
 small synthetic peptides with affinity for, in coagulation and fibrinolysis, **370**: 798-811
Protein(s)
 aldosterone-induced, in toad urinary bladder, **372**: 81-82
 and chloroplast origins, **361**: 260-272
 and nucleic acids, photochemical cross-linking between, **346**: 386-388
 anion transport, in red cell membrane, **341**: 419-432
 antihemophilic/von Willebrand factor, **370**: 210-226
 binding (see Binding protein)
 binding of radio-iodinated calmodulins to, **356**: 73-74
 biosynthesis of, processing mechanisms of, **343**: 1-16
 bovine pancreatic trypsin inhibitor, internal solvent dynamics of, **367**: 162-181
 bovine platelet antiheparin, **370**: 668-679
 brain, isolated using calcium-dependent affinity chromatography, **356**: 410-411
 brush border
 protease-resistant, **358**: 253-266
 solubilization of, **358**: 267-281
 calcium-binding, intestinal membrane, **372**: 530-538
 calmodulin-binding, in canine pancreas, **356**: 358-359
 calmodulin-like, comparative biochemistry of, **356**: 36-42
 complement, in production of transmembrane channels, **358**: 43-63
 cytoplasmically synthesized, post-translational uptake of, **343**: 266-274
 egg white, cotranslational sequestration of, in membrane vesicles, **343**: 192-209
 endoplasmic reticulum, associated with ribosome binding sites, **343**: 17-33
 hepatic binding, voltage-dependent translocation of, **358**: 368-369
 in band 3, and anion transport across red cell membrane, **341**: 361-383
 induced, in insulin-stimulated sodium transport, **372**: 247-271
 interferon-induced, in Ehrlich ascites tumor and HeLa cells, **350**: 615-616
 lactose carrier, of *E. coli*, **358**: 292-306

- M13 coat, three lives of, **343**: 384-390
- matrix, of *E. coli* in bilayer membranes, **358**: 13-24
- membrane
- labeling of, **346**: 144-164
 - lipid-embedded domains of, lipophilic photo-activable reagents to identify, **346**: 199-211
 - of *E. coli*, secreted across cytoplasmic membrane, **343**: 362-367
 - photogenerated hydrophobic reagents for, **346**: 45-58
 - reconstituted into phospholipid vesicles, **358**: 332-333
- of sarcoplasmic reticulum, ion pathways in, **358**: 138-148
- origin of eukaryotic mitochondria from, **361**: 92-104
- phosphatidylcholine exchange, lipid binding site of, identification of, **348**: 244-255
- precursor (see Precursor proteins)
- presecretory, processed with pancreatic signal peptidase, **343**: 391-404
- prothrombin complex, biosynthesis of, **370**: 271-280
- related to sodium transport, aldosterone-induced synthesis of, **372**: 15-29
- relaxin-related, high molecular weight, cell-free synthesis of, **343**: 148-154
- retinoic-acid-binding, in cellular uptake of retinoic acid, **359**: 420-421
- retinoid-binding
- and retinoblastoma cells in culture, **359**: 115-134
 - in hepatocellular carcinoma, **359**: 91-103
 - in plasma and cells, **359**: 69-78
 - of bovine retina, **359**: 104-114
- retinol-binding, **348**: 378-390
- metabolism of
- in liver cells, **359**: 171-180
- studied with cultured liver cells, **349**: 221-227
- plasma, **348**: 378-390
- synaptosomal cytosolic, calmodulin-mediated phosphorylation of, **356**: 417-421
- transport, from mitochondria, **358**: 83-95
- troponin C-like, from eukaryotic organisms, **356**: 1-13
- uncoupling, of brown adipose tissue mitochondria, **358**: 83-95
- viral membrane, synthesis and assembly of, **343**: 319-337
- vitamin-A-binding (see Vitamin-A-binding proteins)
- Protein-bound heparin interacting with antithrombin III, **370**: 708-713
- Protein C, human, **370**: 303-310
- Protein-calcium ion interactions in prothrombin activation, **370**: 366-377
- Protein conformation, prediction of, from primary structure, **348**: 147-159
- Protein dynamics, aspects of, **367**: 407-418
- Protein fluorescence, new component in, **366**: 237-245
- Protein-gene correlation of immunoglobulin precursors, **343**: 218-231
- Protein interactions, platelet-coagulant, in contact activation, **370**: 241-252
- Protein kinase activity and occurrence of 2-5A in interferon-treated EMC virus-infected L-cells, **350**: 448-458
- Protein-lipid interactions in enveloped viruses, **348**: 419-425
- Protein-lipid interface in biological membranes, **348**: 391-407
- Protein M related to prothrombin activation, **370**: 453-467
- Protein precursors in assembly of yeast cytochrome c oxidase, **343**: 275-292
- Protein secretion, early events in, signal sequence for, **343**: 356-361
- Protein solutions, ultrafiltration of, **369**: 355-366
- Protein structure
- and anion transport in red cells, **341**: 433-443
 - in erythrocyte anion transport, **341**: 455-464
 - probe of, with light-sensitive chemicals, **346**: 59-77
- Protein synthesis
- C-reactive, by primary culture of rabbit hepatocyte, **349**: 387-388
 - host, mengovirus-induced shutoff of, **350**: 522-532
 - in MDCK cells, effects of mineralocorticoids on, **372**: 470-472
 - in rat hepatocytes, amino acid control of, **349**: 1-17
 - inhibition of, interferon-mediated, **350**: 473-485
 - interferon-induced, in human fibroblasts, **350**: 613-614
 - modifications in, and rat liver carcinogenesis, **349**: 357-372
 - requirement for, in priming by interferon, **350**: 617-620
 - specific
 - and insulin-stimulated sodium transport, **358**: 334-335
 - in Reuber hepatoma cells, **349**: 195-209
- Protein-synthesizing systems
- evolution of, **361**: 20-43
 - Euglena* chloroplast, **361**: 461-471
- Proteolipid, chloroplast DCCD-binding, active in proton translocation, **358**: 362-363
- Proteolysis
- in replication of animal viruses, **343**: 304-318
 - in thalassemia, and protease inhibitors, **344**: 323-335
 - of human fixed washed platelets by gram-negative bacterial metalloproteases, **370**: 179-190
- Prothrombin
- bovine, biosynthesized in cell-free system, **343**: 210-217

- 'dicoumarol-induced, **370**: 426-437
 - degraded with thrombin, **370**: 438-452
- Prothrombin activation
 - calcium ion-protein interactions in, **370**: 366-377
 - nonenzymic control of, **370**: 336-347
 - related to protein M, ecarin, acutin, meizothrombin 1, and prothrombin 2, **370**: 453-467
- Prothrombin complex concentrates, clinical use of, **370**: 747-756
- Prothrombin complex proteins, biosynthesis of, **370**: 271-280
- Prothrombin conformation and activation in biological fluids, **370**: 389-397
- Prothrombin fragments, human, radioimmunoassay for, **370**: 398-413
- Prothrombin Madrid, **370**: 414-425
- Prothrombinase complex, factor V in assembly of, **370**: 378-388
- Proton channels in chloroplast membranes, **358**: 25-35
- Proton pump, cyclic electron transport chain of photosynthetic bacteria as, **341**: 12-26
- Proton translocation, chloroplast DCCD-binding proteolipid active in, **358**: 362-363
- Proton transport
 - by gastric microsomal vesicles, role of K⁺-ATPase in, **341**: 297-311
 - electrogenic, models for, **341**: 1-11
 - in chromaffin granules, **358**: 354-355
 - in red cell membrane, **341**: 394-418
 - in turtle urinary bladder, **341**: 77-89
 - in yeast, **341**: 494-509
 - transport ATPases in, **341**: 335-356
- Protonmotive cytochrome system of mitochondria, **341**: 564-584
- Protozoa, possible functions of calmodulin in, **356**: 83-91
- Pseudomonas putida*, steroid isomerases from, **346**: 115-130
- Pseudomonas testosteroni*, steroid isomerases from, **346**: 115-130
- Psoralens in labeling of nucleic acids, **346**: 355-368
- PSR 1913 + 13, binary pulsar, measurement of, **336**: 442-446
- Psychiatric patients, right to refuse treatment of, **368**: 119-122
 - behavioral analysis of, **368**: 129-132
- Psychiatrist, perspective of, on the patient, **368**: 123-128
- Psychiatry
 - and assessment of competence to stand trial, **347**: 12-19
 - and opiates and opioid peptides, **362**: 67-75

- Reduction with carbon monoxide and water, homogeneous catalysts for, **333**: 101-106
- Referential communication paradigm, semiotic function underlying, **364**: 206-219
- Reflex, vestibulo-ocular (*see* Vestibulo-ocular reflex)
- Regeneration
in mammalian nervous system, **339**: 102-114
of rat liver, and ionic events at membrane, **339**: 201-215
vertebrate, and fibroblast growth factor, **339**: 151-174
- Regiospecific formations and reactivities of substituted tricarbonylcyclohexadieneiron complexes, **333**: 107-123
- Regiospecific hydrogenation of tricyclo[4.2.2.0^{2,5}]-deca-3,9-diene system, **333**: 23-34
- Regression
linear multivariate, with missing data among independent variables, **373**: 128-137
multiple, for case with error in variables, **373**: 113-127
- Regulation
drug (*see* Drug regulation)
generic cancer, deficiencies in science and policy in, by OSHA, **363**: 21-28
of carcinogens
in food, **363**: 29-36
in imprecise world, **363**: 217-232
of environmental carcinogens, cost-benefit analysis in, **363**: 109-122
- Regulatory activity
and comprehensive occupational carcinogen policy, **363**: 13-20
for carcinogens, dilemma concerning, **363**: 89-98
use of cost-benefit analysis in, **363**: 99-108
- Regulatory agency, reaction of, to Three Mile Island accident, **365**: 257-262
- Regulatory decision-making, cost-benefit analysis in
alternatives to, **363**: 129-138
and public health, **363**: 123-128
- Regulatory policy and industry, **334**: 163-171
- Reinforcement system, endogenous, and drugs of abuse, **362**: 60-66
- Relativistic jet production and propagation in active galaxies, **375**: 254-286
- Relativity
general, **336**: 307-321
isolated systems in, **336**: 279-294
numerical, problems and solutions in, **375**: 1-14
- Relaxation
in glass, molecular model of, **371**: 21-37
structural
in metallic glasses, **371**: 218-237, 238-251
photoelectronic behavior of glasses during, **371**: 170-185
- Relaxation processes at glass transition, **371**: 151-169
- Relaxation rates, viscous and thermal, in amorphous selenium, **371**: 331-332
- Relaxin-related protein, high molecular weight, cell-free synthesis of, **343**: 148-154
- Religion of Plains Indians, artifacts and pictures in study of, **376**: 247-266
- Renal function studied by serum-free hormone-supplemented media, **372**: 406-421
- Renal receptor, binding of mineralocorticoid agonists and antagonists to, **372**: 83-84
- Renal tubules
actions of parathyroid hormone on, **372**: 552-557
inhibitors and anion transport in, **341**: 97-110
secretion and reabsorption of bicarbonate in, **341**: 225-232
- Reovirus genome, structure and function of, **354**: 107-124
- Reovirus hemagglutinin, role of, in viral virulence, **354**: 125-134
- Repair, vertebrate, and fibroblast growth factor, **339**: 151-174
- Replication
of animal viruses, proteolytic events in, **343**: 304-318
of biological material, soft X-rays in, **342**: 288-303
- Research
and development, problems and policy issues concerning, **334**: 47-57
anthropological, collecting now for future of, **376**: 567-573
archaeological (*see* Archaeological research)
bioengineering, priorities in, **335**: 178-179
biomedical, federal government's policy in, **335**: 176-177
clinical, effect of Drug Regulation Reform Act of 1978 on, **368**: 175-186
ethnographic (*see* Ethnographic research)
in aerosols (*see* Aerosols, research in)
in second-language learning, **379**: 251-258
- Research Institute of Physics (AFI), fusion reactor wall materials at, **373**: 77-83
- Research pitfalls as result of restoration of museum specimens, **376**: 229-245
- Research potential of anthropological museum collections, **376**: 1-6
- Resistance, electrical, of red cell membrane, and anion transport, **341**: 357-360
- Resources, renewable, biochemical production of industrial solvents from, **369**: 205-218
- Respiratory failure after thymectomy, **377**: 862-863
- Respiratory prokaryotes and organelles, evolution of, **361**: 8-19
- Restoration of museum specimens as research pitfall, **376**: 229-245
- Reticulovestibular organization participating in generation of horizontal fast eye movement, **374**: 130-143

- Reticulum, sarcoplasmic (see Sarcoplasmic reticulum)
- Reticulum cell sarcoma (see Sarcoma, reticulum cell)
- Retina
- bovine
 - opsin mRNA isolation from, **343**: 347-355
 - retinoid-binding proteins of, **359**: 104-114
 - cytosol binding of retinyl palmitate and palmitic acid in, **359**: 427-428
 - retinoid-binding cells of, **359**: 115-134
 - Retinal image motion, natural, origin and change of, **374**: 312-329
 - Retinoblastoma cells in culture, and retinoid-binding proteins, **359**: 115-134
 - Retinoic acid
 - all-*trans* and 13-*cis*, metabolism of, **359**: 37-44
 - and change of scales into feathers in chick, **359**: 394-395
 - and hypertriglyceridemia, **359**: 391-392
 - cellular and subcellular uptake of, **359**: 420-421
 - 13-*cis*
 - metabolism of, **359**: 424-426
 - orally administered in mice, **359**: 396-397
 - in induction of embryonal carcinoma cell differentiation, **359**: 192-199
 - low dietary levels of, in alteration of α -tocopherol metabolism, **359**: 387-388
 - mannolipid containing metabolite of, biosynthesis of, **359**: 135-149
 - metabolism of, to 5,6-epoxyretinoic acid and retinoyl- β -glucuronide, **359**: 25-36
 - microsomal oxidation of, in hamster, **359**: 45-53
 - Retinoic-acid-induced changes
 - in melanoma cell line, **359**: 150-170
 - of glycosaminoglycan synthesis in B16F10 melanoma cells, **359**: 322-330
 - Retinoid-binding proteins (see Proteins, retinoid-binding)
 - Retinoids
 - action of, on cell growth, and binding of epidermal growth factor, **359**: 200-217
 - antiproliferative effects of, and cell-cycle specific inhibition of ornithine decarboxylase, **359**: 281-297
 - aromatic, metabolism and pharmacokinetics of, **359**: 54-68
 - binding of, to human fibroblast cell lines, **359**: 405-406
 - chemistry of, historical introduction to, **359**: 1-8
 - effect of
 - on malignant transformation, sister chromatid exchanges, and Na,K-ATPase, **359**: 237-250
 - on neoplastic transformation, cell adhesion, and membrane topography, **359**: 218-236
 - HPLC method of analysis of, and metabolic studies, **359**: 422-423
 - in clinical and experimental oncology, **359**: 9-24
 - in human epidermis, **359**: 366
 - in inhibition of human tumor colony formation, **359**: 414
 - in inhibition of preneoplastic progression in epidermal cell lines, **359**: 251-259
 - inducing membrane microviscosity changes in carcinoma and fibroblast cells, **359**: 398-400
 - influence of, on polyamine and DNA synthesis in mouse epidermis, **359**: 275-280
 - modulating effects of tumor promoters in epidermal cell cultures, **359**: 260-274
 - modulating glycosaminoglycan biosynthesis, **359**: 306-321
 - Retinol, metabolites of, in human dermal fibroblasts, **359**: 393
 - Retinol-binding proteins (see Proteins, retinoid-binding)
 - Retinoyl- β -glucuronide, metabolism of retinoic acid to, **359**: 35-36
 - Retinyl acetate, cloned tracheal epithelial cells exposed to, glycoprotein synthesis in, **359**: 410-411
 - Retinyl palmitate, cytosol binding of, in pigment epithelium and retina, **359**: 427-428
 - Retinyl phosphate
 - as carrier of mannose in biological membranes, **359**: 345-357
 - mannosyl, formation of mannose disaccharides from, **359**: 331-344
 - Retrovirus genomes, avian, variation in, **354**: 410-425
 - Reuber hepatoma cells (see Cells, Reuber hepatoma)
 - Reynold's numbers, magnetic, and selective decay hypothesis, **357**: 203-222
 - Rheumatoid arthritis (see Arthritis, rheumatoid)
 - Rhizobium japonicum*, and genetic engineering in agriculture, **369**: 15-22
 - Rhizobium trifolii*, chemostat cultures of, polysaccharide yields in, **369**: 81-90
 - Rhodamine B-labeled thyroid hormone, spectroscopic properties of, **366**: 253-264
 - Rhodium in catalysis of hydroformylation of olefins, **333**: 74-79
 - Rhodium chiral phosphine catalysts, asymmetric hydrogenations with, **333**: 16-22
 - Rhodopseudomonas*, establishment of mitochondria in, **361**: 330-340
 - Rhodopsin
 - in model membranes, **358**: 36-42
 - rotational diffusion of, in membranes, **366**: 265-273
 - Rhodopsin-phosphatidylcholine complex, channel activity in bilayers made from, **358**: 337
 - Ribavirin-related derivatives in drug design, **367**: 518-530
 - Riboflavin interacting with thiamin and other B vitamins, **355**: 80-97
 - Ribosomal binding sites
 - associated with endoplasmic reticulum proteins, **343**: 17-33
 - topology of, shown by photoaffinity labeling, **346**: 324-354
 - Ribosomal structure, photolabile antibiotics as probes of, **346**: 302-323
 - Risk for carcinogens (see Carcinogens, risk for)

- Risk-benefit analysis**
 in assessing risks of cancer, uncertainty factor in, **363**: 269-282
 in federal decision-making on chemical carcinogens, **363**: 233-246
- River, shallow and polluted, nutrient balances in, simulation of, 269**: 219-234
- RNA**
 double-stranded
 and enzymology of interferon action, **350**: 441-447
 and 2'5'-oligo(A) polymerase of interferon-treated HeLa cells, **350**: 607-608
 inhibiting phosphoprotein phosphatase in interferon-treated cells, **350**: 605-606
 in MDCK cells, effect of mineralocorticoids on, **372**: 470-473
 messenger
 and rat growth hormone, biosynthesis of, **343**: 56-68
 cloning of, and biosynthesis of proinsulin in carp, **343**: 111-132
 gastrin, studied with oligonucleotide probe, **343**: 433-442
 β -globin, in Ferrara β^0 thalassemia, **344**: 120-131
 heterogeneity of defects in, in thalassemia syndromes, **344**: 101-112
 human fibroblast interferon, induced by poly (I) • poly (C), **350**: 405-412
 in α_{2u} globulin synthesis in hepatocytes, **349**: 28-45
 interferon-induced, in Ehrlich ascites tumor and HeLa cells, **350**: 615-616
 late, polyadenylation of, in SV40 mutant d1882, **354**: 53-59
 opsin, isolated from bovine retina, **343**: 347-355
 synthesis of, adenovirus, **354**: 1-15
 tyrosine aminotransferase, regulation of, in HTC cells, **349**: 183-194
 viral and host, discrimination between, in interferon treated cells, **350**: 609-610
 transfer, ribosomal binding sites for, studied by photoaffinity labeling, **346**: 324-354
- RNA viruses, evolution of, 354**: 492-498
- Rogers v. Okin**
 ambiguities and possibilities in, **368**: 137-140
 public's reaction to, **368**: 133-136
- Romanticism and science at Trinity College, Cambridge, 360**: 39-68
- Rotation(s)**
 about an earth-horizontal axis, nystagmus produced by, **374**: 40-43
 head, and eye-head coordination, **374**: 540-559
 head and neck, nystagmus, gaze shift and self-motion perception during, **374**: 590-599
 of earth, effect of, on propagation of weak non-linear surface and internal ocean waves, **373**: 150-159
 sinusoidal, vestibular habituation during, **374**: 330-339
- Rotational diffusion**
 of biological macromolecules by luminescence (phosphorescence, fluorescence) anisotropy, **366**: 176-196
 of rhodopsin in membranes seen by polarized photochromism, **366**: 265-273
- Rotational isomeric model, glass transition in polymers via, 371**: 322-323
- Rotatory nystagmus in monkeys, 374**: 44-55
- Rule, statistical decision, and missing data in sample set, 337**: 124-138
- Rural population, screening for breast cancer in, thermography for, 335**: 492-500

 - proteins related to, aldosterone-induced synthesis of, **372**: 15-29

- transepithelial, stimulation of insulin by, **372**: 220-234
- Solidification of lamellar eutectics, stability in solidification of, **373**: 179-182
- Solidification theory, numerical methods in, **337**: 198-204
- Solutions, protein, ultrafiltration of, **369**: 355-366
- Solvation of a dipeptide by water, **367**: 151-161
- Solvation model for B-DNA and Na⁺-B-DNA double helix at 300° K, **367**: 83-107
- Solvation problems, biomolecular, liquid state computer simulation of, **367**: 108-131
- Solvent dynamics, internal, of BPTI protein, and hydrogen bond, **367**: 162-181
- Solvents, industrial, biochemical production of, **269**: 205-218
- Somatic cell (see Cells, somatic)
- Somatostatin
effect of, on ion transport in intestines, **372**: 594-612
modulating vasopressin in toad bladder, **372**: 180-193
- Southwestern United States (see United States, Southwestern)
- Soybean liposomes (see Liposomes, soybean)
- Spacecraft assembly areas, sampling airborne microorganisms in, **353**: 241-254
- Specimens, wet or thick, and X-ray microscopy, **342**: 268-272
- Spectra (see also Spectrum)
absorption-line, of quasi-stellar objects, **336**: 39-50
emission-line, of active galactic nuclei and quasars, **336**: 22-38
of cytochrome P450, **367**: 192-218
of X-ray binaries, iron lines in, **336**: 566-578
power, of strange attractors, **357**: 453-472
X-ray, of accreting degenerate stars, **336**: 520-549
- Spectral effects of the Langevin distribution of electrostatic interactions, **366**: 140-154
- Spectrophotometric assays, chromogenic substrate, to measure clotting function, **370**: 812-821
- Spectroscopic properties of rhodamine B-labeled thyroid hormone, **366**: 253-264
- Spectroscopy
Fourier transform infrared, of amorphous polymers, **371**: 87-105
nuclear magnetic resonance (see Nuclear magnetic resonance spectroscopy)
photon correlation, of bulk polymers near glass transition temperature, **371**: 326-327
time-resolved fluorescence, in study of singlet energy transfer in polymers, **366**: 11-23
X-ray, artificial microstructures for, **342**: 203-212
- Spectrum
energy, of the universe, **336**: 125-129
for a route to turbulence, **357**: 330-336
- Speech, fluent, perception of, by children and adults, **379**: 92-109
- Sperm flagellar plasma membranes, (Ca²⁺ + Mg²⁺)-ATPase in, **356**: 382-384
- Spermatozoa, mammalian, localization of calmodulin in, **356**: 393-394
- Spin labeling of calmodulin in study of Ca²⁺ and macromolecular interactions, **356**: 20-32
- Spinocerebellar atrophies, cranial computerized tomography in, **374**: 831-838
- Spiro Mound, Oklahoma, analysis of textiles from, **376**: 123-139
- Spiroplasmas, airborne spread of, **353**: 179-185
- Spleen, irradiation of, in myasthenia gravis, **377**: 744-754
- Spores, fungal, aerial dissemination of, **353**: 116-122
- src Gene
of avian sarcoma viruses, genetic variation and host markers in, **354**: 384-397
of murine sarcoma viruses, guanine nucleotide binding activity of, **354**: 398-408
- SS 433, workshop on, **375**: 403-413
- Stability in solidification of lamellar eutectics, **373**: 179-182
- Stanford Synchrotron Radiation Laboratory, soft X-ray facilities at, **342**: 3-21
- Stars
accreting degenerate, X-ray spectra of, **336**: 520-549
massive, evolution and explosion of, **336**: 335-357
neutron, and pulsars, summary of workshops on, **336**: 447-450
- State estimation and control of biochemical reaction process, **369**: 147-158
- Statistical decision rule, and missing data in sample set, **337**: 124-138
- Statistical mechanics, nonequilibrium, reduced description in, **357**: 150-156
- Statistics of the distribution of galaxies, **336**: 161-171
- Stellar collapse, summary of workshop on, **336**: 395-401
- Stellar core collapse and neutrino flow, **336**: 358-367
- Stereochemical study
by ³¹P nmr spectroscopy on polyphosphine complexes of heavy metals, **333**: 141-154
of olefin metathesis reaction, **333**: 165-187
- Stereospecific formations of substituted tricarboxylic cyclohexadieneiron complexes, **333**: 107-123
- Stereospecific hydrogenation of tricyclo[4.2.2.0^{2,5}]-deca-3,9-diene system, **333**: 23-34
- Steroid isomerases from *Pseudomonas testosteroni* and *Pseudomonas putida*, **346**: 115-130
- Steroidogenesis induced by interferon, role of receptors and cytoskeleton in, **350**: 254-265

- Steroids**
 adrenal, inducing amiloride-sensitive sodium transport, **372**: 64-78
 photosensitive, as probes of estrogen receptor sites, **346**: 18-31
- Stilbene**, disulfonic acid, and anion transport, **341**: 482-493
- Stimulants** in study of mechanisms of Cl transport, **341**: 117-124
- Stimulus-response coupling**, calcium and cAMP in, **356**: 346-353
- Stochastic aspects of bifurcations in reaction-diffusion systems**, **357**: 410-421
- Stochastic behavior**, some examples of, **357**: 77-79
- Stochastic processes**, two-parameter, Doob-Meyer decomposition for, **373**: 205-207
- Stochastic regimes**, molecular behavior in, **357**: 169-182
- Stochasticity**, numerical experiments in, **357**: 108-118
- Stochastization and collapse of vortex systems**, **357**: 47-54
- Stockholm syndrome and ego defenses of hostage**, **347**: 137-150
- Stoichiometry**, Na:D glucose, **372**: 465-467
- Stomatitis virus**, vesicular, defective interfering particles of, **354**: 238-250
- Storage rings**, particle, colliding beams in, **357**: 236-248
- Strange attractors** (see *Attractors, strange*)
- Strategies**, coding, in short-term memory, **340**: 1-8
- Stress**
 community, at Three Mile Island, **365**: 159-174
 psychological, vocal indicators of, **347**: 47-72
 social, and marital violence, **347**: 229-250
- Stroboscopic light**, and motion sickness due to vision reversal, **374**: 303-311
- Structure**, solvent, for macromolecules, simulations of, **367**: 83-107
- Styrene-butadiene and styrene-dimethylsiloxane block copolymers with LMW styrene blocks**, **371**: 312
- Subharmonic route to turbulent convection**, **357**: 22-27
- Subsets**, two-element, **373**: 183-190
- Sugar transport**, active, and orientation of epithelia in LLC-PK₁ cell line, **372**: 480
- Sulfate compounds in the atmosphere**, **338**: 26-38
- Sulfates**
 ambient, on Allegheny Mountain, **338**: 145-173
 formation of, in urban plumes, **338**: 297-308
- Sulfur**, nutritional interactions of, and thiomolybdate, **355**: 195-207
- Sulfur compounds in urban aerosols**, **338**: 39-49
- Sunsets**, English, of the 1880s, **360**: 247-267
- Superclusters**, dynamics of, **375**: 178-187
- Superfluid ⁴helium**, dynamics of vortex lines in, **337**: 146-160
- Superfluid systems**, and group theory, **337**: 161-166
- Supergravity**, **336**: 295-298
 problems and solutions in, **375**: 15-31
- Supernovae**
 and stellar collapse, summary of workshop on, **336**: 395-401
 explosions of, magnetorotational model of, **336**: 389-394
 models of, **375**: 357-380
 workshop on, **375**: 414
- Superoxide dismutase**, soluble, sensitivity to, assignment of genes for, **350**: 171-173
- Suppressor cells** (see *Cells, suppressor*)
- Surf-to-wind transfer of viruses**, **353**: 201-208
- Surface tension of lattice systems**, **337**: 214-223
- Surgery**, airborne infection during, **353**: 255-261
- Surrogate family**, violent, and charismatic leader, **347**: 266-276
- Suspension bridges** (see *Bridges, long-span suspension*)
- Sweden**, management of occupational carcinogenic risk in, **363**: 255-260
- Symbiogenesis**, theory of, and *Prochloron*, **361**: 325-329
- Symbols**
 edible, and effectiveness of placebos, **364**: 256-268
 use of, by apes, **364**: 35-59
- Synaptic function**, role of calmodulin in, **356**: 92-109
- Synchrotron Laboratories**
 at Stanford, **342**: 3-21
 national, **342**: 44-52
- Synoptic scale transport of aerosols**, **338**: 379-388
- Syntax**
 acquisition of, in children, **345**: 45-67
 and child's expression of meaning, **379**: 172-189
 Picuris, **345**: 147-163
- Synthesis** (see also *Biosynthesis and specific material*)
 asymmetric, via polymer-attached optically active catalysts, **333**: 35-44
 cell-free, of high molecular weight relaxin-related protein, **343**: 148-154
 of natural products, palladium catalysts in, **333**: 250-263
 of terpenes, oligomerization of isoprene for, **333**: 286-301
 of viral membrane proteins, **343**: 319-337
 organic, polymer-bound catalysts in, **333**: 67-73
- Systems**
 cell suspension, ion flows in, **341**: 56-66
 lattice, surface tension of, **337**: 214-223
 Navier-Stokes, finite-difference schemes for, **337**: 118-132
 superfluid, and group theory, **337**: 161-166
 transport, and plasma membranes of epithelial cells, **341**: 48-56
- T-cell lymphocytes** (see *Cells, T-; Lymphocytes, T-cell*)
- T-cells** (see *Cells, T-*)
- T-interferon** (see *Interferon, type II*)

- T-lymphocytes (see Lymphocytes, T-)
- Taphonomic problems, application of scanning electron microscopy to, **376**: 357-385
- Targets
- visual, fixation of, and vestibular nystagmus, **374**: 698-705
 - visual and acoustic, fixation of, in vestibular nystagmus, **374**: 706-721

- Toxic Substances Control Act, framework for unreasonable risk in, 363: 145-166
- Toxicity
cadmium, and dietary copper intake, 355: 319-332
lead, and erythrocyte deformability, 355: 227-239
- Toxicology, archaeological, 376: 393-403
- Trace element abundances of atmospheric aerosols, 338: 13-25
- Trace elements
at Etowah, Georgia, 376: 417-431
interacting with ultratrace elements, 355: 152-164
- Tracers (see specific tracer)
- Transfer, heat (see Heat transfer)
- Transformation
neoplastic
effect of retinoids on, 359: 218-236, 237-251
of rat liver cells, 349: 323-331
elevated requirement for methionine in, 349: 283-293
markers for, 349: 312-322, 397-398
of phenotypes, bromodeoxyuridine-induced changes in, 349: 346-356
reverse, induced by interferons, role of receptors and cytoskeleton in, 350: 254-265
- Transformed hepatocytes, simian virus 40, 349: 391-392
- Transfusion, blood (see Blood transfusion)

- Transit system, Golden Gate Bridge as backbone of, **352**: 161-176
- Transition metal complexes
asymmetric catalysis by, chiral ligands in, **333**: 1-15
tetraphenylborate zwitterionic, as stable catalysts, **333**: 90-100
- Transition metal organometallic compounds, radical pathways in reaction of, **333**: 80-89
- Transition metals
chemistry of, phase transfer catalysis on, **333**: 208-224
in oligomerization of isoprene, **333**: 286-301
- Translational control, amplification of, by membrane-mediated events, **339**: 280-306
- Translocation, voltage-dependent, of hepatic binding protein, **358**: 368-369
- Translocator, ADP, ATP, asymmetry of, **358**: 83-95
- Transmembrane channels (see Channels, transmembrane)
- Transmission electron microscopic study of platelet-forming megakaryocytes, **370**: 30-41
- Transmitter release in myasthenia gravis, kinetics of, **377**: 808-809
- Transport
active
and electrochemical ion transport, **339**: 53-60
in culture, brief history of, **372**: 352-353
alcohol (see Alcohols, transport of)
amino acid and Na^+ + K^+ -ATPase, in rat monolayer hepatocyte culture, **349**: 385-386
anion (see Anion transport)
axonal, calmodulin in, **356**: 361-362
axoplasmic, of calmodulin in mammalian nerve, **356**: 389-390
bicarbonate (see Bicarbonate transport)
cation (see Cation transport)
chloride (see Chloride transport)
electrolyte (see Electrolyte transport)
fluid (see Fluid transport)
glutamate (see Glutamate transport)
melibiose (see Melibiose transport)
of aerosols
in Northern Europe, **338**: 389-398
mesoscale and synoptic scale, **338**: 379-388
of air pollutants, OECD program on, **338**: 453-462
of desert dust, **338**: 515-532
of hazy air masses, **338**: 418-433
of sulfurous aerosols to Scandinavia, **338**: 504-514
of winter Arctic aerosol, **338**: 486-503
phosphate ion (see Ion transport, phosphate)
plasma (see Plasma transport)
proton (see Proton transport)
role of, in spread of cancer, **372**: 455-464
sodium-dependent, of glucose, **339**: 46-52
sugar (see Sugar transport)
water (see Water transport)
- Transport chain, cyclic electron, of photosynthetic bacteria, **341**: 12-26
- Transport function by adenocarcinomas, **372**: 455-464
- Transport models of neurotransmitter-receptor interaction, **369**: 99-112
- Transport properties of intestinal basolateral membranes, **372**: 626-636
- Transport proteins (see Proteins, transport)
- Transport systems (see also specific system) and plasma membranes of epithelial cells, **341**: 48-56
- Treatment and coercion, legal perspectives on, **347**: 199-208
- Trial, mental competence to stand, **347**: 12-19
- Tricarbonylcyclohexadieneiron complexes, substituted, stereospecific and regiospecific formations and reactivities of, **333**: 107-123
- Tricyclo[4.2.2.0^{2,5}]deca-3,9-diene system catalyzed by phenanthrenechromium tricarbonyl, hydrogenation of, **333**: 23-34
- Triggers
ionic (see Ionic triggers)
of development, calcium explosions of, **339**: 86-101
- Trifluoperazine, effect of
on cyclic nucleotide phosphodiesterase activity, **356**: 367-368
on macrophage-like cell line J774, **356**: 162-178
- Trinity College, Cambridge, Romanticism and science at, **360**: 39-68
- Triplet probe study on rates of diffusion-controlled reactions in solution, **366**: 62-74
- Tropomyosin in solution, conformational dynamics of, **366**: 285-299
- Troponin in calcium control of muscle phosphorylase kinase, **356**: 151-161
- Troponin C-like proteins from eukaryotic organisms, **356**: 1-13
- Trypsin, isolation and purification of, from bovine pancreas, affinity precipitation technique in, **369**: 257-263
- Tryptophan hydroxylase, activation of, calmodulin in, **356**: 399
- Tuberculin-induced lymphocyte interferon-like substance, **350**: 584-585
- Tuberculosis, spread of, via recirculated air in naval vessel, **353**: 10-24
- Tubular cells (see Cells, tubular)
- Tubules
anions regulating sodium and fluid transport in, **341**: 125-133
mammalian cortical collecting, and dog kidney cell line MDCK, **372**: 384-405
- renal
actions of parathyroid hormone on, **372**: 552-557
inhibitors and anion transport in, **341**: 97-110
secretion and reabsorption of bicarbonate in, **341**: 225-232
- Tullio phenomenon with eye torsion and tilt of visual surround, **374**: 650-655
- Tumor(s) (see also Neoplastic tissues)

- cutaneous, heated with radio-frequency, **335**: 347-351
- growing, measurement of thermal properties of, **335**: 67-85
- in rats, heat transfer and blood flow in, **335**: 22-34
- sensitivity of, to hyperthermia, **335**: 180-207
- Tumor cells (see Cells, tumor)
- Tumor colony formation, human, inhibited by retinoids, **359**: 414
- Tumor establishment, modulation of, by vitamin A, **359**: 367-382
- Tumor promotor
- effect of, with retinoids, on malignant transformation, chromatid exchange and Na,K-ATPase, **359**: 237-250
- modulation of response to, by retinoids, **359**: 260-274
- Tumor viruses as modifiers of nuclear genome of eukaryotic cells, **361**: 435-460
- Tumoricidal activity, lymphocyte, interacting with prostaglandin effect, **350**: 91-101
- Tungsten (see Organotungsten)
- Turbulence
- fully developed
- and intermittency, **357**: 359-367
- scaling and structures in, **357**: 368-376
- route to
- spectrum for, **357**: 330-336
- via bifurcations, **357**: 489-505
- transition to, in Belousov-Zhabotinsky reaction, **357**: 377-396
- weakly nonlinear, in rotating convection layer, **357**: 28-36
- Turbulent convection, subharmonic route to, **357**: 22-27
- Turbulent flow, measures describing, **357**: 1-19
- Turtle bladder (see Urinary bladder, turtle)
- Tyndall, John, and John Ruskin, **360**: 217-246
- Tyrosine-138 of calmodulin, nmr studies on, **356**: 433-435
- Tyrosine aminotransferase induction in rat hepatocyte culture, **349**: 385-386
- Tyrosine aminotransferase mRNA, regulation of, in HTC cells, **349**: 183-194
- U**ltracentrifugation, continuous-flow, in preparative biochemistry, **367**: 265-274
- Ultrafiltration of protein solutions, **369**: 355-366
- Ultrasonic behavior of cross-linked polymeric glasses, **371**: 308-309
- Ultrasound in heat transfer, **335**: 327-346
- Ultraviolet light for control of airborne bacteria in operating room, **353**: 271-284
- Ultraviolet radiation
- and reduction of wound infection after hip and knee arthroplasty, **353**: 285-293
- cosmic background, workshop on, **375**: 428-448
- Undulipodia, and microtubules and *Pillotina* spirochetes, **361**: 356-368
- Unification, grand, and matter-antimatter domain structure in universe, **375**: 69-79
- United States
- cancer in, economic implications of, **363**: 189-204
- carcinogenic risk management in, **363**: 283-294
- East and West Coast of, patterns of drug abuse in, **362**: 22-28
- national health care policy in, **368**: 141-146
- and community health center experience, **368**: 147-154
- national security of, and human reliability in military systems, **368**: 103-116
- Northeastern, atmospheric sulfates in, **338**: 145-173, 463-482
- pattern of alcohol use and abuse in, **362**: 4-15
- Southwestern
- future aerosols of, **338**: 588-598
- plumes in, **338**: 233-257
- Universe
- density of, from deceleration of nearby galaxies, **375**: 169-177
- early
- and clustering of relic neutrinos, **374**: 32-42
- and particle physics, **375**: 54-68
- workshop on, **375**: 419-427
- energy spectrum of, **336**: 125-129
- expansion of, and Hubble diagram, **336**: 598-599
- mass of, **375**: 157-168
- matter-antimatter domain structure in, **375**: 69-79
- University, cooperation of, with government and industry, **334**: 221-227
- Uptake, post-translational, of cytoplasmically synthesized proteins, **343**: 266-274
- Urban aerosols (see Aerosols, urban)
- Urban plumes (see Plumes, urban)
- Urinary bladder
- amphibian, sodium transport by, effects of insulin on, **372**: 235-246
- frog, regulation of water permeability in, by ADH and cell osmolarity, **372**: 144-162
- rabbit, localization of aldosterone response in, **372**: 56-63
- toad
- ADH-treated, ruthenium red and horseradish peroxidase localization of, **372**: 208-211
- ADH washout in, and aggregate-carrying membranes, **372**: 212
- aldosterone-induced proteins in, **372**: 81-82
- calmodulin-dependence of water permeability in, **372**: 194-203
- control of sodium permeability in, by aldosterone, **372**: 1-14
- epithelium of, responding to lithium chloride, **372**: 218-219
- insulin-stimulated sodium transport in, **358**: 334-335
- modulation of vasopressin in, by prostaglandin E₂ and somatostatin, **372**: 180-193

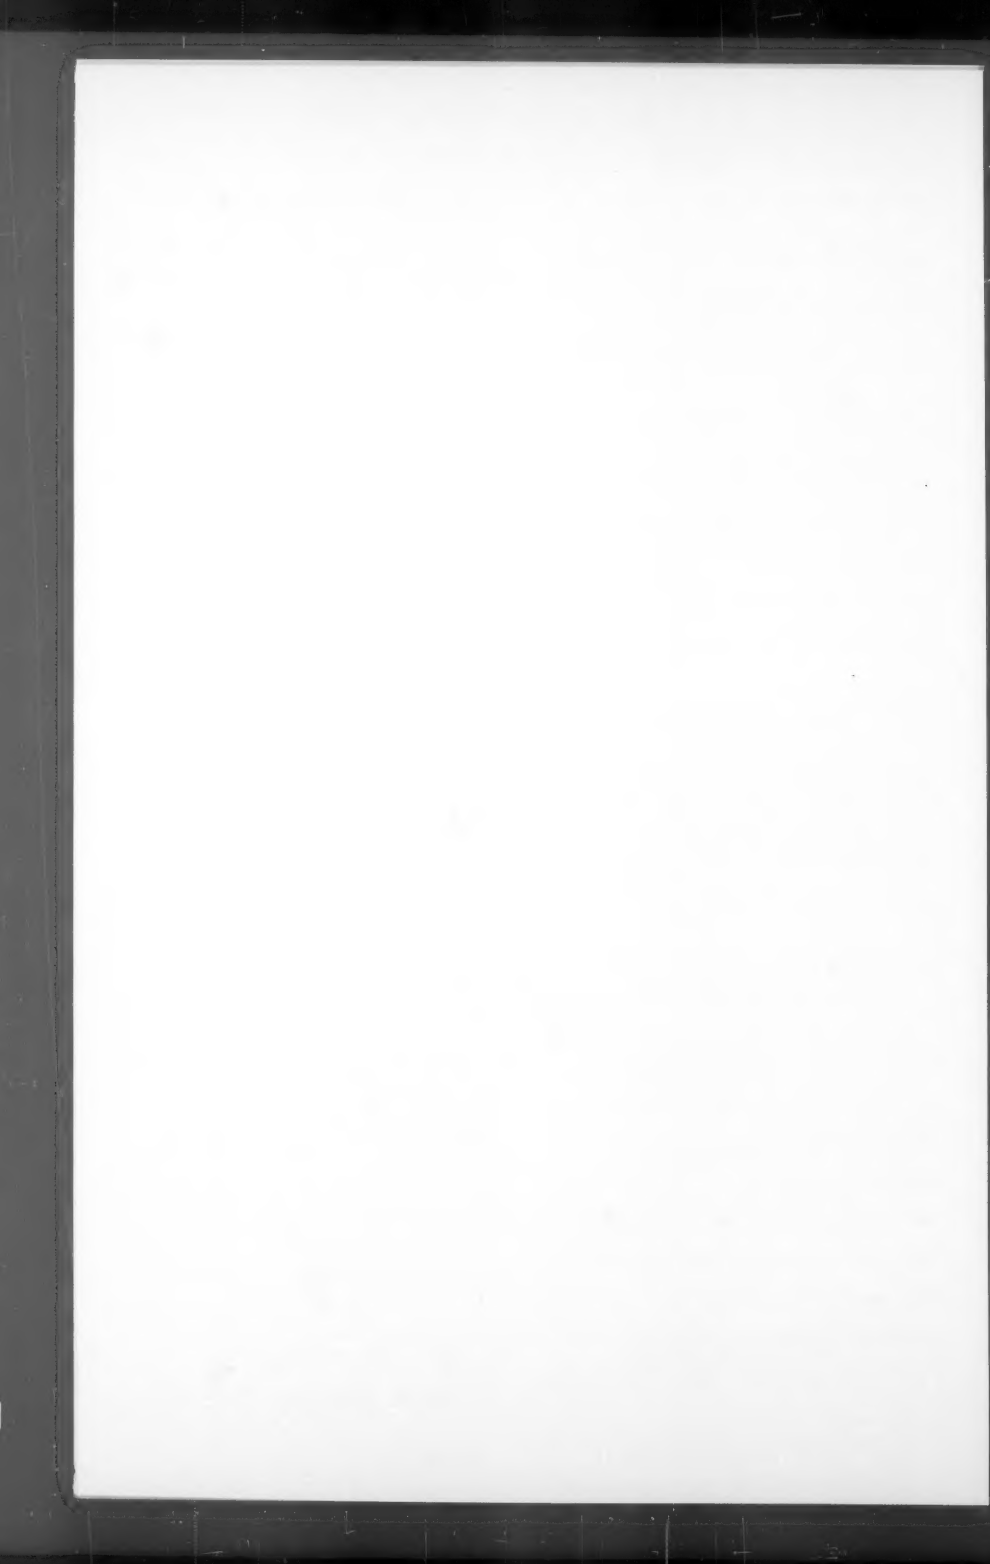

- prostaglandin-vasopressin interaction in, 372: 215-217
- proteins related to sodium transport in, aldosterone-induced synthesis of, 372: 15-29
- response of, to aldosterone, role of lipid metabolism in, 372: 30-38
- vasopressin-stimulated water flow in, and thromboxane A₂, 372: 204-205
- vasopressin-treated, barriers to water flow in, 372: 206-207
- turtle
- acidification mechanism in, 341: 90-96
- proton and bicarbonate transport in, 341: 77-89
- Urine, acidification or alkalization of, and bicarbonate and chloride transport, 341: 210-224
- Utilities sharing responsibility with the media during crisis situations, 365: 116-120
- V**
- Valence bond calculations of enzyme catalysis, 367: 370-382
- Values, determination of, by genes, and socio-biology, 368: 1-16
- Variables
- dependent and independent, multiple regression for error in, 373: 113-127
- independent, missing data among, multivariate linear regression with, 373: 128-137
- Vascular distribution of intratracheally administered heparin, 370: 650-655
- Vascular function in normal and neoplastic tissues, hyperthermia's effect on, 335: 35-47
- Vasopressin
- binding to intact cells, regulation of, 372: 92-105
- interacting with prostaglandins in kidneys, 372: 163-179
- modulated by prostaglandin E₂ and somatostatin in toad bladder, 372: 180-193
- Vasopressin-prostaglandin interaction in toad bladder, 372: 215-217
- Vasopressin-stimulated water flow in toad bladder, controlled by thromboxane A₂, 372: 204-205
- Vasopressin-treated toad bladder, barriers to water flow in, 372: 206-207
- Vector for disease, air currents as, 353: 123-139
- Velocity storage in humans, 374: 421-433
- Venom coagglutinin vWF assay, and platelet-aggregating von Willebrand factor, 370: 191-204
- Ventilation, role of, in spread of measles in school, 353: 25-34
- Verification in cosmology, limits to, 336: 130-160
- Vertebrates, regeneration and repair in, and fibroblast factor, 339: 151-174
- Vesicles
- and parietal cell biology, 341: 312-334
- gastric microsomal, proton transport by, 341: 297-311
- Vessel wall interacting with von Willebrand platelets, 370: 154-178
- Vessels, thermally significant, and bioheat transfer equation, 335: 155-160
- Vestibular disorders in divers, 374: 839-845
- Vestibular habituation during sinusoidal rotation, 374: 330-339
- Vestibular influence upon head-eye coordination, 374: 560-570
- Vestibular neuritis, unilateral vestibular loss in, compensation of, 374: 784-793
- Vestibular neurons, visual-vestibular interaction in, 374: 215-229
- Vestibular nuclei
- ipsilateral medial and lateral neuronal interaction between, 374: 93-101
- neurons of, horizontal eye-movement signals in, 374: 144-156
- single neurons in, 374: 112-129
- Vestibular nystagmus
- in the cat, medial pontine neurons in, 374: 189-209
- modified by fixation of visual targets, 374: 689-705, 706-721
- Vestibular responses, and cat cortical neurons and human psychophysics, 374: 361-372
- Vestibular stimulation, aftereffects of, 374: 434-445
- Vestibular type I hair cell, transmission of, to primary afferent chemical, 374: 210-214
- Vestibular-visual interactions in visual cortical cells in cat, 374: 262-271
- Vestibulocollic reflexes, 374: 395-402
- Vestibulo-ocular reflexes, 374: 395-402
- directional plasticity of, in cat, 374: 504-512
- "error" signals in, in primate, 374: 513-525
- interacting with saccades, 374: 744-754
- three neurons in, 374: 171-188
- unilateral habituation of, 374: 340-351
- Vestibulospinal neurons, responses of, to neck and macular vestibular inputs, 374: 373-394
- Vibrational theory of liquid and glass sides of glass transition, 371: 328-330
- Victims, responses of, to terror, 347: 129-136
- Victorian dream theory, and Charles Dickens, 360: 197-216
- Victorian humanists and scientific theorists, ideas of, on scientific knowledge, 360: 299-318
- Victorian poetry, astronomical imagery in, 360: 137-158
- Victorians
- and geology, 360: 111-136
- early, 360: 1-37
- Vinyl aromatic polymers and copolymers, multi-component fluorescence decay in, 366: 109-124
- Violence
- against women, and pornography, 347: 277-288

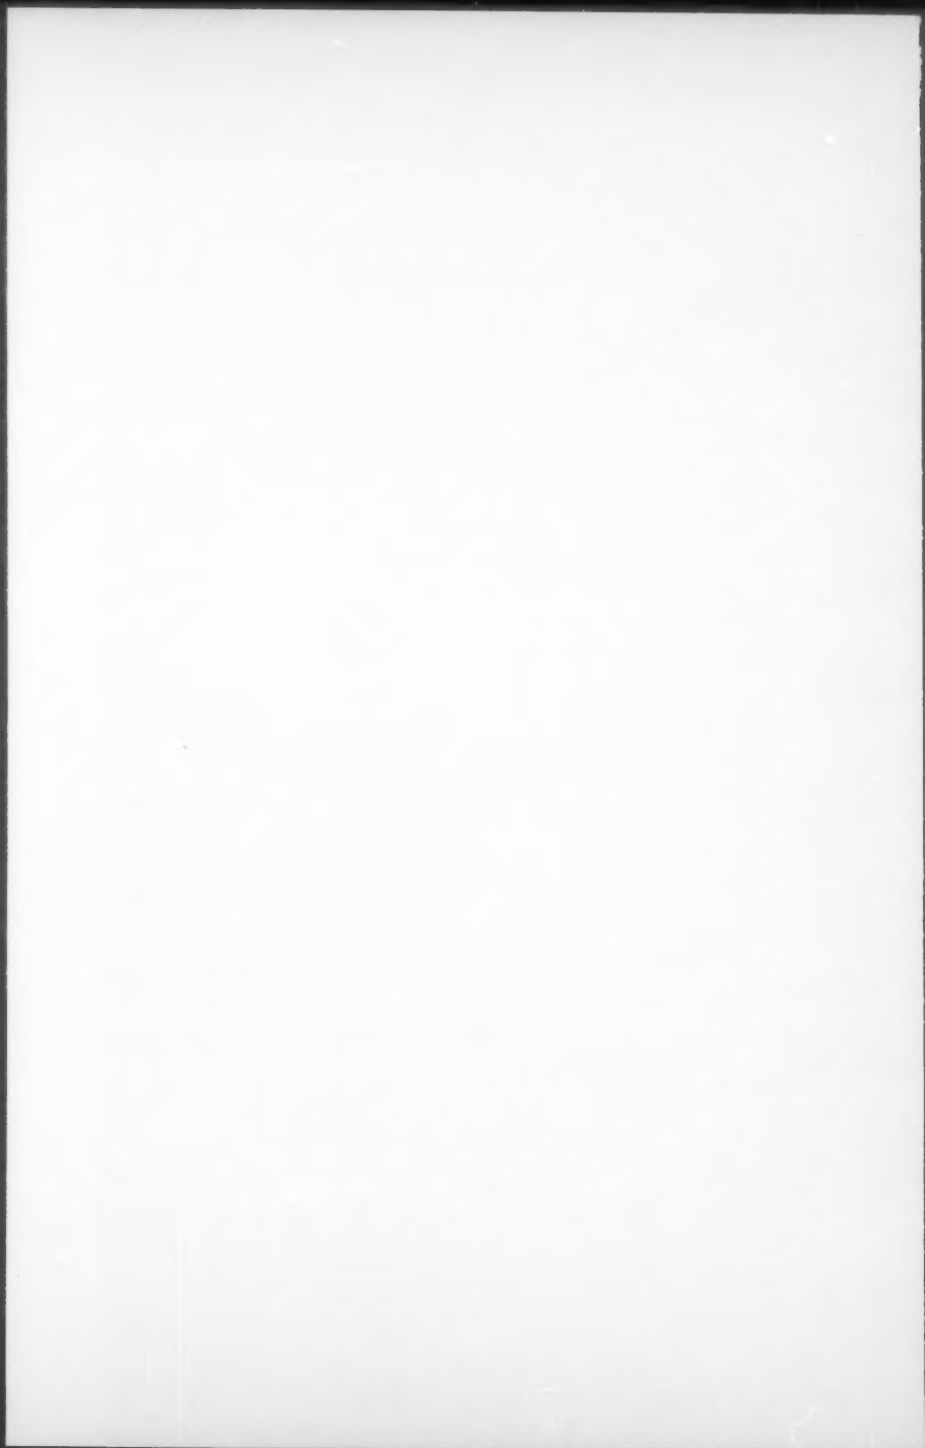

- marital, and social stress in American families, **347**: 229-250
- Violence-prone families, **347**: 251-265
- Violent patients
in the community, **347**: 176-184
mental, and criminal justice system, **347**: 3-11
- Violent surrogate family, and charismatic leader, **347**: 266-276
- Viral gene expression, pleiotropic effect on, **339**: 280-306
- Viral genomes, genetic variation of, **354**: 332-346
- Viral membrane proteins, synthesis and assembly of, **343**: 319-337
- Virion capsule, M13 coat protein as, **343**: 384-390
- Viroids, structure and possible function of, **354**: 251-278
- Virus(es) (see also *specific virus*)
animal
genetics in study of, **354**: 80-83
proteolysis in replication of, **343**: 304-318
as agents of airborne contagion, **353**: 147-156
budding from plasma membrane, interferon inhibition of, **350**: 533-544
enveloped, lipid-protein interactions in, **348**: 419-425
Epstein-Barr, variation among isolates of, **354**: 309-325
hepatitis B, genetic variation of, **354**: 371-378
herpes
defective, **354**: 347-370
DNA of, and molecular epidemiology, **354**: 279-290
genome variation and evolution among, **354**: 472-483
isolated from human ganglia, **354**: 291-308
influenza
antigenic drift in, **354**: 142-161
genetic variation in, **354**: 135-141
influenza A, genetic variation of, studied by recombinant DNA techniques, **354**: 162-171
influenza A mutant, escaping from temperature-sensitive phenotype, **354**: 172-182
mengo (see *Mengovirus*)
murine mammary tumor, inhibition of production of, by interferon, **350**: 631
persistent infection from, and interferon and NK cells, **350**: 42-52
plant
aerosol spread of, **353**: 167-173
spread of through airborne vectors, **353**: 179-185
production of, **369**: 47-60
RNA, evolution of, **354**: 492-498
St. Louis encephalitis, variation among strains of, **354**: 219-237
sarcoma, *src* gene in
genetic variation and host markers in, **354**: 384-397
guanine nucleotide binding activity in, **354**: 398-409
Sendai, interferon inhibiting cell fusion by, **350**: 625
simian, in transformation of hepatocytes, **349**: 391-392
surf-to-wind transfer of, **353**: 201-208
tumor (see *Tumor viruses*)
vesicular stomatitis
defective interfering particles of, **354**: 238-250
released by interferon-treated cells, glycoprotein and membrane protein content of, **350**: 601-602
virulence of, and reovirus hemagglutinin, **354**: 125-134
Virus-induced erythroid leukemia, type I mouse interferon in, **350**: 634-635
Viscosity variation, isothermal, measured by fluorescence depolarization, **371**: 336-337
Vision reversal
and motion sickness, **374**: 303-311
and visually induced self-motion sensation, **374**: 352-360
Visual mossy fiber inputs to flocculus of monkey, **374**: 465-475
Visual motion cues, and postural control of falling monkey, **374**: 403-411
Visual movement perception, sigma-movement and -nystagmus to investigate, **374**: 284-302
Visual stimulation, and neural activity in nucleus reticularis tegmenti pontis in monkey, **374**: 249-261
Visual suppression of caloric nystagmus in brainstem lesions, **374**: 846-854
Visual surround, subjective tilt of, and Tullio phenomenon, **374**: 650-655
Visual system, cerebellar flocculus from, mossy fiber activation of, **374**: 476-490
Visual targets, fixation of, in vestibular nystagmus, **374**: 689-705, 706-721
Visual-vestibular interactions
in central nervous system disorders, **374**: 764-773
in humans, **374**: 421-433
in vestibular neurons, **374**: 230-248
in visual cortical cells in cat, **374**: 262-273
input-output activity of primate flocculus during, **374**: 491-503
Visually induced self-motion sensation, and left-right reversal of vision, **374**: 352-360
Vitamin A
chemistry of, historical introduction to, **359**: 1-8
connection of, to zinc, **355**: 62-75
effect of
on goblet cells in rat intestine, **359**: 181-191
on testicular cells in culture, **359**: 412-413
in clinical and experimental oncology, **359**: 9-24
in modulation of glycosylation reactions and tumor establishment, **359**: 367-382
mediating glycosylation, **359**: 298-305

- Vitamin-A-binding proteins
cellular, immunochemical studies of, **359**: 415-417
structure and function of, **359**: 79-90
- Vitamin-A-deficient rat liver, lipid-linked oligo-saccharides in, **359**: 418-419
- Vitamin A deficiency
and abnormal metabolism of iron, **355**: 58-61
underglycosylation of α_1 -macroglobulin in, **359**: 401-404
- Vitamin-A-induced changes in corneal and con-junctival epithelial glycoprotein syn-thesis, **359**: 358-365
- Vitamin-A-induced modulation of transformed cell phenotype, **359**: 389-390
- Vitamin B₁₂
interacting with folic acid and thyroxine, **355**: 119-129
interacting with vitamins C and E and zinc, **355**: 98-108
- Vitamin C
and prevention of gastric cancer, **355**: 278-279
effects of, on cadmium metabolism, **355**: 249-261
interacting with iron, **355**: 32-44
interacting with lead and mercury, **355**: 262-266
interacting with vitamins B₁₂ and E, and zinc, **355**: 98-108
reaction of nitrite with, **355**: 267-277
- Vitamin D, action of, on intestinal calcium trans- port, **372**: 481-501
- Vitamin D endocrine system in control of calcium and phosphorus metabolism, **355**: 1-17
- Vitamin E
and prevention of gastric cancer, **355**: 278-280
and selenium interacting with mercury and silver, **355**: 212-226
deficiency of, and erythrocyte deformability, **355**: 227-239
interacting with vitamins B₁₂ and C, and zinc, **355**: 98-108
protected from lipid peroxidation, **355**: 18-31
reaction of nitrite with, **355**: 267-277
- Vitamin K-dependent clotting factor, **370**: 311-324

- W**allenberg's syndrome, eye movements in, **374**: 600-613
- Water
and carbon monoxide
homogeneous catalysts for reduction with, **333**: 101-106
hydroformylation and hydrohydroxymethyla- tion with, **333**: 124-140
solution of a dipeptide by, **367**: 151-161
- Water absorption in intestines, angiotensin as neu- romodulator of, **372**: 646-648
- Water-air interface, apolipoproteins at, **348**: 122-137
- Water flow
in vasopressin-treated toad bladder, barriers to, **372**: 206-207
vasopressin-stimulated, controlled by throm- boxane A₂, **372**: 204-205
- Water-gas shift reaction in hydroformylation and hydrohydroxymethylation with carbon monoxide and water, **333**: 124-140
- Water permeability
calmodulin-dependent, in toad urinary bladder, **372**: 194-203
in frog bladder regulated by ADH and cell os- molarity, **372**: 144-162
- Water transport, intracellular, in antidiuretic hor- mone action, **372**: 118-130
- Wavelengths, cm and mm, imaging thermograms at, **335**: 456-474
- Waves
electromagnetic (see Electromagnetic waves)
internal long ocean, and effects of earth's rota- tion, **373**: 150-159
shock, acceleration of cosmic rays by, **375**: 297-313
- Weightlessness, ocular torsion in, **374**: 80-92
- Welded long-span bridge structures, defects in, **352**: 177-192
- Welded steel bridges, fracture control in, **352**: 219-228
- Wells, William Firth, tribute to, **353**: 81-82
- Western Canada (see Canada, Western)
- Westheimer, Frank, appreciation of, **346**: 131-133
- Wind
aerodynamic response of long-span bridges to, **352**: 229-247
catastrophic and annoying responses of bridges to, **352**: 247-264
- Wire strands (bridge), prefabricated parallel, in Japan, **352**: 55-70
- Women, violence against, and pornography, **347**: 277-288
- Words, acquisition of, by first-language learners, **379**: 148-159
- Work Projects Administration (see WPA)
- Workers, nuclear (see Nuclear workers)

- Wound infection, reduction of, by ultraviolet radiation after hip and knee arthroplasty, **353**: 285-293
- WPA archaeological collections, **376**: 141-159
- WPA-CCC collections from Moundville, Alabama, contemporary research with, **376**: 433-447
- X**enogenic oncofetal antigen re-expressed in human neoplasia, **349**: 409-410
- X-radiation, pulsed electron beam plasma source of, **342**: 53-64
- X-ray astronomy, extragalactic, with Einstein observatory, **375**: 210-234
- X-ray backgrounds, **375**: 235-253
- X-ray binaries
spectra of, iron lines in, **336**: 566-578
theoretical aspects of, **336**: 579-589
- X-ray burst sources
thermonuclear-flash models for, **336**: 479-496
workshop on, **375**: 391-402
- X-ray diffraction studies of enzyme-other molecule interactions, **367**: 326-339
- X-ray imaging
and response of charge-coupled devices to soft X-rays, **342**: 252-263
artificial microstructures for, fabrication of, **342**: 203-212
grazing incidence microscope for, **342**: 116-129
polychromatic soft, with holographically recorded aspheric gratings, **342**: 105-115
- X-ray microscope
optical components for, **342**: 167-187
scanning transmission (see Scanning transmission X-ray microscope)
soft, high-power zone plates for, **342**: 94-104
using grazing incidence toroidal mirrors, **342**: 158-166
- X-ray microscopy
and microchemical analysis of cells, **342**: 288-303
and thick or wet specimens, **342**: 268-272
contact, **342**: 213-229
of biological specimens with zone plate microscope, **342**: 368-386
of thin sections of striated muscle and polystyrene microspheres, **342**: 330-349
past, present and future of, **342**: 392-400
- X-ray mirrors, multilayer, fabrication of, **342**: 188-200
- X-ray quasars, **336**: 59-93
- X-ray scattering studies of plasma lipoproteins, **348**: 284-298
- X-ray sources
compact galactic, optical counterparts of, **336**: 550-565
extragalactic, **336**: 496-519
for characteristic radiation and zone plate and grating efficiency measurements, **342**: 81-93
for exposure of photoresists, **342**: 235-251
in globular clusters and burst sources, **336**: 451-478
laser-generated, microscopy of, **342**: 65-80
- X-ray spectra of accreting degenerate stars, **336**: 520-549
- X-ray spectroscopy, artificial microstructures for, **342**: 203-212
- X**-rays
reflection of, from absorbing monocrystal, **342**: 130-134
soft
at Stanford Synchrotron Radiation Laboratory, **342**: 3-21
film materials in region of, **342**: 230-234
in determining biological fine structure, **342**: 350-367
in lithographic studies of interphase chromosomes, **342**: 304-325
in replication of biological material, **342**: 288-303
photon of, image formation methods with, **342**: 387-392
response of charge-coupled devices to, **342**: 252-263
- Y**-group, role of, in generation of vertical smooth eye movements, **374**: 446-454
- Yeast**
anion and proton transport in, **341**: 494-509
mitochondrial transcription and gene structure in, eukaryotic features of, **361**: 105-118
- Yeast culture**, ethanol-producing, cyclic feeding of oxygen and glucose in, **369**: 159-166
- Yolk lipoprotein complex**, lipid domains in, **348**: 408-418
- Yukawa quantum field theory** in three dimensions, **337**: 13-43
- Z**ambian schoolchildren, urban, linguistic flexibility of, **345**: 97-119
- Zetetic communication**, **364**: 297-309
- Zinc**
connection of, to vitamin A, **355**: 62-75
dietary, and biologic effects of orally ingested lead, **355**: 298-308
interacting with copper and iron in mammals, **355**: 130-139
interacting with copper in cardiovascular disease, **355**: 140-151
interacting with selenium, and calcium binding to rat tissue proteins, **355**: 333-346
interacting with vitamins B₁₂, C, and E, **355**: 98-108
- Zone plate measurements**, X-ray source for, **342**: 81-93
- Zone plate microscope** (see Microscope, zone plate)
- Zone plates**, high power, for soft X-ray microscope, **342**: 94-104
- Zuni ruins**, chronology of, **376**: 467-487
